Fascinating Fables Disha Singh, 2021-06-20 Fascinating Fables is a house full of 50 writers who were filled with different emotions. It's not merely an anthology; it's a collaboration of short stories, poems, and quotes tied together on different themes. The emotions filled by the writers in their stories will force you to keep turning the pages to explore what's going to happen next. The book is compiled by Disha Singh. **137: Jung, Pauli, and the Pursuit of a Scientific**

Obsession Arthur I. Miller, 2010-05-17 The history is fascinating as are the insights into the personalities of these great thinkers. New Scientist: Is there a number at the root of the universe? A primal number that everything in the world hinges on. This question exercised many great minds of the twentieth century among them the groundbreaking physicist Wolfgang Pauli and the famous psychoanalyst Carl Jung. Their obsession with the power of certain numbers including 137 which describes the atom's fine structure constant and has great Kabbalistic significance led them to develop an unlikely friendship and to embark on a joint mystical quest reaching deep into medieval alchemy, dream interpretation, and the Chinese Book of Changes. 137 explores the profound intersection of modern science with the occult but above all it is the tale of an extraordinary fruitful friendship between two of the greatest thinkers of our times. The Barbarians Peter Bogucki,2024-11-12 Beginning in the Stone Age and continuing through the collapse of the Roman empire a fascinating exploration of the increasing complexity technological accomplishments and distinctive practices of the non literate peoples known as Barbarians We often think of the civilizations of ancient Greece and Rome as discrete incubators of Western culture places where ideas about everything from government to art to philosophy were free to develop and then be distributed outward into the wider Mediterranean world But as Peter Bogucki reminds us in this book Greece and Rome did not develop in isolation All around them were rural communities who had remarkably different cultures ones few of us know anything about Telling the stories of these nearly forgotten people he offers a long overdue enrichment of how we think about classical antiquity As Bogucki shows the lands to the north of the Greek and Roman peninsulas were inhabited by non literate communities that stretched across river valleys mountains plains and shorelines from the Atlantic Ocean in the west to the Ural Mountains in the east What we know about them is almost exclusively through archeological finds of settlements offerings monuments and burials but these remnants paint a portrait that is just as compelling as that of the great literate urban civilizations of this time Bogucki sketches the development of these groups cultures from the Stone Age through the collapse of the Roman Empire in the west highlighting the increasing complexity of their societal structures their technological accomplishments and their distinct cultural practices He shows that we are still learning much about them as he examines new historical and archeological discoveries as well as the ways our knowledge about these groups has led to a vibrant tourist industry and even influenced politics The result is a fascinating account of several nearly vanished cultures and the modern methods that have allowed us to rescue them from historical oblivion **Leaves of Healing** ,1904

Monsch,2021-07-29 A journey in search of Middle earth In 1911 at the age of nineteen J R R Tolkien embarked on an adventurous journey through the Swiss Alps with a heavy pack he hiked over many high passes More than fifty years later he mentioned in a letter to his son Michael that this trip had deeply

affected him Bilbo's journey in The Hobbit from Rivendell to the other side of the Misty Mountains he said was based on his own adventures in 1911 Tolkien himself named a few specific sources of inspiration most explicitly the Silberhorn Silverhorn So I wondered Was this perhaps only the tip of the iceberg Following in Tolkien's footsteps I myself set out into the spectacular mountain world with its stories myths and legends in search of his sources of inspiration and little by little a vivid and mysterious world revealed itself to me a world that helped shape Middle earth More than 100 color images accompany the author's research and discovery journey along with 11 hiking and 3 road trip suggestions that allow readers to recreate Tolkien's experience with all its impressions themselves in the Swiss mountains This book is above all else an invitation to step into Tolkien's hiking shoes shoulder his pack and step back a century into a world which is as far from today as Middle earth is from our world a guidebook of impressions a walking tour of the nature of imagination and the imagination of nature
