Fredriksen, 2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the people involved Invaluable for specialists accessible to enthusiasts International Warbirds An Illustrated Guide to World Military Aircraft 1914 2000 puts the most legendary fighter aircraft of the 20th century developed outside the United States on vivid display It offers 336 illustrated biographies of the most significant warplanes used in squadron service from World War I to the Balkan conflict including numerous models from Great Britain France Russia and Japan as well as notable machines from Israel Canada China India Brazil and other nations Entries span the history and scope of military aircraft from bombers and fighters to transports trainers reconnaissance craft sea planes and helicopters with each capsule history combining nuts and bolts technical data with the story of that model s evolution and use Together these portraits offer an exciting well researched tribute to visionary designers and builders as well as courageous pilots and crews across the globe and tell a vivid tale of how air power became such a decisive factor in modern warfare Jets at Sea Leo Marriott, 2009-03-09 As World War Two drew to a close jet powered aircraft were beginning to be introduced into service To take advantage of this major development it was necessary for all the worlds air powers to rethink combat tactics and develop the means of handling these faster and generally larger aircraft in the air on land and especially at sea As this modern breed approached and finally broke the sound barrier so did landing and takeoff speeds The decade after the war saw rapid developments in the design of both naval aircraft and their seaborne bases the aircraft carrier The first jet to land aboard a carrier was a modified de Havilland Vampire in 1945 on H M S Ocean Progress was rapid and the application of British inventions such as the angled flight deck steam catapult and mirror landing sight soon became adopted by the major navies of the world Naval aircraft too became more sophisticated by the addition of high lift flap systems and strengthened undercarriages to allow them to operate more safely at sea The author describes the development of these improvements and then their operational advantages in the Korean War and Suez He goes on to describe the US development of a potential nuclear carrier borne bomber the French Navy and its withdrawal from Vietnam in 1954 and then the use of naval aircraft for anti submarine work The Cuban Missus Crisis David M. Addison, 2015-06-01 In this humorous travelogue round Cuba the hapless author suffers from both urban myths and his Missus aka the Drinks Police The first he debunks as they occur the crises his Missus causes or would have caused but for his timely intervention are a more serious matter Acutely aware that Cuba is certain to change in the near future and probably radically award winning author David M Addison was anxious to

experience the country as it is now under communism and Castro Apart from describing what daily life is like for ordinary Cubans he also delves into Cubas past from the original inhabitants and post Columbian conquest to the Wars of Independence and the Bay of Pigs and its aftermath On the literary trail Addison pays homage to Hemingway as he follows in his footsteps And if that should necessitate a visit to a bar or two that cant be helped Its not a lame excuse for a bar crawl despite what the Drinks Police may think It goes without saying that in Cuba you cant avoid classic cars and cigars but the author also takes a close look at Cubas art and architecture flora and fauna and not least the countrys other most famous product rum Another cause for a crisis as far as the Missus is concerned A mine on all aspects of Cuban culture both past and present this is useful background reading for anyone intending a visit to Cuba as well as being a handy accompaniment to your guidebook when you go Or if armchair travelling is more your thing pour yourself a glass of rum or mix a mojito and learn and laugh your way round Cuba

The Bird Farm

Philip Kaplan,2015-11-17 See the excitement and danger of life on an aircraft carrier like never before How does it feel to sit aboard a thirty ton jet and be hurled over a ship's bow at 140 miles per hour And how does a deck crew coordinate its efforts to achieve such a feat every thirty seconds Offering a rare glimpse of life aboard an aircraft carrier The Bird Farm paints a vivid and often hair raising portrait of military aircraft carriers and carrier crews and of the planes and pilots who depend on them Based on archival research and interviews with veterans and contemporary carrier personnel this stunning volume tells the story of the aircraft carrier from the first ramshackle seaplane carriers to today's nuclear powered supercarriers and celebrates their undeniable impact on modern warfare Skyhorse Publishing as well as our Arcade imprint are proud to publish a broad range of books for readers interested in history books about World War II the Third Reich Hitler and his henchmen the JFK assassination conspiracies the American Civil War the American Revolution gladiators Vikings ancient Rome medieval times the old West and much more While not every title we publish becomes a New York Times bestseller or a national bestseller we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home **Great Moments in Flying** Joseph Conner,2020-05-05 From Golden Valley Aero

NewsDecember 1982 Joseph B Conner Joe writes Conner's Corner every month He has been writing for Livermore Valley Airmen's Association's newsletter for several years and his stories are now included in Golden Valley Aero News Joe works for Lawrence Livermore National Laboratory and commutes by car from Tracy California In Joe's stories we learn about Fidelia the Varga he uses when he cruises around the valley on his excursions Fidelia is not just any Varga To Joe she is a real she an airplane with soul and personality Reading Joe's stories you get this feeling that he is talking about a real live being Conner's Corner describes real events things that have happened to Joe on his flights They are cute stories so well told by Joe in his easygoing talking style Many of them have an undertone of philosophy that adds a pleasant color to the events Joe is describing He writes in such a manner that the reader actually gets the feeling of being the pilot or passenger Most enjoyable reading **The Cuban Missile Crisis** Len Scott,2023-11-23 It is sixty years since the events of October 1962

brought the world close to nuclear catastrophe The Cuban missile crisis has long been recognized as the moment of greatest danger in the life and near death of humanity In those sixty years our knowledge and understanding of events have undergone significant change There are some reasons to be encouraged inasmuch as we have learned how both President John F Kennedy and Premier Nikita Khrushchev sought to avoid nuclear war More ominously we have learned of incidents and events that suggest nuclear weapons might have been used by subordinate military commanders in circumstances frequently unknown to their political leaders Decisions whether to use nuclear weapons lay in the hands of often junior military commanders some of whom were perilously close to crossing the nuclear threshold This does not mean as often assumed that if some nuclear weapons were used escalation to all out war was inevitable Yet the undoubted risk of thermonuclear war in these circumstances threatened the very survival of civilization Hundreds if not thousands of millions

of people would have died from immediate and short term effects while the longer term prospect of a Nuclear Winter portended the virtual extinction of humanity Drawing lessons from sixty years ago faces significant challenges If we draw lessons only to discover our understanding was mistaken we might well have drawn the wrong lessons Many received wisdoms about the crisis have been shown to be misleading What is striking is how after forty or fifty or even sixty years new evidence has emerged to challenge previously accepted explanations It is for the reader to reach their own verdicts on the history of the crisis and how much we owe to political leaders who averted catastrophe as well as how their words and deeds helped create the crisis in the first place It is for the reader to conclude how close we came to nuclear war Whatever conclusions are reached one overriding lesson looms large However we judge the actions of political and military leaders one factor was crucial in why we avoided nuclear war in 1962 It was luck In October 1962 humanity was very lucky Will we be so lucky next time
