conflicts and will be valuable to any environmental professional This book has been written to meet the requirements of any environmental professional lawyer scientist engineer planner who directly or indirectly may be involved in development or planning conflicts when the environment is in issue For the lawyer this book with its focus on understanding and integrating unifying legal principles and scientific concepts consolidates opportunities for assessing and resolving environmental conflicts by negotiation For the environmental professional the book provides opportunities for managing environmental conflicts In addition opportunities are identified for resolving environmental conflicts by negotiation but in quite specific situations i e when the interpretation and application of questions of law are not in issue and only factual scientific issues are in dispute It will also of course strongly appeal to academics and researchers of environmental studies and environmental law It will also appeal to the indigenous community and environmental groups who are seeking more direct and effective inputs into resolving environmental conflicts
