The Habsburgs Benjamin Curtis,2013-07-18 The Habsburgs rank among the most celebrated ruling dynasties in history At one point their territories stretched not only across Europe but across the globe into Asia Africa and the Americas By virtue of their long pre eminence the family made an indelible mark on European affairs shaping the course of international politics and diplomacy and knitting together the diverse peoples of Central Europe The story of the Habsburgs is theatrical and compelling but it is also vital for understanding how kings ruled nations rose and societies changed as modern Europe came into being In this book Benjamin Curtis explores both the Spanish and Austrian branches of the dynasty providing a concise comprehensive picture of the dynasty s development This study clearly demonstrates why the Habsburgs are considered the most consistently accomplished practitioners of European dynasticism **Themes in Modern European**

History 1780-1830 Pamela Pilbeam,2012-08-21 Themes in Modern European History 1780 1830 is an authoritative and lively exploration of a period dominated by events which have shaped modern Europe In a series of articles six leading academics present some controversial conclusions the east west contrast in Europe today has more to do with responses to the French Revolution of 1789 than the Russian Revolution of 1917 the conservative Europe of 1814 was the product of the Romantic imagination not a Restoration of the old regime Spanning political social economic and demographic facets of revolutions this is an indispensable textbook for all students of the nineteenth century and for all those interested in understanding the nature of Europe today *Austrian Reconstruction and the Collapse of Global Finance, 1921-1931*

Nathan Marcus,2018-04-30 Although some statesmen and historians have pinned Austria s and the world s interwar economic implosion on financial colonialism in this corrective history Nathan Marcus deemphasizes the negative role of external players and points to the greater impact of domestic malfeasance and predatory speculation on Austrian political and financial decline **A History of Czechoslovakia Between the Wars** Patrick Crowhurst,2015-06-22 Here Patrick Crowhurst identifies the crucial political problem that faced Czechoslovakia between 1918 and 1939 the rift between the Czechs and the Sudeten Germans that would open the way for the rise of Konrad Henlein s right wing Sudeten Deutsch party and which was exploited ruthlessly by Hitler during Nazi Germany s 1938 annexation of Czechoslovakia A History of Czechoslovakia Between the Wars deepens our understanding of a fragile Europe before World War II and is essential for

Building Civil Society and Democracy in New Europe Sven Eliaeson,2009-03-26

The European enlargement process culminating in 2004 was as a follow up to die Wende and the implosion of the Russian empire an event of the same magnitude as 1815 and 1919 Like 1918 19 it was an exit into history a momentous event in post Westphalian Europe Even if acceptance of ten new countries was premature it was appropriate to the moment history provided The presence of the New kids on the block meant both problems and prospects The end of the cold war meant the fall of the iron curtain but a mental remnant of the curtain remains in terms of attitudes regarding civility corruption and transparency and expectations for democratic politics Several of the new countries are late children of 1848 For them entering NATO was more important than joining the EU and also preceded EU membership Poland is bigger than the other 2004 countries together and has a heavy historical legacy It is as Germany used to be imprinted by its special path between East and West and fear of being encircled by enemies Although the Building of Civil Society and Democracy in countries in transformation can draw on experiences from the countries already within the EU there is no primrose path for EU integration It is moreover an irony that the new member states as a result of the expectations for post Communist politics build institutions of a kind that are no longer sufficiently efficient for old Europe The new countries became a full scale experiment in rule by experts now by neo liberals instead of Communists A common European public sphere and civil society might emerge but its form remains visible only at the horizon

Washington Conference on Holocaust-era Assets, November 30-December 3, 1998 J. D. Bindenagel, United States. Department of State, United States Holocaust Memorial Museum, 1999 *Business and Politics in Europe, 1900-1970* Terry Gourvish, 2003-08-28 This book reflects an increased interest in establishing connections between the political history and the business history of Europe in the twentieth century The book includes research on the interactions of politicians businessmen and their institutions in eight countries with particular focus on the highly charged inter war period Fourteen essays cover subjects under four main headings the business politics paradigm banking finance business and politics in the National Socialist period and the business community and the state Together they form a fitting tribute to the academic scholarship and inspiration offered by Alice Teichova In her distinguished career and in particular after the publication of her path breaking book *An Economic Background to Munich* in 1974 she did much to stimulate a collaborative approach to international comparative work in the field of economic political and business history The case studies presented here demonstrate her considerable legacy to the subject **Finance and Modernization** Gerald D. Feldman, 2016-12-05 *Finance and Modernization* centres on a set of historical developments and problems typified by the long history of the *sterreichische Creditanstalt* and its successor organizations and opens the way to compare and contrast experiences throughout Central and Western Europe and also on other continents The structure of this volume reflects the changing role and nature of banks as economies become industrialized and modernized Although banks adapt to the needs of an industrializing economy at the same time industrialization influences the manner in which banking systems grow and the structures which they adopt Beginning with studies of the Austrian banks their development and their crises the volume then moves on to look at case studies of important aspects of financial activity German stock markets railroad investment and information networks This is followed by a section on country studies of banking modernization in Sweden the Netherlands and Greece Finally the collection concludes with two chapters one on banking in China and the other on banking in India certainly both of intrinsic interest and of importance in an era of globalization Professor Teichova one of the great scholars in the field concludes with reflections on the individual contributions and the general problems addressed in this book

