**Latin America, 1500-1989** William Gervase Clarence-Smith, Steven Topik, 2003-06-16 Coffee beans grown in Brazil Colombia Vietnam or one of the other hundred producing lands on five continents remain a palpable and long standing manifestation of globalization For five hundred years coffee has been grown in tropical countries for consumption in temperate regions This 2003 volume brings together scholars from nine countries who study coffee markets and societies over the last five centuries in fourteen countries on four continents and across the Indian and Pacific Oceans with a special emphasis on the nineteenth and early twentieth centuries The chapters analyse the creation and function of commodity labour and financial markets the role of race ethnicity gender and class in the formation of coffee societies the interaction between technology and ecology and the impact of colonial powers nationalist regimes and the forces of the world economy in the forging of economic development and political democracy *Fair Trade and a Global Commodity* Peter

Luetchford, 2007-11-20 Fair trade is widely regarded as a universal good This fascinating anthropological study takes a closer look at a coffee growing community and cooperatives in Costa Rica and subjects the fair trade movement to critical scrutiny As with conventional coffee Western demand for organic fair trade produce is largely met by more affluent individuals with larger landholdings As a result it is caught up in the conflicts of interest and resentments that are part of the coffee industry as a whole Ultimately fair trade fails to escape divisions that characterise other forms of production and consumption All growers are united in their criticism of the high margins accumulated by regional and transnational processors and exporters Sustainability just rewards and social cohesion have formed part of the world view of these agricultural communities for decades This book shows how there is much common ground between the worlds of the commodity grower and the priorities of the fair trade movement if not necessarily always in the ways we might suppose **The Companion to Development**

**Studies** Vandana Desai, Robert B. Potter, 2008 The Companion to Development Studies is an essential one stop reference for anyone with an interest in development studies Over 100 international experts have been brought together to present a comprehensive overview of the key theoretical and practical issues dominating contemporary development studies Building on the success of the first edition the second edition of the Companion has been thoroughly revised and updated and includes new chapters on a range of topics including ageing culture and development corruption and development and global

**Costa Rica** Meg Tyler Mitchell Ph.D., Scott Pentzer Ph.D., 2008-02-21 This work is a fascinating guide to one of Latin America's most stable and progressive nations examining the country's development unique features and the challenges Costa Ricans face in the 21st century Costa Rica A Global Studies Handbook offers readers an authoritative tour of a remarkable country tracing its historical development from pre-Colombian inhabitants and Spanish colonization through rising prosperity in the mid 19th century to current struggles to define itself economically and politically Costa Rica combines narrative chapters on the nation's history and the current state of its political social and cultural institutions with alphabetically organized entries covering important people places and events in its development Throughout the authors drawing on extensive research and their own experiences highlight the many ways Costa Rica is different from its neighbors as well as the challenges the country faces in the 21st century's globalized world **Economic Development,**

**Integration, and Morality in Asia and the Americas** Donald C. Wood, 2009-04-09 Explores economic development integration and morality in economic transactions in Asia and the Americas This title includes chapters that look at underground gambling behavior in China in light of that country's economic boom and retail store expansion and local socioeconomic effects in rural Mexico Fair Trade Coffee Gavin Fridell, 2007-01-01 Using case studies from Mexico and

Canada this book examines the fair trade coffee movement at both the global and local level assessing its effectiveness and locating it within political and development theory It provides an analysis of fair trade coffee in the context of global trade

