Henry VIII's Military Revolution James Raymond, 2007-06-29 The reign of Henry VIII saw a renascent militarism encapture England Memories of great victories over the French remained fresh and resplendent in the psyche and pageantry of early Tudor England and the pursuit of glory on the battlefield and of due recognition of England as a major player in European power politics were the identifying features of Henry's reign In an exciting new work James Raymond traces the development of Henry's military establishment within the context of the wider European military revolution Making use of extensive new research into the military literature of the mid Tudor period Henry VIII's Military Revolution is able to root firmly the military theories of the time within the solid realities of Henry's army Raymond pays particular attention to the rise of professionalism in the English military and its adaptation to new technologies and ideas In this vein the career of Sir Christopher Morris Henry's first professional artilleryman is explored for the first time casting light on the experience of day to day life in the English army of mid Tudor England and challenging the established view on the development of artillery both in England and in Europe Henry VIII's Military Revolution develops and expands the argument that the English Army was up to date with its European contemporaries and moves the English experience away from the periphery towards the centre of the debate on the European military revolution The militarism of Henry VIII's England is seen through new eyes in this fascinating new work

An Apprenticeship in Arms Roger B. Manning, 2006-05-25 Based upon a wide range of historical and literary sources An Apprenticeship in Arms is a scholarly study of the military experiences of peers and gentlemen from the British Isles who volunteered to fight in the religious and dynastic wars of mainland Europe as well as the ordinary men who were impressed to serve in the ranks from the time of the English intervention in the Dutch war of independence in 1585 to the death of the soldier king William III in 1702 This apprenticeship in arms exposed these men to the technological innovations of the military revolution laid the foundations for a fledgling professional officer class based upon merit and established a fund of military expertise This remilitarization of aristocratic culture and society was completed by 1640 and provided numerous experienced military officers for the various armies of the civil wars and subsequently for the embryonic British army after William III invaded and conquered the British Isles and committed the Three Kingdoms to the armed struggle against Louis XIV during the Nine Years War Conflicts between amateur aristocrats and so called soldiers of fortune led to continuing debates about the relative merits of standing armies and a select militia the individual pursuit of honour and glory by such amateurs also obscured the more rational military and political objectives of the modern state subverted military discipline and delayed the process of the

professionalization of the officer corps of the British army
