Economic Development In Africa:

African Economic Development Christopher Cramer, John Sender, Arkebe Oqubay, 2020-06-10 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Unevenness and inequalities form a central fact of African economic experiences. This book challenges conventional wisdoms about economic performance and possible policies for economic development in African countries using the striking variation in economic performance as a starting point. African Economic Development: Evidence, Theory and Policy highlights not only difference between countries but also variation within countries. It focuses on issues relating to gender, class and ethnic identity such as neonatal mortality, school dropout and horticultural and agribusiness exports. Variations in these areas point to opportunities for changing performance, reducing inequalities, learning from other policy experiences and escaping the ties of structure and the legacies of a colonial past. African Economic Development rejects teleological illusions and Eurocentric prejudice, criticizing a range of orthodox and heterodox economists for their cavalier attitude to evidence. Instead, it shows that seeing the contradictions of capitalism for what they are fundamental and enduring may help policy officials protect themselves against the misleading idea that development can be expected to be a smooth linear process or that it would be if certain impediments were removed. Drawing on decades of research and policy experience, this book combines careful use of available evidence from a range of African countries with economic insights to make the policy case for specific types of public sector investment.

Economic Integration and Development in Africa Henry Kyambalesa, Mathurin C. Hounnikpo, 2016-04-29 The debates over what African economic integration and development actually entails continue across international economic organizations, national governments and NGOs. Despite the glare of media attention and the position this issue has on international political agendas, few comprehensive accounts exist that fully examine why this process will be inevitable in the 21st century and how integration of national economies can be attuned to attaining the socio-economic goals and aspirations of member countries. This book addresses this problem. It combines theory with application, enumerating the imperatives and initiatives governments will be forced to confront, providing insights for educators and students in African development, for policy makers in African governments and for inter-governmental organizations.
