outcomes that no one not even those involved in making them seems to want Since the earliest days of the computer age theorists have foreseen the dangers of complex systems without personal accountability In response British business scholar Stafford Beer developed an accountability first approach to management called cybernetics which might have taken off had his biggest client the Chilean government not fallen to a bloody coup in 1973 With his signature blend of economic and journalistic rigor Davies examines what's gone wrong since Beer including what might have been had the world embraced cybernetics when it had the chance *The Unaccountability Machine* is a revelatory and resonant account of how modern life became predisposed to dysfunction
