 European Dept.,2024-05-13 Strong policy responses have helped to mitigate the impact of the recent shocks Output
 recovered rapidly from the pandemic and in response to the energy price shock the authorities made use of available fiscal
 room to mitigate its impact while preserving price signals to encourage lower gas consumption and taking steps to secure
 access to additional gas supplies Despite these efforts the economy slipped into recession over the last few quarters with
 high energy prices elevated inflation and higher interest rates weighing on output and demand Inflation still persists above
 the euro area average even as it has steadily declined since January 2023 in particular as services inflation has proved to be
 sticky amid high wage growth Over the medium term demographic headwinds pose significant fiscal and growth challenges
