Economic Systems In World History:

Economic Systems in World History Stephan Viljoen, 1974 **World History** Jean Caldwell, James Clark, Walter Herscher, 1996 With lessons combining economics and world history students discover how people and nations developed as a result of making decisions based on maximizing local resources **The Anthropology of Complex Economic Systems** Niccolo Leo Caldararo, 2013-11-14 Today we live in what Ulrich Beck has aptly characterized as a risk society shaped by intensifying crises outside of our control and seemingly outside of our comprehension The master narrative that was supposed to lead us to secular salvation economics has proved to be a large part of the problem rather than the much anticipated solution In *The Anthropology of Complex Economic Systems* Niccolo Caldararo offers a much more radical and challenging answer that the fundamental assumptions on which the modern science of economics has been erected are false and that it is through the medium of anthropology particularly the relatively neglected field of economic anthropology that an alternative and sound basis for both the understanding of economic behavior and for the shaping of economic futures can be constructed Caldararo not only challenges the foundational assumptions of conventional economic theory but situates economic behavior something quite different and universal amongst human beings in both a historical and an ecological context Contemporary discussions of sustainability especially in the field of development studies have oddly neglected to look to anthropology Economic anthropology is the repository of a vast store of wisdom both about actual alternative and workable economic systems and about their evolution By drawing on this source Caldararo builds a model of the evolution of human economies which stir up substantial debate shows how economic anthropology provides a tool for the interrogation of economic theory and ties economics to ecology It has been the rupture of this fundamental relationship that lies at the basis of much of our present crisis and the unsustainable economic patterns that humans have created By bringing together in a new configuration economic anthropology ecology and culture history Caldararo not only proposes a new model of human social evolution but equally importantly creates a methodology for speaking to and against our present economic and environmental situation **World History: The Basics** Peter N.
