**Europe's Languages on England's Stages, 1590-1620** Marianne Montgomery,2016-04-22 Though representations of alien languages on the early modern stage have usually been read as mocking xenophobic or at the very least extremely anxious listening closely to these languages in the drama of Shakespeare and his contemporaries Marianne Montgomery discerns a more complex reality She argues instead that the drama of the early modern period holds up linguistic variety as a source of strength and offers playgoers a cosmopolitan engagement with the foreign that while still sometimes anxious complicates easy national distinctions The study surveys six of the European languages heard on London s commercial stages during the three decades between 1590 and 1620 Welsh French Dutch Spanish Irish and Latin and the distinct sets of cultural issues that they made audible Exploring issues of culture and performance raised by representations of European languages on the stage this book joins and advances two critical conversations on early modern drama It both works to recover English relations with alien cultures in the period by looking at how such encounters were staged and treats sound and performance as essential to understanding what Europe s languages meant in the theater Europe s Languages on England s Stages 1590 1620 contributes to our emerging sense of how local identities and global knowledge in early modern England were necessarily shaped by encounters with nearby lands particularly encounters staged for aural consumption

**The Routledge History of Poverty, c.1450-1800** David Hitchcock,Julia McClure,2020-12-30 The Routledge History of Poverty c 1450 1800 is a pioneering exploration of both the lives of the very poorest during the early modern period and of the vast edifices of compassion and coercion erected around them by individuals institutions and states The essays chart critical new directions in poverty scholarship and connect poverty to the environment debt and downward social mobility material culture empires informal economies disability

veterancy and more The volume contributes to the understanding of societal transformations across the early modern period and places poverty and the poor at the centre of these transformations It also argues for a wider definition of poverty in history which accounts for much more than economic and social circumstance and provides both analytically critical overviews and detailed case studies By exploring poverty and the poor across early modern Europe this study is essential reading for students and researchers of early modern society economic history state formation and empire cultural representation and mobility

Educational Research: Material Culture and Its Representation Paul Smeyers, Marc Depaepe, 2014-02-10 This collection discusses and illustrates how educational research is affected by the economic institutional and physical contingencies of its time and in our time even increasingly is driven by them It is argued that the antidote to this is however not to aspire to thought itself but instead to do justice to its own rootedness in the material including textuality From an historical point of view such an innovative approach can itself revamp the material scholarly culture and the way it is represented The chapters address a variety of topics such as the cultural heritage of the school desk the significance of images for research into long term educational processes the way iconic signs function and how modes of enquiry relate to the materiality of education Attention is also given to standards for reporting on educational research studies and how these limit the scope and communication and moreover shape researchers to the forms of citation practices as substantially influencing methods and content and to the centrality of conversation not just as the means to an end but as what matters further to representational and to non representational theories for educational research Some examples are drawn from the area of arts based educational research from mathematics education and from the discourse on universities

**After Modernism** Michael P. Smith, 1992-01-01      **The Political Thought of the Dutch Revolt 1555-1590** Martin van Gelderen, 2002-10-03 This book is a comprehensive study of the history of the political thought of the Dutch Revolt 1555-90 It explores the development of the political ideas which motivated and legitimized the Dutch resistance against the government of Philip II in the Low Countries and which became the ideological foundations of the Dutch Republic as it emerged as one of the main powers of Europe It shows how notions of liberty constitutionalism representation and popular sovereignty were of central importance to the political thought and revolutionary events of the Dutch Revolt giving rise to a distinct political theory of resistance to fundamental debates on the best state of the new Dutch commonwealth and to passionate disputes on the relationship between church and state which prompted some of the most eloquent early modern pleas for religious toleration

*Of Virgins and Martyrs* David Jacobson, 2013-01-31 Explores the role of women's status bodies and sexuality in global conflicts Women's bodies have become a battleground Around the world people argue about veiling schooling for Afghan girls and SlutWalk protests all of which involve issues of women's sexuality and freedom Globalization with its emphasis on human rights and individuality heats up these arguments In *Of Virgins and Martyrs* David Jacobson takes the reader on a fascinating tour of how self identity developed throughout history and what individualism

means for Muslim societies struggling to maintain a sense of honor in a globalized twenty first century Some patriarchal societies have come to see women s control of their own sexuality as a threat to a way of life that goes back thousands of years Many trace their lineage to tribal cultures that were organized around the idea that women s virginity represents the honor of male relatives and the good of the community at large Anyone or anything that influences women to the contrary is considered a corrupting and potentially calamitous force Jacobson analyzes the connection between tribal patriarchy and Muslim radicalism through an innovative tool the tribal patriarchy index This index helps to illuminate why women s sexuality dress and image so compel militant Muslim outrage and sometimes violent action revealing a deeper human story of how women s status defines competing moral visions of society and why this present clash is erupting with such ferocity

**Boundaries and their Meanings in the History of the Netherlands** ,2009-06-17 Traditionally the term boundary applies to the demarcation between a physical place and another physical place most commonly associated with lines on a map As the essays in this volume demonstrate however a boundary can also function in a more broadly conceptual manner A boundary becomes not an imaginary line but a tool for thinking about how to separate any two elements whether ideas events etc into categories by which they become comprehensible and distinct The scholar contributors seek not simply to discern the boundaries but and perhaps more importantly to understand the process of delination and its consequences With its maverick history and grass root political traditions the Netherlands provides an auspicious setting to examine the historical function of boundaries both real and imagined
