Far Stars:

Enemy in the Dark Jay Allan, 2015-12-01 The second book in the Far Star series follows Blackhawk and the crew of the Wolf's Claw as they are gradually and unwillingly drawn more deeply into Marshal Lucerne's campaign to form a united power bloc in the Far Stars to resist imperial encroachment. Successfully completing their mission to rescue Marshal Augustin Lucerne's daughter Astra, the crew of the Wolf's Claw are enjoying some well-deserved rest, all that is except Blackhawk. The space gun for hire cannot escape Lucerne's relentless pleas for help against growing imperial control in the Far Stars. While Blackhawk deeply respects his friend, he fears that the power Lucerne offers will lead him back to his old dark ways. His resistance crumbles, however, when Lucerne presents evidence that the imperial governor has been manipulating the conflicts in the Far Stars. Convinced of the deadly danger of imperial domination, Blackhawk and his crew board the Wolf's Claw once more and set out to gather intelligence on the Empire's movements, the proof Lucerne needs to unite the fractured and feuding worlds of the Far Stars into a single power bloc capable of resisting imperial aggression. But deep in the sparsely populated territory of the Far Stars, he discovers that the imperial governor's machinations are far-reaching and threaten the independence of every world this side of the Void. A man seemingly running from himself, Blackhawk is beginning to realize he can no longer remain a prisoner to his own past while the future of the Far Stars is in jeopardy.

Funeral Games Jay Allan, 2016-01-19 The battle for the unification and rule of the Far Stars Confederation will be decided in this exhilarating third and final book in the swashbuckling space saga begun with *Shadow of Empire* and *Enemy in the Dark*. The Far Stars stands on the edge of a precipice. The forces of Governor Vos have surged forth, conquering worlds and imposing the emperor's brutal rule over millions. Only one thing stands in the way of total victory: Marshal Augustin Lucerne and his newly created Confederation. Vos has a simple plan: assassinate the marshal and manipulate his generals to fight over his legacy, destroying each other in the process. But another threat lurks: Arkarin Blackhawk. The smuggler and mercenary has been the marshal's ally, working in the shadows and unraveling Vos's plans. The governor can only hope the mysterious adventurer continues to resist a formal position in the Confederation. Or he can have Blackhawk assassinated too. Because with Blackhawk succeeding Lucerne, the black and gold imperial flags will be stained red with blood. For him is a dark and dangerous past, and if he is put at the helm of the Confederation's armies, the brutal imperial general he once had been may rise once again. The Far Stars are facing the final battle. The Imperials seem unstoppable. But if Blackhawk somehow survives and can come to grips with the horror deep within him, he just might be able to save the Far Stars from the iron hand of empire.

Shadow of Empire Jay Allan, 2015-11-03 The first installment in the Far Star series is a swashbuckling space saga that introduces the daring pirate Blackhawk and the loyal crew of the Wolf's Claw from Jay Allan, the author of the bestselling *Crimson Worlds* saga. Smuggler and mercenary Arkarin Blackhawk and the crew of the ship Wolf's Claw are freelance adventurers who live on the fringe of human society in the Far Stars. A veteran fighter as deadly with a

blade as he is with a gun Blackhawk is a man haunted by a dark past Even his cynicism cannot banish the guilt and pain that threaten his sanity Sent to rescue the kidnapped daughter of his longtime friend Marshal Augustin Lucerne Blackhawk and his crew find themselves drawn into one deadly fight after another When the Wolf s Claw is damaged they are forced to land on a remote planet subsumed by civil war Pulled unwittingly into the conflict they uncover disturbing information about secret imperial involvement that could upset the plans of Lucerne For the Marshal is determined to forge a Far Stars Confederation powerful enough to eliminate all imperial influence and threats in the sector He needs a skilled warrior like Blackhawk on his side but the mercenary plagued by dark memories from the past refuses to join the cause All too soon though he and his crew will have to take a stand

Moore, Marlan O. Scully, 2012-12-06

The four week period from May 20 to June 16 1984 was an intensive period of advanced study on the foundations and frontiers of nonequilibrium statistical physics NSP During the first two weeks of this period an advanced study course on the Foundations of NSP was conducted in Albuquerque under the sponsorship of the University of New Mexico Center for High Technology Materials This was followed by a two week NATO Advanced Study Institute on the Frontiers of NSP in Santa Fe under the same directorship Many Students attended both meetings This book comprises proceedings based on those lectures and covering a broad spectrum of topics in NSP ranging from basic problems in quantum measurement theory to analogies between lasers

and Darwinian evolution The various types of quantum distribution functions and their uses are treated by several authors other tools of NSP such as Langevin equations Fokker Planck equations and master equations are developed and applied to areas such as laser physics plasma physics Brownian motion and hydrodynamic instabilities The properties and experimental detection of squeezed states and antibunching are described as well as experimental tests of the violation of Bell s inequality Information theory mean field theory reservoir theory entropy maximization and even a novel nonlinear generalization of quantum mechanics are used to discuss nonequilibrium phenomena and the approach toward thermodynamic equilibrium

Recreations in Astronomy: With Directions for Practical Experiments and Telescopic Work Henry White Warren, 1886-01-01 During all the ages there has been one bright and glittering page of loftiest wisdom unrolled before the eye of man That this page may be read in every part man s whole world turns him before it This motion apparently changes the eternally stable stars into a moving panorama but it is only so in appearance The sky is a vast immovable dial plate of that clock whose pendulum ticks ages instead of seconds and whose time is eternity The moon moves among the illuminated figures traversing the dial quickly like a second hand once a month The sun like a minute hand goes over the dial once a year Various planets stand for hour hands moving over the dial in various periods reaching up to one hundred and sixty four years while the earth like a ship of exploration sails the infinite azure bearing the observers to different points where they may investigate the infinite problems of this mighty machinery This dial not only shows present movements but it keeps the history of uncounted ages past ready to be read backward in proper order and it has glorious volumes of prophecy revealing the far off future to any man who is able to look thereon break the seals and read the record Glowing stars are the alphabet of this lofty page They combine to form words Meteors rainbows auroras shifting groups of stars make pictures vast and significant as the armies angels and falling stars in the Revelation of St John changing and progressive pictures of infinite wisdom and power Men have not yet advanced as far as those who saw the pictures John describes and hence the panorama is not understood That continuous speech that day after day uttereth is not heard the knowledge that night after night showeth is not seen and the invisible things of God from the creation of the world even his eternal power and Godhead clearly discoverable from things that are made are not apprehended The greatest triumphs of men s minds have been in astronomy and ever must be We have not learned its alphabet yet We read only easy lessons with as many mistakes as happy guesses But in time we shall know all the letters become familiar with the combinations be apt at their interpretation and will read with facility the lessons of wisdom and power that are written on the earth blazoned in the skies and pictured by the flowers below and the rainbows above In order to know how worlds move and develop we must create them we must go back to their beginning give their endowment of forces and study the laws of their unfolding This we can easily do by that faculty

wherein man is likest his Father a creative imagination God creates and embodies we create but it remains in thought only
But the creation is as bright strong clear enduring and real as if it were embodied Every one of us would make worlds
enough to crush us if we could embody as well as create Our ambition would outrun our wisdom **Far Futures** Gregory