**Costa Rica After Coffee** Lowell Gudmundson, 2021-10-20 Costa Rica After Coffee explores the political social and economic place occupied by the coffee industry in contemporary Costa Rican history In this follow up to the 1986 classic Costa Rica Before Coffee Lowell Gudmundson delves deeply into archival sources alongside the individual histories of key

coffee growing families to explore the development of the co op movement the rise of the gourmet coffee market and the societal transformations Costa Rica has undergone as a result of the coffee industry s powerful presence in the country While Costa Rican coffee farmers and co ops experienced a golden age in the 1970s and 1980s the emergence and expansion of a gourmet coffee market in the 1990s drastically reduced harvest volumes Meanwhile urbanization and improved education among the Costa Rican population threatened the continuance of family coffee farms because of the lack of both farmland and a successor generation of farmers As the last few decades have seen a rise in tourism and other industries within the country agricultural exports like coffee have ceased to occupy the same crucial space in the Costa Rican economy Gudmundson argues that the fulfillment of promises of reform from the co op era had the paradoxical effect of challenging the endurance of the coffee industry

*Cultural Logics and Global Economies* Edward F. Fischer, 2010-01-01 A Choice Outstanding Academic Book 2002 As ideas goods and people move with increasing ease and speed across national boundaries and geographic distances the economic changes and technological advances that enable this globalization are also paradoxically contributing to the balkanization of states ethnic groups and special interest movements Exploring how this process is playing out in Guatemala this book presents an innovative synthesis of the local and global factors that have led Guatemala s indigenous Maya peoples to assert and defend their cultural identity and distinctiveness within the dominant Hispanic society Drawing on recent theories from cognitive studies interpretive ethnography and political economy Edward F Fischer looks at individual Maya activists and local cultures as well as changing national and international power relations to understand how ethnic identities are constructed and expressed in the modern world At the global level he shows how structural shifts in international relations have opened new venues of ethnic expression for Guatemala s majority Maya population At the local level he examines the processes of identity construction in two Kaqchikel Maya towns Tecp n and Patz n and shows how divergent local norms result in different conceptions and expressions of Maya ness which nonetheless share certain fundamental similarities with the larger pan Maya project Tying these levels of analysis together Fischer argues that open ended Maya cultural logics condition the ways in which Maya individuals national leaders and rural masses alike creatively express their identity in a rapidly changing world

**The Saints of Progress** Carmen Kordick, 2019-01-29 A reshaping of traditional understandings of Costa Rica and its national identity *The Saints of Progress* A History of Coffee Migration and Costa Rican National Identity chronicles the development of the Tarraz Valley a historically remote although internationally celebrated coffee growing region Carmen Kordick s work traces the development of this region from the early nineteenth century to the first decades of the twenty first century to consider the nation building process from the margins while also questioning traditional scholarly works that have reproduced rather than deconstructed Costa Rica s exceptionalist national mythology which hail Costa Rica as Central America s white democratic nonviolent and egalitarian republic In this compelling political economic and lived history Kordick suggests that Costa Rica s exceptionalist and

egalitarian mythology emerged during the Cold War as revolution civil war military dictatorship and state violence plagued much of Central America From the vantage point of Costa Rica s premier coffee producing region she examines local national and transnational processes This deeply textured narrative details the inauguration of coffee capitalism which heightened existing class divisions a successful armed revolt against the national government which forged the current political regime and the onset of massive out migration to the United States Kordick s research incorporates more than one hundred oral histories and thousands of archival sources gathered in both Costa Rica and the United States to produce a human history of Costa Rica s past Her work on the recent past profiles the experiences of migrants in the United States mostly in New Jersey where many undocumented Costa Ricans find low paid work in the restaurant and landscaping sectors The result is a fine grained examination of Tarraz s development from the 1820s to the present that reshapes traditional understandings of Costa Rica and its national past

**Coffee and Community** Sarah Lyon,2011-05-18 We are told that simply by sipping our morning cup of organic fair trade coffee we are encouraging environmentally friendly agricultural methods community development fair prices and shortened commodity chains But what is the reality for producers intermediaries and consumers This ethnographic analysis of fair trade coffee analyzes the collective action and combined efforts of fair trade network participants to construct a new economic reality Focusing on La Voz Que Clama en el Desierto a cooperative in San Juan la Laguna Guatemala and its relationships with coffee roasters importers and certifiers in the United States Coffee and Community argues that while fair trade does benefit small coffee farming communities it is more flawed than advocates and scholars have acknowledged However through detailed ethnographic fieldwork with the farmers and by following the product fair trade can be understood and modified to be more equitable This book will be of interest to students and academics in anthropology ethnology Latin American studies and labor studies as well as economists social scientists policy makers fair trade advocates and anyone interested in globalization and the realities of fair trade

