

DECISION-MAKING SKILLS

DEFINITION

Decision-making is the process of selecting a course of action among several available options. It involves evaluating and analyzing the benefits and risks of each choice. This cognitive process is vital for problem-solving, planning, and achieving desired outcomes. Effective decision-making often requires gathering information and assessing potential impacts.

EXAMPLES

- **Critical Thinking:** This aids decision-making by allowing you to analyze, evaluate, and interpret information objectively, leading to more informed choices.
- **Cost-Benefit Analysis:** This assists in decision-making by quantifying and comparing the anticipated costs and benefits of an action.

Emergent Issues In Human Decision Making:

Emergent Issues in Human Decision Making Gerald M. Phillips, Julia T. Wood, 1984 A critical examination of the concept of decision making or consensus that has held sway in thinking about groups since its introduction in the 1930s As a part of the group dynamics movement the concept of consensus was accepted perhaps without adequate reflection regarding its nature and utility as a way of thinking about and teaching about group process The authors carefully define the concept trace it historically and critically evaluate its merit to create an understanding of what happens when groups of people come together to work things out The contributors are William K Rawlins Randy Y Hirokawa Nancy Wyatt Lynne Kelly Cynthia F Begnal Christopher Waagen Susan L Kline Janet M Ceropski and Paul G Friedman The result of their studies is the recognition that consensus is a concept not an entity or a state of being While an important concept that is useful as a critical tool it must be treated as a concept an abstraction created and used by those who wish to study how people reach collective agreements

Human Factors Challenges in Emergency Management Christine Owen, 2017-09-29 This book provides an overview of state of the art research that has been conducted within Australia funded by the Bushfire Cooperative Research Centre The chapters source and contextualize their own research practice within the context of the international research literature Therefore while the research has occurred within Australia it will be of particular interest to scholars students and practitioners in a number of other countries particularly within the United States of America and in Europe The fire and emergency services is a particularly large industry in Australia alone it employs 250 000 personnel yet there is very little by way of published human factors books addressing this sector directly Emergency events frequently involve problems for which there may be unanticipated consequences and highly interdependent consequential effects In short emergency events are not necessarily as containable as may be work in other domains As Karl Weick once commented emergency events do not play by the rules This means that these research chapters tell us something about a potential future world of work that is highly dynamic interdependent and for which improvisation and critical

thinking and problem solving are necessary pre requisites The discussions about individual and team performance will also be pertinent to others working in similar high reliability high consequence domains The chapters connect into an integrated body of work about individual and group performance and their limitations **Facilitator's Guide to Participatory**

Interorganizational Collaboration Renee Guarriello Heath, Matthew G. Isbell, 2017-03-08 Interorganizational Collaboration Complexity Ethics and Communication centers around three key assertions 1 interorganizational collaboration is complex and warrants study as a specific type of leadership and communication 2 successful collaborative relationships are grounded in a principled ethic of democratic and egalitarian participation and 3 interorganizational collaboration requires a specific communication language of practice Interorganizational collaboration is influenced by increased interconnectedness shifting organizational needs and a changing workforce Collaboration invokes ethical questions and ethical responsibilities that must be considered in communication practices and structures Although there are many popular books and practitioner materials on collaboration most are not focused on introducing foundational concepts to a novice audience In addition the subject of communication in collaboration has been somewhat underdeveloped The authors focus on communication from a social constructionist stance One of their primary goals is to develop a collaboration pedagogy based on existing communication scholarship The authors present communicative practices vital to interorganizational participation and they view collaboration as something beyond an exchange of resources and knowledge Unlike group and organizational texts that approach collaboration from a functional or strategic perspective this text anchors collaboration in the assumption that democratic and principled communication will foster creative and accountable outcomes for participants in collaborative problem solving The authors articulate a collaborative ethic useful in all communicative contexts Micropractices of communication are fundamental not only to collaborating across organizations but also to fostering just and trusting relationships The book discusses the cornerstone assumptions and principled practices necessary for stakeholders to address problems for example recognizing and validating the needs of fellow stakeholders separating people's positions from underlying interests listening for things that are never quite said identifying overlapping commonalities building trust while respecting difference and constructively navigating conflict The book also focuses on building collaborative praxis based on the assumption of contingency Praxis cultivates knowledge and ethical understanding of a situation so participants in collaborations can make the best decision based on specific circumstances

Fire and Emergency Services Administration: Management and Leadership Practices Includes Navigate

Advantage Access L. Charles Smeby Jr., L. Charles Smeby Jr., 2021-03-22 This book is designed to be a progressive primer for students who want more knowledge about fire and emergency services administration. The book demonstrates the importance of the following skills necessary to manage and lead a fire and emergency services department through the challenges and changes of the 21st century: Persuasion and influence, accountable budgeting, anticipation of challenges and the need for change, and using specific management tools for analyzing and solving problems. A central part of the book focuses on how the leadership of a fire and emergency services department develops internal and external cooperation to create a coordinated approach to achieving the department's mission. Power and Interdependence in Organizations Dean Tjosvold, Barbara Wisse, 2009-02-26 Capitalizing on significant developments in social science over the past twenty years, this book explores both the positive and negative aspects of power, identifying opportunities and threats. It shows how managers and employees can manage power in order to make it a constructive force in organizations. *Disciplines, Disasters and Emergency Management* David A. McEntire, 2007 Disasters such as the 9/11 terrorist attacks, the Indian Ocean Tsunami, and Hurricane Katrina illustrate the salience and complexity of disasters. Both scholars and practitioners therefore agree that we must take a more proactive and holistic approach to emergency management, which should logically be derived from a sound understanding of the academic literature and the most pressing concerns facing professionals in the field today. *Disciplines, Disasters and Emergency Management* reviews what is known about catastrophic events from the standpoint of various academic areas of study. The introduction
