*The Art of Mechanical Reproduction* Tamara Trodd, 2015-09-25 The Art of Mechanical Reproduction presents a striking new approach to how traditional art mediums painting sculpture and drawing changed in the twentieth century in response to photography film and other technologies Countering the modernist view that the medium provides advanced art with resistance against technological pressures Tamara Trodd argues that we should view art and its practices as imaginatively responding to the potential that artists glimpsed in mechanical reproduction putting art into dialogue with the commercial cultures of its time The Art of Mechanical Reproduction weaves a rich history of the experimental networks in which artists as diverse as Paul Klee Hans Bellmer Ellsworth Kelly Robert Rauschenberg Gerhard Richter Chris Marker and Tacita Dean have worked and it shows for the first time how extensively technological innovations of the moment have affected their work Original and broad ranging The Art of Mechanical Reproduction challenges some of the most respected and entrenched criticism of the past several decades and allows us to think about these artists anew

**Aesthetic Theory, Abstract Art, and Lawrence Carroll** David Carrier, 2018-09-06 Boldly developing the central traditions of American modernist abstraction Lawrence Carroll's paintings engage with a fundamental issue of aesthetic theory the nature of the medium of painting in highly original frequently extraordinarily successful ways Aesthetic Theory Abstract Art and Lawrence Carroll explains how he understands the medium of painting shows what his art says about the identity of painting as an art discusses the place of his paintings in the development of abstraction and finally offers an interpretation of his art The first monograph devoted to him this philosophical commentary employs the resources of analytic aesthetics Art historians trace the development of art explaining how what came earlier yields to what comes later Taking for granted that the artifacts they describe are artworks

art historians place them within the history of art Philosophical art writers define art explain why it has a history and identify its meaning Pursuing that goal Aesthetic Theory Abstract Art and Lawrence Carroll roams freely across art history focused at some points on the story of old master painting and sometimes on the history of modernism but looking also to contemporary art in order to provide the fullest possible philosophical perspective on Carroll's work Memory Work Miguel de Baca, 2015-12-08 Memory Work demonstrates the evolution of the pioneering minimalist sculptor Anne Truitt analyzing the key theme of memory in her practice In addition to the artist's own popular published writings which detail the unique challenges facing female artists Memory Work draws on unpublished manuscripts private recordings and never before seen working drawings to validate Truitt's original ideas about the link between perception and mnemonic reference in contemporary art Provided by publisher **Feedback** David Joselit, 2010-02-26 In a world where politics is conducted through images the tools of art history can be used to challenge the privatized antidemocratic sphere of American television American television embodies a paradox it is a privately owned and operated public communications network that most citizens are unable to participate in except as passive spectators Television creates an image of community while preventing the formation of actual social ties because behind its simulated exchange of opinions lies a highly centralized corporate structure that is profoundly antidemocratic In Feedback David Joselit describes the privatized public sphere of television and recounts the tactics developed by artists and media activists in the 1960s and 1970s to break open its closed circuit The figures whose work Joselit examines among them Nam June Paik Dan Graham Joan Jonas Abbie Hoffman Andy Warhol and Melvin Van Peebles staged political interventions within television's closed circuit Joselit identifies three kinds of image events feedback which can be both disabling noise and rational response as when Abbie Hoffman hijacked television time for the Yippies with flamboyant stunts directed to the media the image virus which proliferates parasitically invading transforming and even blocking systems as in Nam June Paik's synthesized videotapes and installations and the avatar a quasi-fictional form of identity available to anyone which can function as a political actor as in Melvin Van Peebles's invention of Sweet Sweetback an African American hero who appealed to a broad audience and influenced styles of Black Power activism These strategies writes Joselit remain valuable today in a world where the overlapping information circuits of television and the Internet offer different opportunities for democratic participation In Feedback Joselit analyzes such midcentury image events using the procedures and categories of art history The trope of figure ground reversal for instance is used to assess acts of representation in a variety of media including the medium of politics In a televisual world Joselit argues where democracy is conducted through images art history has the capacity to become a political science
