Fascination Science Projects H:

Fascinating Science Experiments for Young People George Barr, 2013-02-06 This simply written introduction to scientific research and experimentation takes youngsters into an exciting world where they'll not only learn to discover their own answers to specific problems but will be encouraged to develop sound scientific attitudes and techniques as well. For this volume noted science educator George Barr has compiled a carefully selected array of intriguing experiments dealing with chemistry, astronomy, magnetism and electricity, weather, water, the human body, living things, sound and light and measurement. By performing these experiments young researchers will discover the answers to such questions as: Why Can't We See Stars in the Daytime? How Can a Spider Web be Collected? Can Water Containing Ice Get Warm? How Can We See Sound Vibrations? What Helps Your Memory and many others. As the author early points out, the work is not a reading book but rather a doing book with a chapter containing suggestions for further experiments. Valuable advice about scientific procedures emphasizes the importance of taking readable, organized notes, gathering as much evidence as possible, learning to use control groups and much more. In addition, over 100 illustrations enhance the text, which also contains a selected bibliography of relevant reading material.

Metamorphosis Alvin Silverstein, Virginia Silverstein, 2013-10-21 Easy to read book offers a well illustrated look at how some baby creatures develop from a larval stage into adults that bear no resemblance to their former selves.

Electricity Experiments for Children Gabriel Reuben, 1968-01-01 Gives directions for simple experiments which demonstrate the principles of magnetism, electricity, electronics and nuclear energy.

The Complete Home Learning Sourcebook Rebecca Rupp, 1998 Lists all the resources needed to create a balanced curriculum for homeschooling from preschool to high school level.
