Anonymous Thomas DeGloma, 2023-09-07 A rich sociological analysis of how and why we use anonymity In recent years anonymity has rocked the political and social landscape There are countless examples An anonymous whistleblower was at the heart of President Trump's first impeachment an anonymous group of hackers compromised more than 77 million Sony accounts and best selling author Elena Ferrante resolutely continued to hide her real name and identity In *Anonymous* Thomas DeGloma draws on a fascinating set of contemporary and historical cases to build a sociological theory that accounts for the many faces of anonymity He asks a number of pressing questions about the social conditions and effects of anonymity What is anonymity and why under various circumstances do individuals act anonymously How do individuals accomplish anonymity How do they use it and in some situations how is it imposed on them To answer these questions DeGloma tackles anonymity thematically dedicating each chapter to a distinct type of anonymous action including ones he dubs protective subversive institutional and ascribed Ultimately he argues that anonymity and pseudonymity are best understood as performances in which people obscure personal identities as they make meaning for various audiences As they bring anonymity and pseudonymity to life DeGloma shows people work to define the world around them to achieve different goals and objectives

**The Making of Early Chinese Classical Poetry** Stephen Owen,2020-05-11 Over the centuries early Chinese classical poetry became embedded in a chronological account with great cultural resonance and came to be transmitted in versions accepted as authoritative But modern scholarship has questioned components of the account and cast doubt on the accuracy of

received texts The result has destabilized the study of early Chinese poetry This study adopts a double approach to the poetry composed between the end of the first century B C E and the third century C E First it examines extant material from this period synchronically as if it were not historically arranged with some poems attached to authors and some not By setting aside putative differences of author and genre Stephen Owen argues we can see that this was one poetry created from a shared poetic repertoire and compositional practices Second it considers how the scholars of the late fifth and early sixth centuries selected this material and reshaped it to produce the standard account of classical poetry As Owen shows early poetry comes to us through reproduction reproduction by those who knew the poem and transmitted it by musicians who performed it and by scribes and anthologists all of whom changed texts to suit their needs
