**Farm Flu** Teresa Bateman, 2001-01-01 2002 IRA CBC Children's Choices Oppenheim Toy Portfolio Gold Seal Award Ka choo Who's sneezing It's the cow the chickens the pigs the turkeys the donkey and the sheep All the farm animals have the flu and Mom is out of town Luckily her son knows just what his mom would do if it were he who had the flu **Farm Sanctuary** Gene Baur, 2008-03-04 Leading animal rights activist Gene Baur examines the real cost of the meat on our plates for both humans and animals alike in this provocative and thorough examination of the modern farm industry Many people picture cows sheep pigs and chickens as friendly creatures who live happily within the confines of a peaceful family farm arriving as food for humans only at the end of their sun-drenched lives That's what Gene Baur had been told but when he first visited a stockyard he realized that this rosy depiction couldn't be more inaccurate Amid the stench noise and filth his attention was drawn in particular to one sheep who had been cast aside for dead But as Baur walked by the sheep raised her head and looked right at him She was still alive and the one thing Baur knew for sure that day was that he had to get her to safety Hilda as she was later named was nursed back to health and soon became the first resident of Farm Sanctuary an organization dedicated to the rescue care and protection of farm animals The truth is that farm production does not depend on the family farmer with a small herd of animals but instead resembles a large assembly line factory Animals raised for human consumption are confined for the entirety of their lives and often live without companionship fresh air or even adequate food and water Viewed as production units rather than living beings with feelings ten billion farm animals are exploited specifically for food in the United States every year In Farm Sanctuary Baur provides a thought-provoking investigation of the ethical questions involved in the production of beef poultry pork milk and eggs and what each of us can do to stop the mistreatment of farm animals and promote compassion He details the triumphs and the disappointments of more than twenty years on the front lines of the animal protection movement And he introduces sanctuary us to some of the special creatures who live at Farm Sanctuary from Maya the cow to Marmalade the chicken all of whom escaped horrible circumstances to live happier more peaceful lives Farm Sanctuary shows how all of us have an opportunity and a responsibility to consume a kinder plate making a better life for ourselves and animals as well You will certainly never think of a hamburger or chicken breast the same way after reading this book **Farm Journal**, 1928 *Farm Journal and Country Gentleman*, 1921 **Vital Signs 2007-2008** Worldwatch Institute, 2007 The award-winning Worldwatch Institute reveals the often overlooked key trends that tell the true health of our planet **The Meat Crisis** Joyce D'Silva, John Webster, 2017-08-23 Meat and dairy production and consumption are in crisis Globally 70 billion farm animals are used for food production every year It is well accepted that livestock production is a major contributor to greenhouse gas emissions The Food and Agriculture Organization of the United Nations FAO predicts a rough doubling of meat and milk consumption in the first half of the 21st century with particularly rapid growth occurring in the developing economies of Asia What will

this mean for the health and wellbeing of those animals of the people who consume ever larger quantities of animal products and for the health of the planet itself The new edition of this powerful and challenging book explores the impacts of the global growth in the production and consumption of meat and dairy including cultural and health factors and the implications of the likely intensification of farming for both small scale producers and for animals Several chapters explore the related environmental issues from resource use of water cereals and soya to the impact of livestock production on global warming and issues concerning biodiversity land use and the impacts of different farming systems on the environment A final group of chapters addresses ethical and policy implications for the future of food and livestock production and consumption Since the first edition published in 2010 all chapters have been updated three original chapters re written and six new chapters added with additional coverage of dietary effects of milk and meat antibiotics in animal production and the economic political and ethical dimensions of meat consumption The overall message is clearly that we must eat less meat to help secure a more sustainable and equitable world
