Grimley,Julian Rushton,2005-01-06 Edward Elgar occupies a pivotal place in the British cultural imagination His music has been heard as emblematic of Empire and the English landscape The recent success of Anthony Payne s elaboration of the sketches for Elgar s Third Symphony has prompted a critical revaluation of his music This Companion provides an accessible and vivid account of Elgar s work in its historical and cultural context Established authorities on British music and scholars new in the field examine Elgar s music from a range of critical perspectives including nationalism post colonialism decadence reception and musical influences There are also chapters on interpretation including his own Elgar was the first major composer to commit a representative quantity of his own work to record and on Elgar s relationships with the BBC and with his publishers The book includes much new material drawing on original research as well as providing a comprehensive introduction to Elgar s major musical achievements **The Invention of the English Landscape** Peter Borsay,Rosemary Sweet,2023-07-27 Since at least the Reformation English men and women have been engaged in visiting exploring and portraying in words and images the landscape of their nation The Invention of the English Landscape examines these journeys and investigations to explore how the natural and historic English landscape was reconfigured to become a widely enjoyed cultural and leisure resource Peter Borsay considers the manifold forces behind this transformation such as the rise of consumer culture the media industrial and transport revolutions the Enlightenment Romanticism and the Gothic revival In doing so he reveals the development of a powerful bond between landscape and natural identity against the backdrop of social and political change from the early

modern period to the start of the Second World War Borsay's interdisciplinary approach demonstrates how human understandings of the natural world shaped the geography of England and uncovers a wealth of valuable material from novels and poems to paintings that expose historical understandings of the landscape This innovative approach illuminates how the English countryside and historic buildings became cultural icons behind which the nation was rallied during war time and explores the emergence of a post war heritage industry that is now a definitive part of British cultural life *The British National Bibliography* Arthur James Wells, 2006 *Edward Elgar and His World* Byron Adams, 2011-11-14 Edward Elgar 1857-1934 is undoubtedly one of the most fascinating important and influential figures in the history of British music He rose from humble beginnings and achieved fame with music that to this day is beloved by audiences in England and his work has secured an enduring legacy worldwide Leading scholars examine the composer's life in *Edward Elgar and His World* presenting a comprehensive portrait of both the man and the age in which he lived Elgar's achievement is remarkably varied and wide ranging from immensely popular works like the famous Pomp and Circumstance March no 1 a standard feature of American graduations to sweeping masterpieces like his great oratorio *The Dream of Gerontius* The contributors explore Elgar's Catholicism which put him at odds with the prejudices of Protestant Britain his glorification of British colonialism his populist tendencies his inner life as an inspired autodidact the aristocratic London drawing rooms where his reputation was made the class prejudice with which he contended throughout his career and his anguished reaction to World War I Published in conjunction with the 2007 Bard Music Festival and the 150th anniversary of Elgar's birth this elegant and thought provoking volume illuminates the greatness of this accomplished English composer and brings vividly to life the rich panorama of Victorian and Edwardian Britain The contributors are Byron Adams Leon Botstein Rachel Cowgill Sophie Fuller Daniel M Grimley Nalini Ghuman Gwynne Deborah Heckert Charles Edward McGuire Matthew Riley Alison I Shiel and Aidan J Thomson Some images inside the book are unavailable due to digital copyright restrictions **After the Victorians** A. N. Wilson, 2006-09-19 Blending military political social and cultural history of the most dramatic kind distinguished historian Wilson offers an absorbing portrait of the decline of one of the world's great powers The result is a fresh account of the birth pangs of the modern world as well as a timely analysis of imperialism and its discontents **Edward Elgar** Christopher Grogan, 2020-12-02 The first full length study of the English composer's complex interaction with his physical environment and its new relevance in the 21st century More perhaps than any other composer Edward Elgar 1857-1934 has gained the status of an icon of locality his music seemingly inextricably linked to the English landscape in which he worked This the first full length study of Elgar's complex interaction with his physical environment explores how it is that such associations are formed and whether it is in any sense true that Elgar alchemized landscape into music It argues that Elgar stands at the apex of an English tradition going back to Blake in which creative artists in all media have identified and warned against the self harm of environmental degradation and that following a period in which these ideas were swept away by the swift but

shallow tide of Modernism in the decades after the First World War they have since resurfaced with a new relevance and urgency for twenty first century society Written with the non specialist in mind yet drawing on the rich resources of post millennial scholarship on Elgar as well as geographical studies of place the book also includes many new insights relating to such aspects of Elgar s output as his use of landscape typology in *The Apostles* and his encounter with Modernism in the late chamber music It also calls on the resources of contemporary social commentary poetry and especially English landscape art to place Elgar and his thought in the broader cultural milieu of his time A survey of recent recordings is included in the hope that listeners both familiar and unfamiliar with Elgar s music will feel inspired to embark on a voyage of re discovery of its endlessly rewarding treasures

Handbook of Research on Creative Cities and Advanced

Models for Knowledge-Based Urban Development Galaby, Aly Abdel Razek, Abdrabo, Amal Adel, 2020-10-09 Discussing global society entails discussing the predominant characteristics of knowledge based activities in all walks of life. Its main characteristics are based on creativity, innovation, freedom, and networking. The emergence of such a society poses several challenges to all disciplines of social sciences. Within such a context, sociologists must have practical encounters to the theoretical, methodological, and empirical challenges imposed within contemporary global society. In this vein, studying creative cities from an interdisciplinary perspective helps provide critical readings of the phenomenon and the different levels of the concept in reality. The Handbook of Research on Creative Cities and Advanced Models for Knowledge Based Urban Development provides global models and best practices of creative cities worldwide and illustrates different theoretical blueprints for the better understanding of contemporary global society. While defining key concepts of creative cities, global society, and creative class, the book also clarifies the main differences between hubs, parks, and precincts and their contributions to knowledge based development. Covering topics that include knowledge economy, social inclusion, and urban mobility, this comprehensive reference is ideal for sociologists, urban planners, designers, political scientists, economists, anthropologists, historians, policymakers, researchers, academicians, and students.

Understanding Urban Cycling Justin Spinney, 2020-10-28 Academic interest in cycling has burgeoned in recent years with significant literature relating to the health and environmental benefits of cycling, the necessity for cycle specific infrastructure, and the embodied experiences of cycling. Based upon primary research in a variety of contexts such as London, Shanghai, and Taipei, this book demonstrates that recent developments in urban cycling policy and practice are closely linked to broader processes of capital accumulation. It argues that cycling is increasingly caught up in discourses around smart cities that emphasise technological solutions to environmental problems and neoliberal ideas on individual responsibility and bio political conduct which only results in solutions that prioritise those who are already mobile. Accordingly, the central argument of the book is not that the popularisation of cycling is inherently bad, but that the manner in which cycling is being popularised gives cause for social and environmental concern. Ultimately, the book argues that cycling has now become a vehicle for sustaining pro growth agendas rather than subverting them or shifting to sustainable, no growth, de growth, and less technologically driven visions of modernity. This book makes an innovative contribution to the fields of Cycling Studies, Mobilities, and Transport, and will be of interest to students and academics working in Human Geography, Transport Studies, Urban Studies, Urban Planning, Public Policy, Sociology, and Sustainability.
