Exploring the Trade Potential of the DFTZ for Malaysian SMEs Tham Siew Yean, Andrew Kam Jia Yi, 2019-01-29 Malaysia

established the Digital Free Trade Zone DFTZ to facilitate the development of e commerce and the country s small and

medium enterprises SMEs exports The data revealed thus far indicates an increasing number of SMEs coming on board the

DFTZ e commerce platforms The publicly disclosed data focus on the value of exports achieved but do not show whether

these are from new or existing exporters or whether they are re exports They also do not highlight Malaysia s imports

through the zone The overall trend signals that Malaysia is losing its bilateral revealed comparative advantage in exports to

China as well as an increasing use of imports for exporting to China While the DFTZ facilitates both exports and imports

differing standards and customs processes in different export destinations including China will require Malaysian SMEs to

know and understand the standards and customs processes governing imports in each export destination involved Imports

are also encouraged by the de minimis rule which allows duty and tax free imports of up to RM800 into Malaysia Overall

imports can help enhance the competitiveness of Malaysian SMEs expand choices for Malaysian consumers as well as

facilitate re exports A clearer understanding of the role of DFTZ in facilitating trade will require more detailed data collection and a closer investigation of the imports going through the zone and their uses

World Development Report 2019 World Bank,2018-10-31 Work is constantly reshaped by technological progress New ways of production are adopted markets expand and societies evolve But some changes provoke more attention than others in part due to the vast uncertainty involved in making predictions about the future The 2019 World Development Report will study how the nature of work is changing as a result of advances in technology today Technological progress disrupts existing systems A new social contract is needed to smooth the transition and guard against rising inequality Significant investments in human capital throughout a person s lifecycle are vital to this effort If workers are to stay competitive against machines they need to train or retool existing skills A social protection system that includes a minimum basic level of protection for workers and citizens can complement new forms of employment Improved private sector policies to encourage startup activity and competition can help countries compete in the digital age Governments also need to ensure that firms pay their fair share of taxes in part to fund this new social contract The 2019 World Development Report presents an analysis of these issues based upon the available evidence

Reaping Digital Dividends Tim Kelly,Aleksandra Liaplina,Shawn W. Tan,Hernan Winkler,2017-04-14 From East to West the economies of Europe and Central Asia ECA are not taking full advantage of the internet to foster economic growth and job creation The residents of Central Asia and the South Caucasus pay some of the highest prices in the world for internet connections that are slow and unreliable In contrast Europe enjoys some of the world s fastest and affordable internet services However its firms and individuals are not fully exploiting the internet to achieve higher productivity growth as well as more and better jobs Reaping Digital Dividends investigates the barriers that are holding back the broader adoption of the internet in ECA The report identifies the main bottlenecks and provides policy recommendations tailored to economies at varying levels of digital development It concludes that policies to
