Carbon Accounting

and Savanna Fire Management Jeremy Russell-Smith, Brett Murphy, Andrew Edwards, CP (Mick) Meyer, 2015-06-15 In the context of Australia's developing carbon economy fire management helps to abate emissions of greenhouse gases and is an important means of generating carbon credits The vast high rainfall savannas of northern Australia are one of the world's most flammable landscapes Management of fires in this region has the potential to assist with meeting emissions reduction targets as well as conserving biodiversity and providing employment for Indigenous people in remote parts of Australia's north This comprehensive volume brings together recent research from northern Australian savannas to provide an internationally relevant case study for applying greenhouse gas accounting methodologies to the practice of fire management It provides scientific arguments for enlarging the area of fire prone land managed for emissions abatement The book also charts the progress towards development of a savanna fire bio sequestration methodology The future of integrated approaches to emissions abatement and bio sequestration is also discussed Confronting the Nation's Water Problems National Research Council, Division on Earth and Life Studies, Water Science and Technology Board, Committee on Assessment of Water Resources Research, 2004-10-14 In order to confront the increasingly severe water problems faced by all parts of the country the United States needs to make a new commitment to research on water resources A new mechanism is needed to coordinate water research currently fragmented among nearly 20 federal agencies Given the competition for water among farmers communities aquatic ecosystems and other users as well as emerging challenges such as climate change and the threat of waterborne diseases Confronting the Nation's Water Problems concludes that an additional 70 million in federal funding should go annually to water research Funding should go specifically to the areas of water demand and use water supply augmentation and other institutional research topics The book notes that overall federal funding for water research has been stagnant in real terms for the past 30 years and that the portion dedicated to research on water use and social science topics has declined considerably **Under Corporate Skies** MARTIN BRUECKNER AND. DYANN ROSS, Martin Brueckner, 2010-10-19 Under Corporate Skies is about what happens to communities when they stand in the way of corporate profits It is the story of a tiny town pitted against a strong corporate neighbour With the help of international campaigner Erin Brockovich the small town of Yarloop in Western Australia is preparing a civil class action against Alcoa World Al **Sustainable Land Sector Development in Northern Australia** Jeremy Russell-Smith, Glenn James, Howard Pedersen, Kamaljit K. Sangha, 2018-09-03 Key Features Provides clear and authoritative recommendations for managing fire in ecological and social contexts Authors are all international leaders in their fields and include not only academics but also leaders of Indigenous communities Explains Indigenous cultural and knowledge systems to a degree that has rarely been accessible to lay and academic readers outside specialized disciplines like Anthropology Responds to growing need for new approaches to managing human ecological systems that are in greater sympathy with Australia's natural environments climate and value the knowledge of Indigenous people Timely for scholarly and interest groups intervention as

the Australian government is again looking to develop the north Sustainable Land Sector Development in Northern Australia sets out a vision for developing North Australia based on a culturally appropriate and ecologically sustainable land sector economy This vision supports both Indigenous cultural responsibilities and aspirations as well as enhancing enterprise opportunities for society as a whole In the past well meaning if often misguided policy agendas have failed and continue to fail North Australians This book helps breach that gap by acknowledging and harnessing Indigenous cultural strengths and knowledge systems for looking after the country and its people as part of a smart novel and diversified ecosystem services economy

Nature Conservation in Islamic Tradition Mohd Zuhdi Marsuki, 2024-11-04 This book will discuss the practice of Islamic nature conservation by focusing on Harim and Hima The practice of Harim and Hima is a good model practised by Muslims tradition combining the theory and practice of environmental ethics Such practice should be a new focus in the study of Islamic environmental ethics beyond the theoretical discourse

Planning in an Uncanny World Nicholas A. Phelps, Judy Bush, Anna Hurlimann, 2022-12-23 This book places Australian conditions and urban planning centrally within comparative analysis of planning systems and cultures around the world to address issues including urban governance climate change transportation planning regional development and migration planning Australian urban conditions and their associated planning responses can and often have been seen as unique or exceptional They are seldom discussed in the same breath as conditions and associated planning systems internationally Yet as well as being somewhat different from those elsewhere in the world Australian urban conditions and planning responses are also somewhat similar They are uncanny strangely familiar yet unfamiliar In this book Australian urban conditions and their planning policies and practices are informally compared and contrasted with those existing internationally If Australian urban planning policy and practice have had limited influence internationally the partial familiarity of challenges posed by its urban conditions ensure that Australia is a more important global reference point for scholarship and practice than commonly is appreciated In this book the authors assert the potential and actual originality of urban planning scholarship arising from the Australian context It will be useful for students and faculty planners working in Australia as well as anyone interested in international planning debates

