Economic Diplomacy Embargo Leverage And World Politics:

Economic Diplomacy M. S. Daoudi, 2019-03-05 The 1983 collapse of world oil prices revived memories of a time only a decade earlier when the price of a barrel of oil did not exceed three dollars By the late 1970s spot market prices had reached peaks of forty dollars a barrel A major role in creating these new realities was played by the 1973 1974 Arab oil embargo which formed the psychological political and market conditions for the dramatic price surge This important study probes the embargo in detail thoroughly examining its history the motivations that caused it and its ripple effect on world politics and the international economic order The authors carefully examine the interruption of oil supplies to Western Europe during the 1956 Suez Canal crisis the growing momentum of Arab oil leverage beginning with the First Arab Petroleum Congress in 1959 the decline of the oil companies domination of the petroleum industry and the Arab political environment between the 1967 Arab defeat and the 1973 Arab oil embargo The book concludes with a chapter addressing the lessons to be learned from these recent embargoes

Chinese Economic Diplomacy Shuxiu Zhang, 2016-07-01 Economic diplomacy was declared in 2013 by Beijing as a priority in its comprehensive strategy for diplomacy The political elite undertook to further invest in economic diplomacy as an instrument for economic growth and development Globally Chinese cooperation in multilateral economic processes has become critical to achieving meaningful outcomes However little understanding exists in current literature on the factors and mechanisms which shape the processes behind China s economic diplomacy decision making Chinese Economic Diplomacy provides an understanding of the processes and practices of China s economic diplomacy with multilateral economic negotiations as the primary basis of analysis specifically the UN climate change talks and the WTO Doha Round trade negotiations It examines how early economic diplomacy in global governance contributed to the varied and evolving nature of its present day decision making structures and processes Demonstrating how China s negotiation preferences are driven by networks of political actors in formal and informal domestic and systemic environments it also highlights the capacity of international negotiation practices to alter and re shape China s approach to multilateral economic negotiations As a consequence the book presents a framework for understanding China s economic diplomacy decision making processes that is systemically constructed by domestic and international agencies Offering a Chinese perspective of the notion of economic diplomacy this book will be of interest to students and scholars of Chinese Economics International Relations and Political Economy

How Foreign Policy Decisions Are Made In The Third World Bahgat Korany, 2019-09-17 This textbook analyzes eight crucial foreign policy decisions of the 1970s and 1980s emphasizing how decision making is influenced by the social characteristics of Third World states and their position in the global system

Chapter 1 situates the Third World in the global system and traces the evolu **Theories and Practices of Compliance with WTO Law** Yen Kong Ngangjoh Hodu, 2012-08-01 Compliance with international institutional norms is often conceived as a yardstick with which to test the effectiveness of international law However the ongoing failure of the WTO regime to elicit

compliance with its agreements has led many legal theorists to reject this view in favour of a realism that describes an international system void of any authority to enforce rules in which egoistic states calculate their own interests in light of the existing distribution of power. An institutionalist riposte which insists on the capability of states to come together nonetheless to make binding rules that will determine their behaviour vis vis each other of necessity focuses on developing enforceable remedies when rules are not complied with. Confronting this stark and apparently intractable situation this book applies social science theories to the question as to why nation states comply or do not comply with international trade law obligations. The author examines various theories of compliance in the context of world trade law and discusses ways in which a much more robust compliance with global trade rules may be ensured. In the course of the analysis numerous germane issues arise including the following: the stalemate in the WTO judicial and political process; third party rights and WTO Law compliance; the role of arbitrators in determining reasonable period of time; contract theory; reputation costs; good faith obligations required by *pacta sunt servanda*; imposing remedies collectively; multilateral enforcement of DSB findings; and early determination of injuries once nullification and impairment have been established. The author's approach leads not only to a new understanding of the function of the WTO as a legal system but also to well grounded recommendations concerning remedies that address the issue of continuous breach of legal duties in the WTO. This is a timely and accessible analysis of an increasingly important aspect of the interface of international trade law and economics. It will undoubtedly lead to a deeper debate and accelerate the inevitability of effective practical action. Policymakers, practitioners and academics in different fields of social sciences will appreciate its forward looking perspective in identifying the issues that are now assuming centre stage in international economic law.

Bottleneck : Humanity's Impending Impasse William R. Catton Jr., 2009-05-06

Ecological roots of our troubled time are deeper than its economic manifestations. Anguished posterity will look back on this 21st century as the bottleneck century. Bottleneck: Humanity's Impending Impasse was written to show how and why three converging trends have put humankind in much deeper peril than is generally acknowledged. First, there are many more of us inhabiting this planet than it can sustain. Second, technological advances of recent centuries have made gigantic and prodigious our per capita resource appetites and our per capita environmental impacts. Third, even though as the symbol-using species we humans conceivably could do better at anticipating future circumstances and planning ahead, our evolutionary heritage together with unanticipated dysfunctions of modern division of labor have kept us too preoccupied with short term concerns. People today are dependent upon a fantastically intricate web of exchange relations, the market. Even when functioning normally and not in a collapsed condition as currently, this system of relations has a serious and pervasive dehumanizing effect not adequately discerned by economists nor sociologists. Recognition of and adequate adaptation to the deteriorating ecological context of human life has been impeded. Human societies even our own are almost certainly going to act in ways that will make an

inevitably difficult future unnecessarily worse Factors analyzed in this book have made people seriously averse to the kind and extent of cooperation our difficult future will require Together with the basic trio of disturbing trends humans having become so numerous so ravenous and so short sighted this has made the nature of today's human prospect far more dire than most policymakers dare admit It tempts even the wisest and most civic minded to seek or promote remedial policies that will worsen the real predicament

The Netherlands and the Oil Crisis Duco Hellema, 2025-10-01 The Netherlands played a remarkable role during the October War and the oil crisis of 1973 In secret the Dutch government sent a substantial amount of ammunition and spare parts to Israel The Dutch supported Israel also politically Within the EC they vetoed a more pro Arab policy The Arab oil producing countries punished The Netherlands by imposing an oil embargo The embargo against the Netherlands was intimidating The Netherlands was dependent on Arab oil The embargo seemed to threaten the Dutch position in the international oil sector The government introduced several measures to reduce oil consumption However within two months it became clear that oil continued to arrive in Rotterdam There was in fact no oil shortage in the Netherlands The Netherlands even profited from the oil crisis The energy situation in The Netherlands was much better than in other West European countries The Dutch therefore rejected French plans for a more interventionist energy policy Atlanticism and liberalism were the key words of the Dutch policy during the oil crisis This book is the result of intensive research in all relevant Dutch archives The authors had free access to all the files they wanted to see They also used resources from other countries involved Many politicians were interviewed The result is a surprising analysis of the oil crisis of 1973 and of the Dutch role in particular

The Political Economy of WTO Implementation and China's Approach to Litigation in the WTO Yenkong Ngangjoh-Hodu, Zhang Qi, 2016-01-29 Why and how do states obey international law This engaging book tackles this very question head on via its examination of the conflicting and conciliating processes of the Chinese approach to litigation and the Western approach to legal orientation in the field of the WTO dispute settlement mechanism The authors examine the normative framework of WTO rule implementation in a globalised international economic order They further explore the notion of the rule of law in China's Confucian system and how it interacts with a rule based world trading system Topics discussed include theorising the WTO implementation regime the Chinese approach to law China and the WTO dispute settlement system and Chinese Confucianism and compliance With its focus on international economic law and political science this book will be accessible to students policy makers practitioners and academics looking to understand China and the rule of law in a global context
