But within this narrative Cosmo and Bronte take on new identities as their own alter egos Omsoc and Etnorb. Omsoc and Etnorb are fearless dogooders who take young readers along for a journey of goodwill and mystery in sectors of the universe yet uncharted. Our two travelers are called upon to assist two alien races in their defence against a very formidable opponent who is determined to change their very existence forever. Forsaking any potential danger to themselves, our two intrepid astronauts manage to achieve a victory for the two alien races beyond any expectation. Gammaldi says: "Their mission is completely altruistic and it is their special training in the astronaut program that qualifies them fully for what must be achieved. They have the skills needed to diplomatically enlist the help of other alien races and to allay the fears of those worlds beset upon by the evil assailants." Gammaldi's book presents its main characters as real-life heroes who brave the darkest reaches of space in an effort to protect the universe from evil. *Odyssey in Space* offers young readers a platform for imagination and goal setting, something Gammaldi sees as directly related to the childhood development process. Amar Singh examines how audiences are being prepared for possible future scenarios where they may find themselves entangled with intelligent objects through developing relationships with them and if so, how they might react when confronted by an intelligent species. Through this research, Singh focuses on both the complications and flaws of science fiction depictions of AI, as well as more abstract works that, while not directly connected, contribute to a better understanding of these emerging technologies. Scholars of film, media, memory, posthuman, transhuman, and cultural studies will find particular value in this book, along with those focusing on literary and critical theory, arts, and aesthetics, political sociology, and advanced research in AI.
