Elliptic Functions With Complex Arguments:

Elliptic Functions for Complex Arguments Henry E. Fettis, James C. Caslin, 1967 The Jacobian elliptic functions $\operatorname{sn} w$, $\operatorname{cn} w$, $\operatorname{dn} w$ are tabulated to five decimals in the complex w in the u iv plane as functions of the nome q 0.05 0.05 4 for u 0 1 1 and v 0 1 1 where $q = e^{-\pi K/K'}$ and K and K' are complete elliptic integrals with moduli k and k' square root of $1 - k^2$ respectively

The Quarterly Journal of Pure and Applied Mathematics, 1887

Handbook of Complex Analysis Reiner Kuhnau, 2004-12-09 Geometric Function Theory is that part of Complex Analysis which covers the theory of conformal and quasiconformal mappings Beginning with the classical Riemann mapping theorem there is a lot of existence theorems for canonical conformal mappings On the other side there is an extensive theory of qualitative properties of conformal and quasiconformal mappings concerning mainly a priori estimates so called distortion theorems including the Bieberbach conjecture with the proof of the Branges Here a starting point was the classical Schwarz lemma and then Koebe's distortion theorem There are several connections to mathematical physics because of the relations to potential theory in the plane The Handbook of Geometric Function Theory contains also an article about constructive methods and further a Bibliography including applications eg to electrostatic problems heat conduction potential flows in the plane A collection of independent survey articles in the field of Geometric Function Theory Existence theorems and qualitative properties of conformal and quasiconformal mappings A bibliography including many hints to applications in electrostatics heat conduction potential flows in the plane

Broadband Matching: Theory And Implementations

(3rd Edition) Wai-kai Chen, 2015-10-13 The third edition presents a unified up to date and detailed account of broadband matching theory and its applications to the design of broadband matching networks and amplifiers A special feature is the addition of results that are of direct practical value They are design curves tables and explicit formulas for designing networks having Butterworth Chebyshev or elliptic Bessel or maximally flat group delay response These results are extremely useful as the design procedures can be reduced to simple arithmetic Two case studies towards the end of the book are intended to demonstrate the applications to the practical design of modern filter circuits

Dielectric Relaxation And Dynamics Of Polar Molecules Myron W Evans, Vladimir I Gaiduk, 1999-04-29 The topics covered in this book provide a qualitative and sometimes quantitative classic description of the wide band 0 THz dielectric spectra of polar liquids molecular libration rotation which is the reason for dielectric loss and absorption of electromagnetic waves simple molecular models differing by the intermolecular potential profiles and present a comparison between the theoretical and experimental dependencies and derivation of the main results A new feature is the application of a number of analytical models to different substances including strongly absorbing nonassociating liquids liquid water water bound by macromolecules and gas like liquids The presentation of the theory in this book is also new It is based on the dynamic method in which the Brownian reorientations are considered implicitly without direct solution of stochastic equations This approach simplifies the theory Senior students and experimentalists will find many of the results valuable

Number Theory W.A. Coppel, 2009-10-03

Number Theory is more than a comprehensive treatment of the subject It is an introduction to topics in higher level mathematics and unique in its scope topics from analysis modern algebra and discrete mathematics are all included The book is divided into two parts Part A covers key concepts of number theory and could serve as a first course on the subject Part B delves into more advanced topics and an exploration of related mathematics Part B contains for example complete proofs of the Hasse Minkowski theorem and the prime number theorem as well as self contained accounts of the character theory of finite groups and the theory of elliptic functions The prerequisites for this self contained text are elements from linear algebra Valuable references for the reader are collected at the end of each chapter It is suitable as an introduction to higher level mathematics for undergraduates or for self study
