Ecology And History The Greening Of The West Since 188:

A Political History of Western Europe Since 1945 Derek W. Urwin, 2014-07-22 Taking a thematic approach Derek Urwin addresses the major political and economic developments in western Europe since World War II right up to the present day The book covers issues and developments in national politics and the movement towards greater unity in Western Europe and the role of Europe in global politics and in the international economy The text has been revised throughout and updated to take account of the political consequences of the ending of the Cold War and the troubled progress of European integration since Maastricht The Fifth Edition has lost nothing of its predecessor's clarity and accessibility and in its updated form will win the book a host of new admirers

Nature Peter Coates, 1998 Beginning with Roman times Coates lifts the veil off nature and reveals the ideological and material factors that have influenced human perceptions of attitudes toward and uses of nature notably religion and ethics science technology economics gender and ethnicity

Annotated Bibliography for Aquatic Resource Management of the Upper Colorado River Ecosystem, 1980 The development of water and other natural resources in the Upper Colorado River Basin will continue to have an impact on the ecology of this unique ecosystem Numerous water development projects have been completed on the river others are in progress and still others are contemplated to provide water necessary for municipalities irrigated agriculture and energy production Although much information is already available on this river it is widely scattered in the published literature and unpublished reports of various state and federal agencies This annotated bibliography contains 1 109 published or readily available unpublished references that should be useful in decisions regarding effective management of the Upper Colorado River Basin Selected key words were assigned to all references and indexed for ease of locating references on particular subjects

Eden and the Fall - the Fallacies of Radical Ecological History, 1999 Radical ecology claims to be a new movement at the cutting edge of social change offering a solution to current social and ecological problems through the rejection of reformist ecological politics in favour of a radical restructuring of industrial and especially Western society The claim to have discovered the historical cause of current ecological and social problems plays a key role in validating this radical approach Although numerous interpretations of the historical origins of existing social and ecological problems exist within radical ecology three main variants have been identified This thesis critically examines the three main variants of radical ecological history the belief in primal harmony the belief in the civilisation of the goddess and its destruction by a Kurgan invasion and the view that the rise of capitalism and the mechanistic world view was responsible for the ecological and social crises of today In so doing it also examines a number of key questions central to radical ecological history when did violence and hierarchy begin in human history is it possible to argue that today's ecological crisis has a religious cause and can the scientific technological and commercial revolutions be truly described as purely Western phenomena The main findings of this thesis are that each of these variants of radical ecological history is chronically flawed In addition to numerous empirical errors each of these

historical interpretations is based on an extremely simplistic Eurocentric reading of the past based on the use of archetypal stereotypes of good and evil that have little or no historical foundation While these interpretations of history vary profoundly they are all based on the same underlying model of history whose origins lie in the Judeo Christian apocalyptic tradition and ultimately in Zoroastrianism While some of the flaws of radical ecological history are a result of poor scholarship it is argued that it is the use of t

Conservation of the Amphibia of the United States, a Review R. Bruce Bury,C. Kenneth Dodd,Gary M. Fellers,1980 **Summary of Biological Investigations Relating to Water Quality in the Western Lake Michigan Drainages, Wisconsin and Michigan** ,1996 Natural Methane Emissions in a Changing Arctic - Implications for Climate and Environment Karin Andreassen,Jochen Knies,Susanne Liebner,Andrew Jonathan Hodson ,Carolyn Ruppel,2024-11-06 Natural emissions of methane have received much attention over the last decade due to the documented increase of methane in the atmosphere and high global warming potential relative to CO2 Over the past few decades the Arctic has been warming approximately four times faster than the rest of the planet driving a pressing need to assess the current and future vulnerability of various natural methane sources In the Arctic vast amounts of methane is stored in soils and permafrost or is being generated as permafrost thaw continues Additionally there are large stores of methane in Arctic gas hydrates a solid form of concentrated methane and water and in numerous settings including deep water marine areas on continental shelves hosting relict subsea permafrost and gas hydrate in and beneath onshore permafrost and likely beneath the Greenland Ice Sheet Continued climate warming is making methane leakage more likely Even deeper conventional gas reservoirs could leak methane as the overlying permafrost degrades

Influences of geographic environment Ellen Churchill Semple,1911 *Green Scenarios: Mining Industry Responses to Environmental Challenges of the Anthropocene Epoch* Artur Dyczko,Andrzej Jagodziński,Gabriela Woźniak,2022-05-24 This book aims to present an alternative based on natural

processes and an environmental approach to post excavation site management e.g. post coal mining heaps. These sites are places where various mineral excavation by products are collected. Nevertheless, some post mineral excavation sites are oligotrophic terrestrial wetland and water habitat islands providing unique biodiversity enrichment in the landscape. These oligotrophic mineral habitats are essential in over fertilized eutrophic agricultural and urban industry surroundings. Some post mineral excavation sites are places where the wildlife can develop and support the functional processes of novel ecosystems. Implementing the newest biogeochemical and comprehensive knowledge into urban industry landscape management will help to establish the ecosystem's processes and environmental functioning. There are several post industrial sites in Europe where the wildlife areas developed due to natural processes are becoming wildlife hotspots in densely populated urban industry areas. In this respect, many of the oligotrophic mineral terrestrial wetland and water habitats of anthropogenic origin should not be categorized as environmentally dangerous and undergo economic utility focused reclamation. Facing the actual environmental constraints of the Anthropocene Epoch, the book's chapters presenting the natural basics and perquisites of the environmental ecosystem mosaics will be interesting for a broad range of environmentalists, scientists and students, miners, economists and sociologists.

Southern Green Criminology David Rodríguez Goyes, 2019-10-10. Southern Green Criminology focuses on the threat the western world poses to the rest of the globe and how Western imposed ideas of progress are damaging the planet, especially the southern hemisphere.

Ecology and Conservation of Amphibians Trevor Beebee, 1996-03-31. This volume sets out to provide an overview of recent research on all aspects of amphibian ecology and behaviour and to illustrate its application to practical conservation measures for this major group of animals. Its broad scope makes it of relevance to students of general biology, ecology and conservation but also to professionals in industries and agencies involved with environmental issues and nature conservation.

Landscape and Ecosystem Diversity, Dynamics and Management in the Yellow River Source Zone Gary John Brierley, Xilai Li, Carola Cullum, Jay Gao, 2016-05-23. This book offers a comprehensive review of the landscapes and ecosystems of the Upper Yellow River. It focuses on landscapes as a platform for considering environmental values and issues across the region. The book is based on extensive field based analyses, applications and photographs.

Down to Earth Theodore Steinberg, 2019. In this ambitious and provocative text, environmental historian Ted Steinberg offers a sweeping history of the United States, a history that places the environment at the very center of the narrative. Now in a new edition, *Down to Earth* reenvisioned the story of America from the ground up. It reveals how focusing on plants, animals, climate and other ecological factors can radically change the way that we think about the past. Examining such familiar topics as colonization, the industrial revolution, slavery, the Civil War and the emergence of consumer culture, Steinberg recounts how the natural world influenced the course of human history. From the colonists' attempts to impose order on the land to modern efforts to sell the wilderness as a

consumer good he reminds readers that many critical episodes in U S history were in fact environmental events The text highlights the ways in which Americans have attempted to reshape and control nature from Thomas Jefferson s surveying plan which divided the national landscape into a grid to the transformation of animals crops and even water into commodities

Nature Contested T. C. Smout, 2019-08-07 This work deals with four centuries of conflict over some of the most valued landscapes in Europe Based on a series of lectures given by the author at Oxford University in 1999 it combines social and cultural history with ecology and geography
