Health Care Reform Efforts Around The World:

India's Healthcare Industry Lawton R. Burns, 2014-01-13 This book analyzes the historical development and current state of India's healthcare industry. It describes three sets of institutions that deliver healthcare services, finance these services, and manufacture products used in these services. These institutions provide healthcare hospitals, physicians, pharmacies, and diagnostic laboratories; pay for healthcare individuals who pay out of pocket; insurance companies; community insurance schemes; government ministries; and produce the technology used in healthcare delivery: pharmaceuticals, biotechnology, and medical devices. The volume also discusses innovative efforts to raise capital for the development of these sectors. Finally, it includes three interesting case studies of innovative models of healthcare delivery: L. V. Prasad Aravind and Vaatsalya, as well as analyses of other innovative organizations like Narayana Hrudayalaya and the hospital chains. The contributors to the volume include Wharton faculty members, graduates of Wharton's healthcare MBA program, and executives and consultants from India.

access and quality New discussion of cultural responsiveness Global Education of Health Management William Edson Aaronson, Connie J. Evashwick, 2019-06-12 The purpose of this special issue is to provide insights about how healthcare executives and managers are educated around the world As globalization becomes the standard for all industries healthcare executives must be able to manage effectively with populations financial arrangements and technologies that cross geographic boundaries Education of upcoming students and continuing education of working executives must be broad and encompass a global perspective Students are increasingly eager to study abroad our educational programs must include opportunities for students to study in other countries and to have the information in advance that is necessary to make the experience meaningful Throughout the world health systems are grappling with the need to deliver high value healthcare and high quality services despite rapidly increasing costs The need for effective management to achieve these ends is well documented However healthcare management education is nascent or non existent in many countries especially low and middle income countries that could benefit most from educating healthcare managers in the art and science of management and leadership This special issue strives to provide insights that might guide universities in developing healthcare management programs in their respective countries **Foreign Operations, Export Financing, and Related Programs Appropriations for 1999** United States. Congress. House. Committee on Appropriations. Subcommittee on Foreign Operations, Export Financing, and Related Programs, 1998 **Health Reforms Across The World: The Experience Of Twelve Small And Medium-sized Nations With Changing Their Healthcare Systems** Kieke G Okma, Tim Tenbenschel, Luca Crivelli, 2020-02-24 This book presents the health reform experiences over the past three decades of twelve small and medium sized nations that are not often included in international comparative studies in this field The major conclusion of the study is that despite many similarities in policy goals policy challenges and in the menu of policy options for countries that seek to offer universal coverage to their population the health reforms of the nations in this book did not converge into one direction or model However we found several widespread policy experiences that are relevant for others too For example user fees are unpopular everywhere Governments often try to soften the consequences by exempting large groups of users thus largely defeating the very purpose of those fees As a second example the introduction of new payment modes for medical care like the shift from fee for service to case based payment took much longer than originally expected everywhere and also failed to deliver their promises of improved transparency or efficiency gains A third example is that proposals for universal coverage often ignore the challenges of implementing new financing models that elsewhere took decades if not centuries to develop The conclusions contain both empirical findings and theoretical conclusions of interest to policy makers and scholars of international comparison It is accessible for academics healthcare managers and students as well as a wider audience of readers interested in the changes in healthcare across the world *Private Health Insurance* Sarah Thomson, Anna Sagan, Elias Mossialos, 2020-10-01 Can private health insurance fill gaps in publicly financed coverage

Does it enhance access to health care or improve efficiency in health service delivery Will it provide fiscal relief for governments struggling to raise public revenue for health This book examines the successes failures and challenges of private health insurance globally through country case studies written by leading national experts Each case study considers the role of history and politics in shaping private health insurance and determining its impact on health system performance Despite great diversity in the size and functioning of markets for private health insurance the book identifies clear patterns across countries drawing out valuable lessons for policymakers while showing how history and politics have proved a persistent barrier to effective public policy This title is also available as Open Access on Cambridge Core
