**Flying Ahead of the Airplane** Nawal K. Taneja, 2016-04-15 Airlines willing to develop insight from foresight relating to the expected step phase changes will eventually improve their margins However the backward looking airline managed using old strategic levers and short term metrics will cease to exist merge shrink become more dependent on government support or become irrelevant Management innovations are not going to deliver the required improvements innovation within management is essential for airlines survival In Flying Ahead of the Airplane Nawal Taneja analyzes global changes and thought provoking scenarios to help airline executives adjust and adapt to the chaotic world Drawing on his experience of

real airline situations worldwide the author concludes that there is a gulf between what executives are doing now and what they need to do to stay ahead of the curve To close this gap the author suggests that airline executives focus on just three relevant initiatives a aligning business and technology strategies b redesigning organization structures to centralize the role of the scheduling function and c developing relevant brands that integrate social networking technology To support this third initiative the book provides insights on branding from 20 fascinating non aviation case studies from around the world Flying Ahead of the Airplane will assist practitioners in airlines of every size to integrate future trends into their mainstream thinking and launch flexible business models to manage risk and compete effectively in the flattening world *Transforming Airlines* Nawal K. Taneja, 2020-03-19 This book provides a flight plan for riding the impending connectivity transformation curve It takes the perspective of actionability highlighting initiatives that executives in airlines and related businesses can use from the insights of multi industry executives The emphasis is on execution not on the concepts themselves There is a cluster of at least four distinct megatrends that may converge to form disruptive conditions 1 elevated expectations of existing and new customer segmentations those who expect available and accessible air mass transportation systems and those who expect connected services and seamless travel on different modes of transportation 2 new emerging technology incorporated in the air and ground vehicles that will create new opportunities for existing and new service providers to offer new value propositions 3 platforms developed around the ecosystem of customers and 4 the impact on travel that the fast changing demographic and economic characteristics of two major countries India and China These megatrends could lead existing or new businesses to create value propositions specifically dedicated to the new segments once each reaches a critical mass Drawing on the author's own experience in the airline industry and related businesses this book discusses the how relating to reimagining the business re entreprenuring the organization innovating through partnerships reengaging with customers and employees and rebranding the business in response to these trends This book is recommended reading for all senior level practitioners of airlines and related businesses worldwide **Airline Industry** Nawal K.

Taneja, 2016-06-23 Many business sectors have been and are being forced to compete with new competitors disrupters of some sort who have found new ways to create and deliver new value for customers often through the use of technology that is coupled with a new underlying production or business model and or a broad array of partners including in some cases customers themselves Think about the disruption created by Apple by the introduction of the iPod and iTunes and by Netflix within the entertainment sectors using partners within the ecosystem think of Uber that didn't build an app around the taxi business but rather built a mobility business around the app to improve customer experience Airline Industry considers whether the airline industry is poised for disruptive innovations from inside or outside of the industry Although airlines have a long history of continuous improvements and innovation few of their innovations can be classified as disruptive innovations The few disruptive innovations that did emerge were facilitated for example by new technology jet aircraft and government

policy deregulation Now there are new forces in play customers who expect to receive products that are more personalized and experience based throughout the entire journey new customer interfaces via social media advanced information systems and analytics financially powerful airlines based in emerging nations and the rise of unencumbered entrepreneurs who think differently as well as platform focused integrators Re-platforming the Airline Business Nawal K. Taneja,2019-01-10

Airline business models continue to be shaped by powerful forces relating to customers complexities and regulators However at the same time there are emerging technologies that can help airlines cater to the needs of their changing customer bases and manage the complexities of the business In his previous books Nawal Taneja has deliberated on these forces and how the airline industry is poised for disruptive change that could come from within or outside of the industry He also discussed the point that the airline planning systems and process in use are neither contemporary nor sufficiently integrated to meet the changing needs of customers who now are looking for outcomes not products In Re platforming the Airline Business To Meet Travelers Total Mobility Needs Taneja not only reiterates the need for transformation of the airline business but provides a map of the transformational process This book proposes that different sectors of the aviation industry particularly airlines and airports should consider using not just a wide array of technologies Artificial Intelligence biometrics blockchain and the Internet of Things but also specifically designed customer centric platforms to make informed decisions and to develop and implement transformative strategies to meet travelers total mobility needs These technologies and platforms can enable airlines and airports to achieve scale and scope as well as agility and flexibility through strategic partnerships to offer intelligently aggregated travel related services right now Subsequently they will enable various members in the travel chain to provide solutions to travelers global mobility requirements effectively and with better experiences 21st Century Airlines Nawal K. Taneja,2017-09-08

