Uchendu, 2022-04-25 **Explaining the History of American Foreign Relations** Michael J. Hogan, Thomas G. Paterson, 2004-01-19 Originally published in 1991 Explaining the History of American Foreign Relations has become an indispensable volume not only for teachers and students in international history and political science but also for general readers seeking an introduction to American diplomatic history This collection of essays highlights a variety of newer innovative and stimulating conceptual approaches and analytical methods used to study the

history of American foreign relations including bureaucratic dependency and world systems theories corporatist and national security models psychology culture and ideology Along with substantially revised essays from the first edition this volume presents entirely new material on postcolonial theory borderlands history modernization theory gender race memory cultural transfer and critical theory The book seeks to define the study of American international history stimulate research in fresh directions and encourage cross disciplinary thinking especially between diplomatic history and other fields of American history in an increasingly transnational globalizing world

Africa in the Global Economy Gordon Moyo, 2024-03-22 This book discusses the role played by powerful global institutions such as the IMF the World Bank the World Trade Organisation multinational corporations and the international credit rating agencies in keeping Africa marginalised in the world economy The book focuses on the intrusive roles of these institutions as enablers and beneficiaries of capital outflows and financial subordination in Africa Diverging from the official narrative that touts China and the other emerging economies as global reformers that are poised to partner Africa in its fight against financial subjugation the book instead argues that like the Western powers the emerging economies are benefiting prodigiously from a rigged global financial system that keeps Africa as a net creditor to the rest of the world The book draws its theoretical framework from the repressed heterodox theories including dependency core periphery world systems and Marxist theories as well as the decolonial approach It concludes with a call for a decolonial African agency that should champion an epistemic rebellion against the neo liberal and neo classic economic traditions that have been historically deployed to justify Africa's subordinated position in the global economic governance This book comes at moment in time when Africa is ready to become a Rule Maker not a Rule Taker The analysis Dr Moyo presents having been in the front line of public policy and international negotiations demonstrate the need for Africa to re write the rules to foster our own Transformation Jason Rosario Braganza Executive Director African Forum and Network on Debt and Development AFRODAD

Third World Urbanization J. Abu-Lughod, R. Jr Hay, 2013-07-04 First published in 2006 Despite the growing significance of the Third World and the critical nature of its urbanization there are few synthetic books covering more than one region of the Third World which can be used either by scholars seeking an overview of the process of world urbanization or by students in the growing number of courses now being offered in the field of comparative urbanism The most distressing problem was that the field of urbanization particularly with reference to developing countries seemed to us to have stagnated at theoretically sterile conceptualizations or even worse had deteriorated into fragmented empirical descriptive reports whether observing with sympathy or noting with alarm the rapidly declining condition of individual cities This book attempts to rectify this deficiency **A Modern Guide to Uneven Economic Development** Erik S. Reinert, Ingrid H. Kvangraven, 2023-01-13

Economic Development and Environmental Sustainability Ramón López, Michael A. Toman, 2006-06-29 Economic growth as we know it today cannot persist indefinitely if it entails continuous degradation of natural resources and the environment While in a few countries around the world it appears that environmental degradation has been the result of rapid economic growth in the vast majority of the developing countries the environment has been equally spoiled despite slow or even negative economic growth This book provides new insights on the common roots of economic stagnation poverty and environmental degradation which unfortunately generally reside in misguided government policies and priorities By doing this the volume seeks to provide a broader policy option framework than those found in conventional policy analyses mainly dominated by the Washington Consensus It shows that a major omission of the conventional view is that governments tend to allocate government expenditures in a biased way favouring subsidies to the economic elites to the detriment of investments in public goods including human capital R D as well as the development of institutions environmental and otherwise which are vital for long run growth poverty reduction and environmental sustainability **Living**
