Performing the Renaissance Body Sidia Fiorato, John Drakakis, 2016-03-21 In the Renaissance period the body emerges as the repository of social and cultural forces and a privileged metaphor for political practices and legal codification Due to its ambivalent expressive force it represents the seat and the means for the performance of normative identity and at the same time of alterity The essays of the collection address the manifold articulations of this topic demonstrating how the

inscription of the body within the discursive spheres of gender identity sexuality law and politics align its materiality with discourses whose effects are themselves material The aesthetic and performative dimension of law inform the debates on the juridical constitution of authority as well as its reflection on the formation and the moulding of individual subjectivity Moreover the inherently theatrical elements of the law find an analogy in the popular theatre where juridical practices are represented challenged occasionally subverted or created The works analyzed in the volume in their ample spectre of topics and contexts aim at demonstrating how in the Renaissance period the body was the privileged focus of the social legal and cultural imagination