In 21st Century Airlines Connecting the Dots Nawal Taneja addresses the challenges and opportunities facing the airline industry as it tries to innovate and create products and services that are radically different by connecting the dots at four key levels recognizing the implications of global events improving cross functional collaboration within the organization working more closely with the travel chain and providing much higher engagements with connectors within the social networks The book synthesizes insights gained from the experience of non traditional businesses such as Uber that have no physical assets and that focus on scalability through platforms as well as traditional businesses such as Mercedes Benz that are transitioning from operators of physical assets to adapt to the on demand and sharing economies These insights show pragmatically that digitizing airline businesses would require digital mind sets digital technologies digital strategies and digital workplaces to explore new frontiers in value for both customers and airlines Moreover forward thinking airlines need to consider working with bimodal organizational structures in which one group optimizes current business models network fleet and schedule planning as well as revenue management while a second group explores innovative ways to add digital features to physical products to provide a consistent experience throughout the

journey The book is written for all senior level practitioners of airlines and related businesses worldwide as well as senior level government policymakers

**Looking Beyond the**

**Runway** Nawal K. Taneja, 2016-12-05 The global airline industry facing significant changes and discontinuity is prompted and forced to deal with a new normal Who would have imagined a few years ago that a significant percentage of consumers in the US now prefer to fly low cost airlines instead of full service airlines because they perceive the product to be better airlines would generate up to a third of their total income from non ticket revenue many low cost airlines would add complexity to their original simple business models through the development of code share agreements the use of global distribution systems and travel agents to distribute their seats Jetstar a low cost subsidiary of Qantas would grow faster and be more profitable than its parent a survey carried out by Ryanair would show that 42 percent of passengers would be willing to stand on short one hour flights if they could pay 50 percent less than seated passengers passengers could pay as little as US 2 000 for a transatlantic Business Class ticket on top brand airlines Lufthansa would have ownership in airlines based in Austria Belgium Italy Switzerland Turkey the UK and the US and that it would continue to pursue equity ownership in airlines based in Poland and Scandinavia or the Japanese and Canadian governments would struggle to find different ways to bail out their heretofore flag carriers To deal with this upcoming new normal airlines have to go beyond their short term circumstantial strategies they need strategic renewal of their ageing business model In this candidly written book Nawal Taneja explains what will separate the winners from the losers He maintains the leaders will be the airlines that 1 exploit this crisis driven change to their best advantage 2 learn to work around the airline inherent constraints that prevent them from

running their businesses just like other businesses 3 learn from successes and failures of other global enterprises 4 sharpen their business intelligence analytics and strategic agility and 5 proactively explore the pockets of growth in this emerging markets century To help airline executives become informed of new competitive games the author analyzes numerous business sectors such as auto hospitality retail technology and entertainment For example relevant lessons can be learned from the strategic mistakes made by the US automakers Likewise emergent and compelling insights can be gained in superior customer experience from Ritz Carlton and Zappos and in value creating innovation from Cirque du Soleil and Zipcar The book also features a multitude of forewords from airlines and related businesses to provide readers with multiple perspectives on the changing landscape in the global airline industry Nawal Taneja is a career analyst of the global airline industry with wide ranging experience in the aviation industry academia and public policy Encouraged by industry executives he has written five other books for practitioners in the global airline industry including FASTEN YOUR SEATBELT The Passenger is Flying the Plane and Flying Ahead of the Airplane Global Airlines James Patrick Hanlon,2007 Provides comprehensive insight into today s global airline industry now in its 3rd edition **Tourism Management** Stephen Page,2011 Previous editions had subtitle Manageing for change *Tourism Management* Stephen J. Almost everyone knows someone who has it. If you've ever mentioned to others that you aren't comfortable with air travel, you've probably already discovered just how common is the fear of flying. Fear of flying is a condition that merits proper attention and which we are increasingly in a better position to deal with, particularly thanks to clinical research. We now know that fear of flying is similar to other phobias and that it cannot be dismissed simply as fear of the unknown and that telling someone to pull yourself together just isn't likely to be an effective way to deal with the problem. Gaining your freedom to expand your enjoyment of life is the purpose of this book. The book covers a number of areas including valuable information about flying and everything to do with flying safely. **The Cultural Encyclopedia of Baseball, 2d ed.** Jonathan Fraser Light, 2016-03-25 More than any other sport, baseball has developed its own niche in America's culture and psyche. Some researchers spend years on detailed statistical analyses of minute parts of the game, while others wax poetic about its players and plays. Many trace the beginnings of the civil rights movement in part to the Major League's decision to integrate, and the words and phrases of the game, for example, pinch hitter and out in left field, have become common in our everyday language. From AARON HENRY onward, this book covers all of what might be called the cultural aspects of baseball, as opposed to the number-rich statistical information so widely available elsewhere. Biographical sketches of all Hall of Fame players, owners, executives, and umpires, as well as many of the sportswriters and broadcasters who have won the Spink and Frick awards, join entries for teams, owners, commissioners, and league presidents. Advertising agents, drafts, illegal substances, minor leagues, oldest players, perfect games, retired uniform numbers, superstitions, tripleheaders, and youngest players are among the thousands of entries herein. Most entries open with a topical quote and conclude with a brief bibliography of sources for further research. The whole work is exhaustively indexed and includes 119 photographs.
