**Debt Games** Vinod K. Aggarwal, 1996-04-26 International debt rescheduling both in earlier epochs and our present one has been marked by a flurry of bargaining In this process significant variation has emerged over time and across cases in the extent to which debtors have undertaken economic adjustment banks or bondholders have written down debts and creditor governments and international organizations have intervened in negotiations Debt Games develops and applies a situational theory of bargaining to analyze the adjustment undertaken by debtors and the concessions provided by lenders in international debt rescheduling This approach has two components a focus on each actor's individual situation defined by its political and economic bargaining resources and a complementary focus on changes in their position The model proves successful in accounting for bargaining outcomes in eighty four percent of the sixty one cases which include all instances of Peruvian and Mexican debt rescheduling over the last one hundred and seventy years as well as Argentine and Brazilian rescheduling between 1982 and 1994

 Zapatista Rebellion **Financialisation in Latin America** Noemi Levy, Jorge Bustamante, 2018-12-07 Financial capital  
 continues to dominate Western economic organisations despite major financial and economic crises While these have not  
 affected Latin American countries in the same way other economic problems emerged after the reversion of loose monetary  
 policies that debilitated the export led growth model This book discusses the issue of the financialised globalisation model in  
 Latin America looking at the region's relationship with the international market This edited collection is divided into three  
 main sections The first section discusses regional trends highlighting issues of trade and payments in financialised economies  
 the impact on deindustrialisation its effect on inequality external capital movements and monetary policies The second  
 section analyses the failure of comparative advantages of the export led model in Colombia Argentina and Mexico Finally the  
 last section deals with the growth of financial balance sheets in small and developing economies such as Chile how growth  
 investment and big corporation evolution were affected in Brazil and Mexico and the effects of foreign exchange activity in  
 Mexico Through these discussions this book aims to deepen the understanding of the crisis of financialisation and the export  
 led model raising the question of whether it is possible for this model to continue or if it requires major readjustments to  
 unfold economic growth This book provides a distinctive analysis of the financialisation mechanisms in developing countries  
 in order to emphasise affinities and differences between the countries of the region in productive and financial terms It will  
 be of great interest to economic and social science scholars and students to journalists specialising on economic and  
 development issues and more importantly to policy makers **Globalization and Third-World Socialism** C. Brundenius, J.

 by Cuba and Vietnam to consider whether socialism in some form offers a viable development alternative **World**  
**Directory of Minorities** Bridget Anderson, James Chin, John Connell, Patrick Costello, Lindsey Crickmay, Chris  
 Dammers, James Ferguson, David Hawk, David McDowall, Anna Matveeva, Julia Maxted, Neil Melvin, Peter O'Neill, Suzanne  
 Pattle, Martyn Rady, Javaid Rehman, Alex Roslin, Nikhil Roy, David Sogge, Bogdan Szajkowski, Carl Wilson, Abebe

Zegeye,1997-01-01 This publication is the first version of the World Directory of Minorities and Indigenous Peoples published in 1997 The full Directory is now available and continually updated on our website The large majority of violent conflicts in the world today are conflicts within states with groups polarized across ethnic and religious divides and not across borders Ethnic religious and linguistic minorities are often among the poorest of the poor suffer discrimination and are frequently the victims of human rights abuses Time and time again in the past the United Nations system governments and even non governmental organizations NGOs working in the field of conflict prevention have failed to promote the human rights of minorities or to take early action to promote cooperation between communities Early action may have prevented the loss of millions of lives in many countries ranging from Rwanda to the former Yugoslavia and from Sri Lanka to Guatemala It is also significant that the Nobel Peace Prize was awarded to the Dalai Lama in 1989 and to Jose Ramos Horta and Bishop Carlos Belo in 1996 as a result of their peaceful campaigns to promote the rights of their people The situation of minorities is then a matter of major concern and it is essential that accurate objective and up to date information is made available This Directory contributes to that process It is difficult to assess accurately what proportion of the world s population identify themselves as belonging to minority communities Conservative estimates place this above 10 per cent and some suggest that more than 20 per cent of the world s population belongs to several thousand different minority groups and subgroups National statistics are often skewed for political reasons and there is no universally accepted definition of minorities The word has different interpretations in different societies throughout the world while the United Nations General Assembly has not sought to reach a definition beyond that implied in the title of the UN Declaration on the Rights of Persons belonging to National or Ethnic Religious and Linguistic Minorities adopted in December 1992 Minority Rights Group focuses its work on non dominant ethnic religious and linguistic communities whether or not they are numerical minorities The concept thus relates to any self identified community that is marginalized without power unable to take decisions over its destiny and often experiencing high levels of illiteracy under education and overt or covert discrimination The basic rights of such communities need protection and promotion There is however a danger of generalizing about minorities and forgetting the complexity of their social composition including the rural poor urban migrants older people women and children These groups may be considered as doubly vulnerable What makes their situation particularly problematic is that there is often a deliberate political policy on the part of majorities and states not to give due regard to the legitimate interests of minorities while members of minorities see their identity as central to their social and economic situation They are often excluded from political power and decision making in the development process without equal opportunities to secure a better quality of life One further danger may lie in regarding ethnicities as fixed rather than as the potentially fluid phenomena that they often are Situational ethnicity does occur and individuals and groups do modify their self identifications depending on circumstances Please note that the terminology in the fields of minority rights and indigenous peoples rights has changed

over time MRG strives to reflect these changes as well as respect the right to self identification on the part of minorities and indigenous peoples At the same time after over 50 years work we know that our archive is of considerable interest to activists and researchers Therefore we make available as much of our back catalogue as possible while being aware that the language used may not reflect current thinking on these issues
