The Mind of the Horse Michel-Antoine Leblanc,2013-11-04 Horses were first domesticated about 6 000 years ago on the vast Eurasian steppe yet only in the last two decades have scientists begun to explore the mental capacities of these animals In The Mind of the Horse Michel Antoine Leblanc presents an encyclopedic synthesis of scientific knowledge about equine behavior and cognition providing experts and enthusiasts alike with an up to date understanding of how horses perceive think about and adapt to their physical and social worlds Much of what we think we know about the intelligence of the horse derives from fragmentary reports and anecdotal evidence Putting this accumulated wisdom to the test Leblanc introduces readers to rigorous experimental investigations into how horses make sense of their world under varying conditions He describes the anatomical and neurophysiological characteristics of the horse's brain and compares these features with those of other species to gain an evolutionary perspective A horseman himself Leblanc also considers the opinions of renowned riding masters as well as controversies surrounding the horse's extraordinary mental powers that have stirred in equestrian and scientific circles The Mind of the Horse brings together in one volume the current state of equine research and will likely stimulate surprising new discoveries