Environmental Law and the Ecosystem Approach Froukje Maria Platjouw, 2016-05-05 The ecosystem approach embodies a concept of the environment which emphasizes the integrated components of nature as complex adaptive systems This book examines the relationship between the architecture and design of environmental law and the implementation of the ecosystem approach as a means to maintain ecological integrity The main issue addressed is in which manner and to what extent does fragmentation and administrative discretion in environmental law impede the implementation of an ecosystem approach This is explored through analysis of several questions what is an ecosystem approach and how could it be implemented how can economic evaluation of ecosystem services contribute to the debate to what extent is environmental law fragmented and how does this affect the implementation of the ecosystem approach to what extent does environmental

law contain administrative discretion and how does this affect the implementation of the ecosystem approach is there a need for greater consistency coherence and a stronger rule of law in environmental law in light of the ecosystem approach The main focus is on Europe with additional international comparisons where appropriate The book concludes by providing a normative portrayal of future environmental law as protective systemic and predictable At Risk Piers Blaikie,Terry Cannon,Ian Davis,Ben Wisner,2014-01-21 The term natural disaster is often used to refer to natural events such as earthquakes hurricanes or floods However the phrase natural disaster suggests an uncritical acceptance of a deeply engrained ideological and cultural myth At Risk questions this myth and argues that extreme natural events are not disasters until a vulnerable group of people is exposed The updated new edition confronts a further ten years of ever more expensive and deadly disasters and discusses disaster not as an aberration but as a signal failure of mainstream development Two analytical models are provided as tools for understanding vulnerability One links remote and distant root causes to unsafe conditions in a progression of vulnerability The other uses the concepts of access and livelihood to understand why some households are more vulnerable than others Examining key natural events and incorporating strategies to create a safer world this revised edition is an important resource for those involved in the fields of environment and development studies

Protecting the Oceans Beyond National Jurisdiction Robin Warner,2009 Knowledge of the marine environment beyond national jurisdiction and its unique biodiversity is still developing Simultaneously traditional uses of these areas including fishing and shipping are intensifying and new uses are emerging such as bio prospecting for marine genetic resources and climate change mitigation activities This volume examines the threats to the marine environment beyond national jurisdiction from existing and emerging human uses and the adequacy of current international law provisions to protect this major part of the global environment An analysis of key provisions in the 1982 United Nations Law of the Sea Convention and complementary principles of international environmental law reveals significant tensions between the concept of high seas freedoms and the international law obligation to protect and preserve the marine environment beyond national jurisdiction The book compares the lack of comprehensive environmental regulation for marine resource exploitation and shipping activities beyond national jurisdiction with the best practice standards for environmental protection being developed by the International Seabed Authority for deep seabed mining exploration Recent initiatives by the international community to study issues relating to conservation of high seas biodiversity are discussed and a range of soft and hard law options to strengthen the international law framework for protection of the marine environment beyond national jurisdiction are considered *Ecology of a Managed Terrestrial Landscape* Ajith H. Perera,David L. Euler,Ian D. Thompson,2011-11-01 The growing popularity of the broad landscape scale approach to forest management represents a dramatic shift from the traditional stand based focus on timber production Ecology of a Managed Terrestrial Landscape responds to the increasing need of forest policy developers planners and managers for an integrated comprehensive perspective on ecological

landscapes The book examines the big picture of ecological patterns and processes through a case study of the vast managed forest region in Ontario The contributors synthesize current landscape ecological knowledge of this area and look at gaps and future research directions from several points of view spatial patterns ecological functions and processes natural disturbances and ecological responses to disturbance They also discuss the integration of landscape ecological knowledge into policies of forest management policies particularly with respect to Ontario's legislative goals of forest sustainability Ecology of a Managed Terrestrial Landscape is the first book to describe the landscape ecology of a continuously forested landscape in a comprehensive manner It is written for instructors and students in forest management wildlife ecology and landscape ecology and for forest managers planners and policy developers in North America *Ten Commitments* CSIRO Publishing, 2008 A book that is a must read for politicians policy makers practitioners and others with interests in Australia's environment Use of Property Rights in Fisheries Management Ross Shotton, 2000-01-01 The session was closed with papers that provided a prognosis on the future development of property rights in fisheries management Thus the conference papers addressed the theory and application of property Handbook of Research on Environmental Policies for Emergency Management and Public Safety Eneanya, Augustine Nduka, 2018-01-05 In a world of earthquakes tsunamis and hurricanes it is evident that emergency response plans are crucial to solve problems overcome challenges and restore and improve communities affected by such negative events Although the necessity for quick and efficient aid is understood researchers and professionals continue to strive for the best practices and methodologies to properly handle these significant events The Handbook of Research on Environmental Policies for Emergency Management and Public Safety is a pivotal reference source for the latest research findings on the examination of environmental policies and its interface with management and public safety from various country's perspectives its local impacts and global lessons Featuring extensive coverage on relevant areas such as public private partnership disaster management and natural resource management this publication is an ideal resource for academicians practitioners and researchers interested in understanding the effects of environmental policies on emergency management **Managing Scotland's Environment** Charles R. Warren, 2002 This book is illustrated with photographs and maps and diagrams It is designed for those studying Scotland's environment at undergraduate and graduate level and for those engaged in farming forestry conservation game sports and employment
