collection of people roles and institutions that produce comics as they are as its organizing principle the book asks readers to attend to the contexts that shape how comics move through societies and cultures Each chapter explores a specific comics world or particular site where comics meet one of their publics such as artists and creators adaptors critics and journalists convention goers scanners fans and comics scholars themselves Through their research contributors demonstrate some of the ways that people participate in comics worlds and how the relationships created in these spaces can provide different perspectives on comics and comics studies Moving beyond the page *The Comics World* explores the complexity of the lived reality of the comics world how comics and graphic novels matter to different people at different times within a social space shared with others *Art Books 1980-1984* R.R. Bowker Company, 1985 *The Power of Comics* Randy Duncan, Matthew J. Smith, 2009-07-01 A comprehensive introduction to the comic arts From the introduction by Paul Levitz If ever there was a medium characterized by its unexamined self expression it s comics For decades after the medium s birth it was free of organized critical analysis its creators generally disinclined to self analysis or formal documentation The average reader didn t know who created the comics how or why and except for a uniquely destructive period during America s witch hunting of the 1950s didn t seem to care As the medium has matured however and the creativity of comics began to touch the mainstream of popular culture in many ways curiosity followed leading to journalism and eventually scholarship and so here we are *The Power of Comics* is the first introductory textbook for comic art studies courses Lending a broader understanding of the medium and its communication potential it provides students with a coherent and comprehensive explanation of comic books and graphic novels including coverage of their history and their communication techniques research into their meanings and effects and an overview of industry practices and fan culture Co authors Randy Duncan and Matthew J Smith draw on their own years of experience teaching comics studies courses and the scholarly literature across several disciplines to create a text with the following features Discussion questions for each chapter Activities to engage readers Recommended reading suggestions Over 150 illustrations Bibliography Glossary *The Power of Comics* deals exclusively with comic books and graphic novels One reason for this focus is that no one text can hope to do justice to both strips and books there is simply too much to cover Preference is given to comic books because in their longer form the graphic novel they have the greatest potential for depth and complexity of expression As comic strips shrink in size and become more inane in content comic books are becoming a serious art form *European Fans in the 17th and 18th Centuries* Miriam Volmert, Danijela Bucher, 2019-12-02 In 17th and 18th century Europe folding fans were important socially coded fashion accessories In the course of the 18th century painted and printed fan leaves displayed an increasing variety of visual motifs and artistic subject matter while many of them also addressed contemporary political and social topics This book studies the visual and material diversity of fans from an interdisciplinary perspective The individual essays analyze fans in the context of the fine and applied arts discussing the role of fans in cultures of communication and examining them as souvenir objects and vehicles for

Centring the Periphery: New Perspectives on Collecting East Asian Objects, 2023-08-21 *Centring the Periphery: New Perspectives on Collecting East Asian Objects* edited by Nataša Vampelj Suhadolnik explores East Asian collections in peripheral areas of Europe and North America and their relationship with the East Asian collections in former imperial and colonial centres. The authors not only present the stories of a number of less well-known individual objects and collections but also discuss the evolution of fashions and tastes in East Asian objects in areas that were not centres of European colonial power and the socioeconomic conditions in which they were collected. To date, research on the collecting of East Asian objects in the Euro-American region has focused primarily on larger collections and collectors. The stories from the periphery however deserve to be told. They point to important departures from the dominant discourses and practices of East Asian collecting, thus raising questions about established taxonomies and knowledge systems. With contributions by Tina Berdajs, Chou Wei-Chiang, Györgyi Fajcskó, Jin Han, Sarah Laursen, Beatrix Mecsi, Motoh Helena, Stacey Pierson, Maria Sobotka, Filip Suchomel, Barbara Trnovec, Nataša Vampelj Suhadolnik, Brigid Vance, Maja Veseli, Nataša Visoň, Nik Gerelj, Bettina Zorn.
