investments in fundamental technologies enable otherwise unattainable revolutionary innovations with massive beneficial spillovers to the private sector and the public for the next generations      *Safer Complex Industrial Environments* Erik Hollnagel,2009-10-20 While a quick response can save you in a time of crisis avoiding a crisis remains the best defense When dealing with complex industrial systems it has become increasingly obvious that preparedness requires a sophisticated understanding of human factors as they relate to the functional characteristics of socio technology systems Edited by indust
