Customary International Humanitarian Law Jean-Marie Henckaerts, Louise Doswald-Beck, 2005 In 1996 the International Committee of the Red Cross alongside a range of renowned experts embarked upon a major international study into current state practice in international humanitarian law in order to identify customary law in this area This book is the result of that study a comprehensive analysis of the customary rules of international humanitarian law applicable in international and non international armed conflicts Given that important treaties in this area have not yet been universally ratified this is a publication of major importance carried out at the express request of the international community In so doing this study identifies the common core of international humanitarian law binding on all parties to all armed conflicts

The Emblems of the Altdorf Academy Frederick John Stopp, 1974 *Emblems in the Free Imperial City* Mara R. Wade, Christopher D. Fletcher, Andrew C. Schwenk, 2024-03-04 Civic virtues were central to early modern N rnberg s visual culture These essays in this volume explore N rnberg as a location from which to study the intersection of art and power The imperial city was awash in emblems and they informed most aspects of everyday life The intent of this collection is to focus new attention on the town hall emblems while simultaneously expanding the purview of emblem studies moving from strict iconological approaches to collaborations across methodologies and disciplines

The Emblem and its Variations Paulette Choné, Marie Chaufour, Jean-Jacques Chardin, 2025-07-22 An emblem is a combination of images and texts that flourished in the early modern period The book presents the culture of the emblem and its influences and adaptations in various art forms from the late sixteenth century to the 1930s It also looks at the production of emblem books the symbolism of certain recurring motifs in emblem collections and printed emblems as objects of religious devotion The emblem requires the deciphering of images whose meaning often remains obscure and the book aims to remind twenty first century readers living in a world where iconographic motifs are ubiquitous that understanding images is as demanding today as it was in the early modern period The book will be of interest to specialists in the history of art and early modern culture as well as to readers wishing to familiarize themselves with the art of reading images

Collections Management as Critical Museum Practice Cara Krmpotich, Alice Stevenson, 2024-07-22 There is a common misconception that collections management in museums is a set of rote procedures

or technical practices that follow universal standards of best practice This volume recognises collections management as a political critical and social project involving considerable intellectual labour that often goes unacknowledged within institutions and in the fields of museum and heritage studies Collections Management as Critical Museum Practice brings into focus the knowledges value systems ethics and workplace pragmatics that are foundational for this work Rather than engaging solely with cultural modifications such as Indigenous care practices the book presents local knowledge of place and material which is relevant to how collections are managed and cared for worldwide Through discussion of varied collection types management activities and professional roles contributors develop a contextualised reflexive practice for how core collections management standards are conceptualised negotiated and enacted Chapters span national museums in Brazil and Uganda to community led heritage work in Malaysia and Canada they explore complexities of numbering digitisation and description alongside the realities of climate change global pandemics and natural disasters The book offers a new definition of collections management travelling from what is done to care for collections to what is done to care for collections and their users Rather than use being an end goal it emerges as a starting point to rethink collections work *The Freemason's*

Monthly Magazine ,1860 **Emblematics in Hungary** Éva Knapp,Gábor Tüskés,2012-10-25 The main aim of the work is to present emblematics in Hungary in its European context and to show the reciprocal influence between that phenomenon and mainstream literature The description of the theoretical and historical development in Hungary is supplemented by a series of case studies examining the effect of emblematics upon various literary genres The final chapter analyzes the link between literary emblematics and the visual arts by looking at a specific example As in most European countries emblematics in Hungary is part of a complex labyrinth of literary modes of thought and expression A relative poverty of theoretical writing went hand in hand with a considerable range of emblematic practice The emblem proved to be a transitional form between the period when signs and motifs were regarded as having specific and fixed meanings and the modern period when we have developed a different and shifting concept of language and meaning At the same time as emblems began to penetrate the more popular levels of national culture and literature they also became more specialized Hungarian emblematics used for the most part existing pictorial and textual combinations of pictures and texts They employed the emblem notably in genres and texts of the genus demonstrativum which referred to matters which were topical at the time The Practices of the
