Developments and Prospects, October 2012 WORLD BANK,2012-10-27 The post revolutionary economies of MENA Egypt Tunisia Libya and Yemen have been recovering after a period of growth decelerations in 2011 In Egypt and Tunisia the growth dips of 2011 were less dramatic than the declines observed during previous transitions The recovery has been relatively quick but the transition process is far from complete and uncertainty about the political and reform process remains a binding constraint to private investment Consequently post transition growth is below potential and is lower than growth prior to the Arab Spring with negative consequences for employment and poverty Events in the post revolution economies have affected other countries in MENA Macroeconomic fundamentals weakened in most developing MENA countries in 2011 12 as growth slowed and governments responded to social pressures with expansionary fiscal policies The regional growth outlook for 2013 reflects weaker expected global economic activity especially in the EU and moderating oil prices Regional economic growth is expected to decelerate to 3.5% in 2013 from 5.5% in 2012 Prolonged political and policy

uncertainty and social unrest are serious downside risks to the outlook
