Farming And The Countryside Hc 1991:

Economic Incentives and Environmental Policies J.B. Opschoor,R. K. Turner,2012-12-06 This book contains a collection of papers on economic incentives and environmental policies which result from the authors joint research work in the program Environment Science and Society conducted under the auspices of the European Science Foundation with whose cooperation the book has been published The work concentrates on the scientific and methodological aspects of the development implementation and evaluation of economic instruments at a national level The research is both theoretical and empirical At a theoretical level attention is given to the dynamics of instrument choice in various political and economic contexts and to the means for evaluating economic instruments in terms of their effectiveness and efficiency At an empirical level the research seeks to investigate the performance of economic instruments in reality and to explore options for new approaches on the interface between technology economy and the environment A subject index complements this first volume in the ESF Environment Science and Society series Agriculture and EU Environmental Law Mr Brian Jack,2013-02-28 This book critically examines the development and current structure of European Union agri environmental measures at a substantive level Examining the measures in an integrated manner showing how they interrelate linking different aspects of European Union agricultural law and policy this volume examines the legislation adopted at European Union level as well as the impact of particular national measures to implement that legislation Where appropriate comparisons are drawn between the manner in which European Union legislation has been implemented among various Member States Critically assessing European Union and national measures in the light of other policy pressures such as the influence of world trade agreements and the political pressures exerted by the agricultural sector within the national legal systems of individual Member States this volume is a valuable resource for academics researching and practitioners working in the areas of European Union environmental and agricultural law **The Cumulative Book Index** ,1992 A world list of books in the English language Town and Country Planning in the UK Barry Cullingworth,Vincent Nadin,2003-09-02 Town and Country Planning in the UK has become the Bible of British planning In this new edition detailed consideration is given to the nature of planning and its historical evolution central and local government the EU and other agencies the framework of plans and other instruments development control land policy and planning gain environmental and countryside planning sustainable development waste and pollution heritage and transport planning urban policies and regeneration This twelfth edition has been completely revised and expanded to cover the whole of the UK The new edition explains more fully the planning policies and actions of the European Union and takes into account the implications of local government reorganization the plan led system and the growing interest in promoting sustainable development **Rural Politics** Michael Winter,2013-05-13 The rural areas of Britain Europe and the developed world are undergoing massive changes with increasing concern about productivity agricultural methods and environmental policy Rural Politics examines the issues

affecting rural areas such as water pollution forestry and the greening of agricultural policy It looks in particular at the political parameters to these issues and how concern for the countryside is essentially a part of a wider set of political processes Rural Politics provides a much needed examination of the evolution and content of policies affecting today s countryside both in terms of major land uses and economic and social development *Geographies of Agriculture* Guy Robinson,2014-01-14 Agricultural Geography has changed dramatically in recent decades reflecting the transformation of the farming industry itself Geographies of Agriculture embraces these changes applying ideas and methods from contemporary social science as it moves beyond farm based production to address current issues affecting the production and consumption of food and fibre throughout the world The book places special emphasis on topics that reflect globalisation processes integration of agriculture into the wider agri food system concern with attaining sustainable production systems and the importance of both government and supra government policies Examples are drawn from North America Western Europe and the developing world Geographies of Agriculture will appeal especially to Geography students but should also be of interest to a broader range of students in Sociology Economics and Development Studies and anyone interested in agriculture food production and consumption and rural development **Town and Country Planning in the UK** J. B. Cullingworth,Vincent Nadin,2002 This thirteenth edition has been completely revised to take into account all the changes that have occurred in British planning including the policies introduced by the Labour government devolution innovations and the European Union **Farming in the First Millennium AD** P. J. Fowler,2002-11-14 Peter Fowler has written an authoritative account of farming in Britain in the first millennium AD This is the first synthesis of our knowledge on this topic for a generation Successive chapters assemble and analyse the latest evidence on farms fields technology food diet and society New interpretations are offered on subjects ranging from implements to illuminated manuscripts and evidence drawn from Northern England Scotland and Wales contributes significantly to the story The book concludes with a magisterial review of the ways in which agriculture shaped early Britain s societies and landscapes It also proposes a chronological model of British agriculture for the whole millennium *Field Systems and Farming Systems in Late Medieval England* Bruce M.S. Campbell,2023-05-31 The later Middle Ages was an overwhelmingly rural world with probably three out of four households reliant upon farming for a living Yet conventional accounts of the period rarely do justice to the variety of ways in which the land was managed and worked The thirteen essays collected in this volume draw upon the abundant documentary evidence of the period to explore that diversity In the process they engage with the issue of classification without which effective generalisation is impossible and offer a series of solutions to that particularly thorny methodological challenge Only through systematic and objective classification is it possible to differentiate between and map different field systems husbandry types and land use categories That in turn makes it possible to consider and evaluate the relative roles of soils and topography institutional structures and commercialised market demand in shaping farm enterprise both during the period of

mounting population before the Black Death and the long era of demographic decline that followed it What emerges is an agrarian world more commercialised differentiated and complex than is usually appreciated whose institutional and agronomic contours shaped the course of agricultural development for centuries to come