National Purpose in the World Economy Rawi Abdelal, 2018-08-06 How do national identities affect the world economy Building on the insight that nationalisms and national identities endow economic policy with social purpose Rawi Abdelal proposes a novel theoretical framework a distinctively Nationalist perspective on international political economy to answer this question Using this framework and drawing on field research in Lithuania Ukraine and Belarus he provides an in depth look at the link between national identity and the economic policies of the new states formed by the breakup of the Soviet Union All these states from the Baltic coast to central Asia were economically dependent on Russia during the 1990s However they reacted very differently to that dependence and their reactions can be traced Abdelal contends to their

individual societies Some such as Belarus found dependence inevitable and sought economic reintegration with Russia Others like Lithuania interpreted dependence as a large scale security threat and reoriented their economies away from Russia A third group typified by Ukraine demonstrated no coherent economic policy at all regarding dependence Abdelal distinguishes the Nationalist tradition in international political economy from the Realist tradition and shows that economic nationalism is different than mercantilism He demonstrates the ways that national identity affects economic policy and explains why some governments seek economic autonomy while others prefer regional reintegration He then applies his approach to other cases of economic reorganization after the end of empire eastern Europe in the 1920s after the Habsburgs 1950s Indonesia and French West Africa in the 1960s *Communism and Nationalism* Roman Szporluk, 1988-04-28 In this highly original study Roman Szporluk examines the relationship between the two dominant ideologies of the 19th century communism and nationalism and their enduring legacy in the 20th century Szporluk argues that both Karl Marx's theory of communism and Friedrich List's theory of nationalism arose in response to the sweeping changes brought about by the Industrial Revolution and that both sought to promote industrialization as a means of reforming the modern world Each ideology the author contends developed in relation to the other and can best be understood as the product of a complex interweaving of the two producing in the 20th century new forms of nationalism that have incorporated Marxism into the fabric of their movement and Marxist states that have adopted threads of nationalistic belief Casting the role of List and the intellectual development of Marx in an unorthodox light this book adds a new dimension to the debate over the boundaries of nationalism and socialism in the development of political ideologies **The Vienna Chamber of Commerce, 1848-1913** Dolores Elaine Berquist, 2001 **The Origins of National Financial Systems** Douglas J. Forsyth, Daniel Verdier, 2003-08-29 Since the nineteenth century there has been an accepted distinction between financial systems that separate commercial and investment banking and those that do not This comprehensive collection aims to establish how and why financial systems develop and how knowledge of financial differentiation in the nineteenth century may afford insight into the development of contemporary banking structure This book poses a systematic challenge to Alexander Gerschenkron's 1950s thesis on universal banks With contributions from leading scholars such as Ranald Michie and Jaime Reis this well written book provides solid and intriguing arguments throughout *Beyond Alterity* Qinna Shen, Martin Rosenstock, 2014-07-01 With the economic and political rise of East Asia in the second half of the twentieth century many Western countries have re-evaluated their links to their Eastern counterparts Thus in recent years Asian German Studies has emerged as a promising branch within interdisciplinary German Studies This collection of essays examines German language cultural production pertaining to modern China and Japan and explicitly challenges orientalist notions by proposing a conception of East and West not as opposites but as complementary elements of global culture thereby urging a move beyond national paradigms in cultural studies Essays focus on the mid century German Japanese alliance Chinese German Leftist

collaborations global capitalism travel identity and cultural hybridity The authors include historians and scholars of film and literature and employ a wide array of approaches from postcolonial globalization media and gender studies The collection sheds new light on a complex and ambivalent set of international relationships while also testifying to the potential of Asian German Studies
