political changes that occurred in the 2000s such as the growing number of women talk show hosts changing attitudes about women in leadership roles in business more about minority women in media and women in sports and women sports announcers The author addresses the question of whether women are in fact no longer invisible in electronic media She provides an assessment of where progress for women in society as well as broadcasting can be seen and where progress appears totally stalled

Science on the Air Marcel Chotkowski LaFollette, 2009-08-01 Mr Wizard's World Bill Nye the Science Guy NPR's Science Friday These popular television and radio programs broadcast science into the homes of millions of viewers and listeners But these modern series owe much of their success to the pioneering efforts of early twentieth century science shows like Adventures in Science and Our Friend the Atom Science on the Air is the fascinating history of the evolution of popular science in the first decades of the broadcasting era Marcel Chotkowski LaFollette transports readers to the early days of radio when the new medium allowed innovative and optimistic scientists the opportunity to broadcast serious and dignified presentations over the airwaves But the exponential growth of listenership in the 1920s from thousands to millions and the networks recognition that each listener represented a potential consumer turned science on the radio into an opportunity to entertain not just educate Science on the Air chronicles the efforts of science popularizers from 1923 until the mid 1950s as they negotiated topic content and tone in order to gain precious time on the air Offering a new perspective on the collision between science's idealistic and elitist view of public communication and the unbending economics of broadcasting LaFollette rewrites the history of the public reception of science in the twentieth century and the role that scientists and their institutions have played in both encouraging and inhibiting popularization By looking at the broadcasting of the past Science on the Air raises issues of concern to all those who seek to cultivate a scientifically literate society today

Wilderness Forever Mark W. T. Harvey, 2009-11-23 Winner of the Forest History Society's 2006 Charles A Weyerhaeuser Book Award As a central figure in the American wilderness preservation movement in the mid twentieth century Howard Zahniser 1906-1964 was the person most responsible for the landmark Wilderness Act of 1964 While the rugged outdoorsmen of the early environmental movement such as John Muir and

Bob Marshall gave the cause a charismatic face Zahniser strove to bring conservation's concerns into the public eye and the preservationists' plans to fruition. In many fights to save besieged wild lands he pulled together fractious coalitions, built grassroots support networks, wooed skittish and truculent politicians, and generated streams of eloquent prose celebrating wilderness. Zahniser worked for the Bureau of Biological Survey, a precursor to the Fish and Wildlife Service, and the Department of the Interior; wrote for *Nature* magazine, and eventually managed the Wilderness Society and edited its magazine *Living Wilderness*. The culmination of his wilderness writing and political lobbying was the Wilderness Act of 1964. All of its drafts included his eloquent definition of wilderness, which still serves as a central tenet for the Wilderness Society: an area where the earth and its community of life are untrammelled by man, where man himself is a visitor who does not remain. The bill was finally signed into law shortly after his death. Pervading his tireless work was a deeply held belief in the healing powers of nature for a humanity ground down by the mechanized hustle and bustle of modern urban life. Zahniser grew up in a family of Methodist ministers, and although he moved away from any specific denomination, a spiritual outlook informed his thinking about wilderness. His love of nature was not so much a result of scientific curiosity as a sense of wonder at its beauty and majesty, and a wish to exist in harmony with all other living things. In this deeply researched and affectionate portrait, Mark Harvey brings to life this great leader of environmental activism.