**The Good Life** Edward F. Fischer,2014-10-01 What could middle class German supermarket shoppers buying eggs and impoverished coffee farmers in Guatemala possibly have in common Both groups use the market in pursuit of the good life But what exactly is the good life How do we define wellbeing beyond material standards of living While we all may want to live the good life we differ widely on just what that entails In The Good Life Edward Fischer examines wellbeing in very different cultural contexts to uncover shared notions of the good life and how best to achieve it With fascinating on the ground narratives of Germans choices regarding the purchase of eggs and cars and Guatemalans trade in coffee and cocaine Fischer presents a richly layered understanding of how aspiration opportunity dignity and purpose comprise the good life

**The Prairie Agrarian Movement Revisited** Kenneth Murray Knuttila,2007

The formation of the Territorial Grain Growers Association in 1901 was not the only important event in the early history of what has come to be known broadly as the agrarian movement in the Canadian prairies but it was a defining moment in some respects. Arguably it signalled the formation of an agrarian class but at least it was an indicator of an awakening of a democratic consciousness among family farmers. Ultimately the Association provided a venue for analysis and critique the development of strategies and tactics and of course the nurturing of leadership and organizational forms that would have a profound influence upon politics and the state in the three prairie provinces and the Dominion as well as the creation of co-operatives and other forms of direct action. These eighteen essays honouring the 100th anniversary in 2001 of the formation of the TGGGA explore important aspects of the historical legacy of the agrarian movement and contemplate their relevance to the current setting for the rural prairies.

pub desc *The Economics of Ecology, Exchange, and Adaptation* Donald C. Wood, 2016-09-08 This book consists of three sections. The first concentrating on ecology further explores the theme of climate change. The second section focuses on exchange transactions and relations in a variety of situations and settings. Finally, papers in the third section share a concern with individual and group adaptations to certain conditions of life.

*Hidden Hands in the Market* Peter Luetchford, Geert De Neve, Jeffery Pratt, 2008-09-01 Engages with a range of alternative ethical perspectives and the initiatives to which they give rise. This book features case studies that covers a range of places, commodities and initiatives including Fair Trade and organic production, activism in Hungary, Fair Trade coffee in Costa Rica and handicrafts made in Indonesia.

**Costa Rica** Roger Dendinger, 2009 These information-packed volumes provide comprehensive overviews of each nation's people, geography, history, government, economy and culture.

**Rural Livelihoods, Regional Economies, and Processes of Change** Deborah Sick, 2014-01-10 For centuries, new technologies and expanding networks of production and consumption have been changing the face of rural economies in significant ways. Millions of rural dwellers have found survival increasingly difficult and have fled to urban centres. Others have remained, some retrenching, struggling to just subsist, others attempting to innovatively redefine their place within new rural economies. Over the past 30 years, rural economies have largely been ignored by policy makers, but recent growing concerns about food security, environmental degradation, climate change, continued rural poverty and high rates of out-migration have sparked renewed interest in rural regions. Covering a range of geographical and socio-cultural contexts, the case studies in this book draw on actor-oriented, in-depth field studies which provide detailed, locally focused perspectives on the nature of rural livelihoods today. The collection highlights the ways in which rural livelihoods are being redefined, the multiple ways in which rural dwellers draw on distinct social, cultural and environmental resources to formulate their livelihood strategies and the factors which facilitate or limit their abilities to do so. This volume will be of interest to development practitioners and policy makers and scholars working in rural development and economic anthropology.
