Emergence And Convergence:

Emergence and Convergence Mario Bunge, 2015-01-15 Two problems continually arise in the sciences and humanities according to Mario Bunge parts and wholes and the origin of novelty In *Emergence and Convergence* he works to address these problems as well as that of systems and their emergent properties as exemplified by the synthesis of molecules the creation of ideas and social inventions Along the way Bunge examines further topical problems such as the search for the mechanisms underlying observable facts the limitations of both individualism and holism the reach of reduction the abuses of Darwinism the rational choice hermeneutics feud the modularity of the brain vs the unity of the mind the cluster of concepts around maybe the uselessness of many worlds metaphysics and semantics the hazards posed by Bayesianism the nature of partial truth the obstacles to correct medical diagnosis and the formal conditions for the emergence of a cross discipline Bunge is not interested in idle fantasies but about many of the problems that occur in any discipline that studies reality or ways to control it His work is about the merger of initially independent lines of inquiry such as developmental evolutionary biology cognitive neuroscience and socio economics Bunge proposes a clear definition of the concept of emergence to replace that of supervenience and clarifies the notions of system real possibility inverse problem interdiscipline and partial truth that occur in all fields

Markets with Bureaucratic Characteristics Yingyao Wang, 2024-05-21 Winner 2025 Sociology of Development Book Award Sociology of Development Section American Sociological Association China's breathtaking economic development has been driven by bureaucrats Even as the country transitioned away from socialist planning toward a market economy the economic bureaucracy retained a striking degree of influence and control over crafting and implementing policy Yet bureaucrats are often dismissed as faceless and inconsequential their role neglected in favor of party leaders top down rule or bottom up initiatives Markets with Bureaucratic Characteristics offers a new account of economic policy making in China over the past four decades that reveals how bureaucrats have spurred large scale transformations from within Yingyao Wang demonstrates how competition among bureaucrats motivated by careerism has led to the emergence of new policy approaches Second tier economic bureaucrats instituted distinctive and often conflicting policy paradigms aimed at securing their standing and rewriting China's long term development plans for their own benefit Emerging from the middle levels of the bureaucracy these policy paradigms ultimately reorganized the Chinese economy and reshaped state market relations Drawing on fine grained biographical and interview data Wang traces how officials coalesced around shared career trajectories generational experiences and social networks to create new alliances and rivalries Shedding new light on the making and trajectory of China's ambitious economic reforms this book also provides keen sociological insight into the relations among bureaucracy states and markets