Moralizing The Environment Philip Lowe, Judy Clark, Susanne Seymour, Neil Ward, 2023-03-24 First published in 1997 There was a time when pollution was equated with the urban and the industrial But things have changed What were previously mutually exclusive categories of agriculture and pollution have been brought together in a new morally charged atmosphere Moralizing the environment is a study of how this shift came about It examines the emergence of the farm pollution problem in Britain in the 1980s It draws upon a study of the regulation of farm wastes cattle slurry silage effluent and the dirty water from farmyards conducted between 1989 and 1995 Detailed surveys and ethnographic fieldwork were carried out in the south west of England among dairy farmers pollution inspectors agricultural advisers and environmentalists In trying to get to grips with farm pollution they were pursuing different notions not only of sound agricultural practice but also of nature morality and the law What ultimately was at stake was who could be trusted to safeguard the countryside

Progress in Rural Policy and Planning Andrew W. Gilg, 1993 *Wildlife Conservation on Farmland: Managing for nature on lowland farms* David Whyte Macdonald, Ruth Feber, 2015 This volume reveals how agricultural systems and wildlife interact presenting examples from scales varying from landscape to microcosm from populations to individuals covering plants invertebrates birds and mammals

Land-use Changes and Their Environmental Impact in Rural Areas in Europe Reinhard Krönert, 1999 The rural landscapes of Europe have been radically modified over the last four decades not only as a result of urban expansion but primarily due to changes in agriculture i e increased intensification of production in some areas and extensification land being taken out of production in other areas This volume presents a comparison of rural land use change and landscape pattern dynamics in different parts of Europe

Rural Change and Planning Gordon Cherry, A.W. Rogers, 2003-12-16 This book provides a critical overview of rural change over the eighty years since the outbreak of the Great War making clear the historical origins of present day policy It also provides a structural integration for the many diverse themes which must be interwoven in order to understand current conditions in the countryside

Rural Europe Keith Hoggart, 2014-02-25 Examines the interaction of the economic political and social change processes within Europe which are bringing about fundamental transformations in rural areas The authors expand on this view of rural Europe and place its significance within the broader field of rural studies

The Great Meadow Brian Donahue, 2004-01-01 Employing precise geographical information system GIS mapping of land ownership and land use Donahue describes how the land was settled and how mixed husbandry was developed in Concord By reconstructing several farm neighborhoods and following them through many generations he reveals a diverse sustainable farming system of tillage orchards pastures hay meadows and woodlots that required careful management of soil and water Donahue concludes that ecological degradation came to Concord only later

when nineteenth century economic and social forces undercut the environmental balance that earlier colonial farmers had nurtured

BOOK JACKET **Contemporary Rural Geographies** Hugh Clout, 2007-06-11 A cohesive set of research statements on critical related issues in British rural geography

Prehistoric Britain Joshua Pollard, 2008-06-23 Informed by the latest research and in depth analysis *Prehistoric Britain* provides students and scholars alike with a fascinating overview of the development of human societies in Britain from the Upper Paleolithic to the end of the Iron Age Offers readers an incisive synthesis and much needed overview of current research themes Includes essays from leading scholars and professionals who address the very latest trends in current research Explores the interpretive debates surrounding major transitions in British prehistory

Secure from Rash Assault James Winter, 2023-09-01 Nineteenth century Britain led the world in technological innovation and urbanization and unprecedented population growth contributed as well to the rash assault to quote Wordsworth on Victorian countrysides Yet James Winter finds that the British environment was generally spared widespread ecological damage Drawing from a remarkable variety of sources and disciplines Winter focuses on human intervention as it not only destroyed but also preserved the physical environment Industrial blight could be contained he says because of Britain's capacity to import resources from elsewhere the conservative effect of the estate system and certain intrinsic limitations of steam engines The rash assault was further blunted by traditional agricultural practices preservation of forests and a growing recreation industry that favored beloved landscapes Winter's illumination of Victorian attitudes toward the exploitation of natural resources offers a valuable preamble to ongoing discussions of human intervention in the environment

The Environmental Case for Brexit Ben Pontin, 2019-05-30 The recent Brexit debates present leaving the European Union largely as a threat to environmental protection and to environmental law This exciting and important new work argues that Brexit represents a real opportunity for environmental protection in the United Kingdom freeing it from a pan European framework not necessarily fit for UK domestic purposes Central to the argument is the belief that environmental protection in the United Kingdom can most effectively be pursued through established domestic institutions looking inwards at local challenges and outwards at more global ones all the while drawing on considerable historical experience The book is designed to address rather than dismiss those concerns raised by environmental lawyers after the outcome of the referendum Provocative and compelling it offers an alternative vision of the UK environmental law framework outside of the European Union
