**Century Climate of Jamaica Derived from the Journals of Thomas Thistlewood, 1750-1786** Michael Chenoweth,2003 Thomas Thistlewood is known for his daily records of life on a slave plantation in eighteenth century Jamaica Thistlewood s previously unexamined weather journal is shown here to be the most important written record from the Earth s tropical regions available His observation methods are superior to most of his contemporaries provide a high quality daily record of more than 35 years Comparison of his records with modern weather records indicates that Thistlewood s Jamaica was a much cooler moister place than in modern times A 252 year record of tropical storm hurricane frequency in Jamaica reveals that the late 20th century minimum in storm frequency is unprecedented **Aquatic Ecosystems in a Changing Climate**

Donat-P Häder, Kunshan Gao, 2018-11-16 Global climate change affects productivity and species composition of freshwater and marine aquatic ecosystems by raising temperatures ocean acidification excessive solar UV and visible radiation Effects on bacterioplankton and viruses phytoplankton and macroalgae have farreaching consequences for primary consumers such as zooplankton invertebrates and vertebrates as well as on human consumption of fish crustaceans and mollusks It has affected the habitation of the Arctic and Antarctic oceans the most so far Increasing pollution from terrestrial runoff industrial municipal and household wastes as well as marine transportation and plastic debris also affect aquatic ecosystems

The Climate Near the Ground Rudolf Geiger, Robert H. Aron, Paul Todhunter, 2012-12-06 Anyone who merely turns the pages of this new edition will find that 48 percent of the figures are familiar to him from the third edition But whoever reads it will discover that no three consecutive pages of text have been transferred unaltered The enormous development that has taken place since 1950 particularly the surprising extension in the practical applications of micrometeorology have made it necessary to rewrite the book In producing this work I had in mind two aims which were linked more closely to each other than I had at first dared to hope The new edition was to be a clear and vivid textbook for those who were just taking up the study of microclimatology and at the same time a reference work for those already familiar with the subject For the first task I had in mind the students who would recoil with horror at the insurmountable barrier of an apparently unlimited and ever increasing pile of literature and thus were in need of assistance In addition I was thinking of colleagues working in related sciences who have no time to study our literature

**Critical Government Documents on the Environment** Don Philpott, 2015-09-08 Although the earth has been around for millions of years humans have only been seriously interested in protecting and preserving the environment for less than 200 years and the terms conservationism and environmentalism are little more than 100 years old The industrial revolution brought with it many benefits such as the production of coal steel and cement and mass produced chemicals and fertilizers it also brought pollution and shortly thereafter a serious concern for the environment This book presents the most up to date government information on various environmental topics Critical Government Documents on the Environment presents official governmental positions on many of the leading environmental issues facing us today All the material in this book is from published sources including Environmental Protection Agency Department of the Interior Department of Energy Department of Agriculture Department of Health and Human Services The White House National Aeronautics and Space Administration National Oceanic Atmospheric Administration National Weather Service US Global Change Research Program US Geological Survey This book does not offer any new science but attempts to present important government information on various issues facing our environment Areas covered include global warming and greenhouse gases the Keystone Pipeline and mining water air and marine pollution mining and renewable energy It includes a timeline of important environmental events over the last 200 years and has an extensive glossary of environmental terms About the Series The Critical Documents Series looks at critical issues of our times

It provides non partisan information with no spin about critical players events and information from and about Washington from as many sources as possible from scientific journals and government reports to political manifestos and lobby group publications It collects and distills the most important government documents on the issues covered so that you can get the information you need quickly and easily
