Fantastic Architecture Personal And Eccentric Visions:

Fantastic Architecture Michael Schuyt, Joost Elffers, 1980-01-01 **Fantastic Architecture** Michael Schuyt, Joost Elffers, George Roseborough Collins, 1980 Fantastic Architecture, 1960 *Fantastic Architecture* Ulrich Conrads, Hans-Günther Sperlich, 1963 **Unnatural Horizons** Allen S. Weiss, 1998 Unnatural Horizons presents a selective history of the last five centuries of landscape architecture at the intersection of poetics and science rhetoric and technology and philosophy and politics It investigates the relations between garden aesthetics and metaphysics discussing issues similar to those raised by Weiss s critically acclaimed *Mirrors of Infinity* The Western garden has always served as a setting for music dance theater sculpture and architecture as well as the minor arts of meditative contemplation and erotic seduction The history of landscape architecture is therefore inextricable from the histories of the other arts and must be studied from an interdisciplinary and polycultural point of view Some of the topics included in this book are the influence of neo Platonic philosophy on the Italian Renaissance garden erotic fantasies and the 18th century libertine garden the contrast between Thoreau s romantic notion of virgin nature and changes in perception due to increasing speed and mechanization and the limits of landscape architecture as art form in 20th century gardens *Space(s) of the Fantastic* David Punter, C. Bruna Mancini, 2020-12-29 This book provides a series of new addresses to the enduring problem of how to categorize the Fantastic The approach taken is through the lens of spatiality the Fantastic gives us new worlds although of course these are refractions of worlds already in being In place of real spaces whatever they might be the Fantastic gives us imaginary spaces although within those spaces historical and cultural conflicts are played out albeit in forms that stretch our understanding of everyday location and our usual interpretations of cause and effect Many authors are addressed here from a variety of different geographical and national traditions thus demonstrating how the Fantastic as a mode a genre a way of thinking imagining and writing continually traverses borders and boundaries We hope to move the ongoing debate about the Fantastic forward in a scholarly as well as an engaging way **The Oxford Dictionary of Architecture** James Stevens Curl, Susan Wilson, 2015-02-26 Containing over 6 000 entries from Aalto to Zwinger and written in a clear and concise style this authoritative dictionary covers architectural history in detail from ancient times to the present day It also includes concise biographies of hundreds of architects from history excluding living persons from Sir Francis Bacon and Imhotep to Liang Su ch eng and Francis Inigo Thomas The text is complemented by over 260 beautiful and meticulous line drawings labelled cross sections and diagrams These include precise drawings of typical building features making it easy for readers to identify particular period styles This third edition of *The Oxford Dictionary of Architecture* has been extensively revised and expanded with over 900 new entries including hundreds of definitions of garden and landscape terms such as Baroque garden floral clock hortus conclusus and Zen garden design Each entry is followed by a mini bibliography with suggestions for further reading The full bibliography to the first edition previously only available online has also been fully updated and expanded

and incorporated into this new edition This is an essential work of reference for anyone with an interest in architectural and garden history With clear descriptions providing in depth analysis it is invaluable for students professional architects art historians and anyone interested in architecture and garden design and provides a fascinating wealth of information for the general reader
