The Concept of Equilibrium in Different Economic Traditions Bert Tieben, 2012-07-01 Bert Tieben is very well read in the history of economic thought and provides an overview of one of the basic concepts of economics that is unrivalled both in its scope and in its thoughtful and detailed discussion of the various currents and schools It goes right to the heart of economic theory and asks some pertinent questions about the limits and the future of economic theorizing That is I think what sets it apart from many other studies in the history of economic thought it is history with an eye to the future and it does all this without making any demands on the mathematical skills of the reader This book should therefore appeal to everybody who is interested in the methodology of economics and in exploring the

boundaries of economic analysis Hans Visser VU University Amsterdam The Netherlands This book deals with one of the most puzzling concepts in economic science that of economic equilibrium In modern economics equilibrium is considered a key assumption but its role is contested by economists both from within the mainstream and from rival schools of thought What explains the contradictory assessments of the equilibrium concept in economics Do economists belonging to different traditions disagree about the definition of equilibrium or do they adopt different rules for assessing scientific status In this unique and exhaustive study Bert Tieben answers these questions by investigating the history of equilibrium economics from 1700 to the present day He concludes that ideology strongly coloured the development of this branch of theory helping to explain the vehemence of the debates surrounding the concept He also argues that scientific progress in economics may indeed be fostered by such opposition and contention and calls for cross fertilization and stronger cooperation between the different schools of thought This resourceful book will appeal to post graduate students and scholars in the history of economic thought and economic methodology Both neoclassical and heterodox economists most notably Austrian post Keynesian and institutional economists will also find much to interest them

Economic Reason and Political Reason

Jean Mercier Ythier, 2022-12-01 The public space of democracies is constructed in a context that is marked by the digital transformation of the economy and society This construction is carried out primarily through deliberation Deliberation informs and guides both individual and collective action To shed light on the concept of deliberation it is important to consider the rationality of choice but what type of rationality is this References to economic reason are at once widespread crucial and controversial This book therefore deals with arguments used by individuals based on the notions of preferential choice and rational behavior and also criticizes them These arguments are examined in the context of the major themes of public debate that help to construct the contemporary public space populism social insurance social responsibility and environmental issues Economic Reason and Political Reason underlines the importance of the pragmatist shift of the 2000s and revisits through the lens of this new approach the great utilitarian and Rawlsian normative constructs that dominated normative political economics at the end of the 20th century Alternative approaches based on the concept of deliberative democracy are proposed and discussed

Causes and Consequences of Democratization

Anastassia V. Obydenkova, Alexander Libman, 2015-05-22 In recent decades the regions of Russia have taken different paths of regime transition Despite the consolidation of an autocratic regime at national level and the centralization steered by Vladimir Putin's government the variation across sub national regimes persists Using an innovative theoretical framework this book explores both causes and consequences of democratization in the regions of Russia It is the first study in the field to systematically integrate structural and agency approaches in order to account for economic social historical and international causes of democratization and to trace its consequences By focusing on the challenging and under studied topic of sub national regimes the book provides a unique perspective on regime transition and the new theoretical framework

contributes to a better understanding of democratization world wide The book will be of key interest to scholars and students of democratization sub national regimes East European politics comparative politics post communism and international relations

Theoretical and Practical Reason in Economics Ricardo F. Crespo,2012-09-25 The aim of the book is to argue for the restoration of theoretical and practical reason to economics It presents Nancy Cartwright and Amartya Sen s ideas as cases of this restoration and sees Aristotle as an influence on their thought It looks at how we can use these ideas to develop a valuable understanding of practical reason for solving concrete problems in science and society Cartwright s capacities are real causes of events Sen s capabilities are the human person s freedoms or possibilities They relate these concepts to Aristotelian concepts This suggests that these concepts can be combined Sen s capabilities are Cartwright s capacities in the human realm capabilities are real causes of events in economic life Institutions allow us to deliberate on and guide our decisions about capabilities through the use of practical reason Institutions thus embody practical reason and infuse certain predictability into economic action The book presents a case study the UNDP s HDI

The Economic World View Maki,2001-07-23 The beliefs of economists are not solely determined by empirical evidence in direct relation to the theories and models they hold Economists hold ontological presuppositions fundamental ideas about the nature of being which direct their thinking about economic behaviour In this volume leading philosophers and economists examine these hidden presuppositions searching for a world view of economics What properties are attributed to human individuals in economic theories and which are excluded Does economic man exist Do markets have an essence Do macroeconomic aggregates exist Is the economy a mechanism the functioning of which is governed by a limited set of distinct causes What are the methodological implications of different ontological starting points This collection which establishes economic ontology as a coordinated field of study will be of great value to economists and philosophers of social sciences

