He Called Them By The Lightning A Teach:

He Called Them by the Lightning Lura Beam, 1967 There have been few books as compassionate and poetic as Lura Beam's memories of her teaching odyssey to the South in the early years of the twentieth century Her brilliant and shrewdly sympathetic observations of a culture whose values were so confused that it is stranger than a race of unicorns have been distilled through the fine lens of seventy years In the telling her story acquires a significance beyond its social importance and becomes a literary document of a journey within the self that youth makes only once

Education for Liberation Joe M. Richardson, Maxine D. Jones, 2015-09-30 Education for Liberation completes the study Dr Richardson published in 1986 as Christian Reconstruction The American Missionary Association and Southern Blacks 1861-1890 by continuing the account of the American Missionary Association AMA from the end of Reconstruction to the post World War II era Even after the optimism of Reconstruction was shattered by violence fraud and intimidation and the white South relegated African Americans to segregated and disfranchised second class citizenship the AMA never abandoned its claim that blacks were equal in God's sight that any backwardness was the result of circumstance rather than inherent inferiority and that blacks could and should become equal citizens with other Americans The organization went farther in recognition of black ability humanity and aspirations than much of 19th and 20th century white America by publicly and consistently opposing lynching segregation disfranchisement and discrimination The AMA regarded education as the means to full citizenship for African Americans and supported scores of elementary and secondary schools and several colleges at a time when private schooling offered almost the only chance for black youth to advance beyond the elementary grades Such AMA schools with their interracial faculties and advocacy for basic civil rights for black citizens were a constant challenge to southern racial norms and trained thousands of leaders in all areas of black life

The Art of Teaching Physics with Ancient Chinese Science and Technology Matt Marone, 2022-05-31 Blending physics with the study of ancient Chinese science technology and culture is a unique and highly effective way to present the fundamentals of physics to non science majors Based on the author's course at Mercer University Georgia U S The Art of Teaching Physics with Ancient Chinese Science and Technology exposes a wide range of students to the scientific method and techniques of experimental analysis through the eyes and discoveries of ancient Chinese polymaths long before the European concept of the scientific method was even considered No other book so deftly makes the connections from ancient China to Ben Franklin to Michael Faraday while teaching physics at the same time A distinctive characteristic of this book is the detailed hands on laboratory experiments This first includes making a simple magnetic compass and magnetometer Students then use the compass magnetometer to measure the strength of the magnetic field produced by a long straight wire

The second experiment covers two different methods of mining copper to introduce students to simple chemical principles such as displacement reactions oxidation reduction and electronegativity Originally developed for non science students in an Asian studies environment this book provides a valuable resource for science teachers who wish to explore the historical connections largely ignored in traditional texts When paired with Teaching Physics through Ancient Chinese Science and Technology Marone 2019 these two texts provide a unique means of studying selected topics traditionally found in a two semester Physics course