The Good and the Economical Peter Koslowski,Yuichi Shionoya,2012-12-06 Economics makes the incommensurable commensurable by money prices On the other hand there are varieties of goodness like the ethical that seem not to fit into the scale of prices of economics but cannot be neglected in economizing Ways of integrating ethics into economics must therefore be found The aim of this book is the integration of the ethical discourse into the economic discourse about the economical and efficient It investigates into the structure of goodness The contribution of this volume to the current debate in economic ethics and business ethics lies in its analysis of the different meanings of the good and in its reflection on the possibilities of implementing ethical goods into the practice of the economist and the manager of the firm Its essays investigate the role of ethics in social and individual choice They examine and compare the

cultural determinants of the Western and the Japanese economies their ethical and cultural foundations They look into the principles of good management How can the management incorporate human goods and consider the virtues of impartiality and of due consideration to the particular in its business practice The book develops the idea of an ethical economizing in economics and of an ethical managing in business administration The business of business is ethical business **The Use of Economic Measures in National Biodiversity Strategies and Action Plans** Lucy Emerton,2001 Economic forces underlie and explain much biodiversity degradation and loss and economic instruments provide a useful set of tools for strengthening biodiversity conservation sustainable use and equitable benefit sharing If National Biodiversity Strategies and Action Plans are to be effective they must be justifiable in economic terms This document reports on a project reviewing the use of economic measures in NBSAPs It brings together the component activities of the economics review and summarizes and synthesizes this information to provide guidance on experiences lessons learned and ways forward in the use of economic measures **The Failure of the "New Economics"** Henry Hazlitt,1959 *The Other Canon of Economics, Volume 1* Erik Reinert,2024-02-13 Other Canon Economics Essays in the Theory and History of Uneven Economic Development brings together key essays on development economics from one of the most prolific and important development economists and historians of economic policy today Erik S Reinert argues through essays ranging from 1994 to 2020 that neo classical economics damages developing countries the theory of comparative advantage leaves out a number of factors which make economic activities qualitatively different as carriers of economic growth Based on a long intellectual tradition started by the Italian economists Giovanni Botero 1589 and Antonio Serra 1613 and later used in virtually all presently industrialised countries Reinert shows that the country which exports increasing returns goods e g high end manufacture has advantages over the country which exports diminishing returns goods e g commodities This has important implications for today s development strategies that Reinert argues should be seen as industrial strategies **William Stanley Jevons and the Cutting Edge of Economics** Bert Mosselmans,2013-03-07 The impressive young scholar Bert Mosselmans analyzing the theory and policy of Jevons a major figure in the field of the history of economics has put together a volume with broad international appeal particularly in Europe North America and Japan that offers a synthetic approach to Jevons economic theory applied economics and economic policy Adopting a relativist approach to his subject Mosselmans focuses on all aspects of Jevons theory tying the different strands together where appropriate and discriminating where necessary Examining the relation between theory and practise he situates Jevons within the history of economic thought and in relation to his logic ethics religion and aesthetics Ideal for scholars working in the fields of philosophy and history as well as economics this ambitious and insightful work offers a comprehensive analysis of one of the founding fathers of modern economic thought whose work marked a new chapter in its history bridging the gap between classical and neo classical economics *Kingsley Davis* David M. Heer,2017-12-02 Kingsley Davis 1908 1997 was one of the pioneers in social

demography and was particularly identified with the theory of the demographic transition. This holds that the process of industrialization first causes mortality to decline leading to a substantial rate of population growth and only later causes fertility to fall leading eventually to the cessation of population growth. Kingsley Davis is especially remembered for his arresting and forceful critique of family planning programs intended to achieve zero population growth. Before he devoted his major attention to social demography, Davis had distinguished himself through influential articles on the structure of family and kinship including the topics of jealousy and sexual property, the sociology of prostitution and illegitimacy. He had an early interest in structural functional analysis which resulted in his famous and controversial article on stratification co-authored with Wilbert Moore and his equally famous presidential address to the American Sociological Association in 1959. David Heer's biography of Kingsley Davis is based on material contained in the Kingsley Davis Archive at the Hoover Institution Library at Stanford University, the Kingsley Davis graduate file at Harvard University, the interview of Kingsley Davis by Jean van der Tak in *Demographic Destinies* 1990 and David Heer's personal relationship with Kingsley Davis. The book also contains thirty of the most important writings by Kingsley Davis. These were chosen in part for the number of citations received in the Cumulative Social Science Citation Index and in part to ensure that readers would be able to assess the continuity of Kingsley Davis's ideas at all stages of his career.
