*Emerging Technologies and Military Doctrine* Dr. Frank Barnaby, Marlies Ter Borg, 1986-06-18      Emerging Technologies and Military Doctrine Frank Barnaby, 1986      *Defence Innovation and the 4th Industrial Revolution* Michael Raska, Katarzyna Zysk, Ian Bowers, 2022-03-30 This book examines the implications of disruptive technologies of the Fourth Industrial Revolution 4IR on military innovation and the use of force It provides an in depth understanding of how both large and small militaries are seeking to leverage 4IR emerging technologies and the effects such technologies may have on future conflicts The 4th Industrial Revolution 4IR the confluence of disruptive changes brought by emerging technologies such as artificial intelligence robotics nanotechnologies and autonomous systems has a profound impact on the direction and character of military innovation and use of force The core themes in this edited volume reflect on the position of emerging technologies in the context of previous Revolutions in Military Affairs compare how large resource rich states US China Russia and small resource limited states Israel Sweden Norway are adopting and integrating novel technologies and explore the difference between various innovation and adaptation models The book also examines the operational implications of emerging technologies in potential flashpoints such as the South China Sea and the Baltic Sea Written by a group of international scholars this book uncovers the varying 4IR defence innovation trajectories enablers and constraints in pursuing military technological advantages that will shape the character of future conflicts The chapters in this book were originally published as a special issue of the Journal of Strategic Studies      *Emerging Critical Technologies and Security in the Asia-Pacific* R. Bitzinger, 2016-04-12 The proliferation of advanced militarily relevant technologies in the Asia Pacific over the past few decades has been a significant and perhaps even alarming development This volume addresses how such technologies may affect military capabilities and military advantage in the region      **Emerging Technologies and International Security** Reuben Steff, Joe Burton, Simona R. Soare, 2020-11-25 This book offers a multidisciplinary analysis of emerging technologies and their impact on the new international security environment across three levels of analysis While recent technological developments such as Artificial Intelligence AI robotics and automation have the potential to transform international relations in positive ways they also pose challenges to peace and security and raise new ethical legal and political questions about the use of power and the role of humans in war and conflict This book makes a contribution to these debates by considering emerging technologies across three levels of analysis 1 the international system systemic level including the balance of power 2 the state and its role in international affairs and how these technologies are redefining and challenging the state s traditional roles and 3 the relationship between the state and society including how these technologies affect individuals and non state actors This provides specific insights at each of these levels and generates a better understanding of the connections between the international and the local when it comes to technological advance across time and space The chapters examine the implications of these technologies for the balance of power examining the

strategies of the US Russia and China to harness AI robotics and automation and how their militaries and private corporations are responding how smaller and less powerful states and non state actors are adjusting the political ethical and legal implications of AI and automation what these technologies mean for how war and power is understood and utilized in the 21st century and how these technologies diffuse power away from the state to society individuals and non state actors This volume will be of much interest to students of international security science and technology studies law philosophy and international relations

Quantum Technologies and Military Strategy Ajey Lele,2021-04-12 This book is about the strategic relevance of quantum technologies It debates the military specific aspects of this technology Various chapters of this book cohere around two specific themes The first theme discusses the global pattern of ongoing civilian and military research on quantum computers quantum cryptography quantum communications and quantum internet The second theme explicitly identifies the relevance of these technologies in the military domain and the possible nature of quantum technology based weapons This thread further debates on quantum arms race at a global level in general and in the context of the USA and China in particular The book argues that the defence utility of these technologies is increasingly becoming obvious and is likely to change the nature of warfare in the future

*International Security Studies and Technology* Tobias T. Gibson,Kurt W. Jefferson,2024-10-03 International Security Studies and Technology applies an interdisciplinary perspective to the study of emerging technologies and issues related to their development governance laws ethics understanding and mis use considering their impact on international security and established international norms Bringing together a diverse collection of experts Tobias T Gibson and Kurt W Jefferson analyse international security and technology through three conceptual frameworks approaches assessments and frontiers

**Emerging Technologies and International Stability** Todd S. Sechser,Neil Narang,Caitlin Talmadge,2021-11-28 Technology has always played a central role in international politics it shapes the ways states fight during wartime and compete during peacetime Today rapid advancements have contributed to a widespread sense that the world is again on the precipice of a new technological era Emerging technologies have inspired much speculative commentary but academic scholarship can improve the discussion with disciplined theory building and rigorous empirics This book aims to contribute to the debate by exploring the role of technology both military and non military in shaping international security Specifically the contributors to this edited volume aim to generate new theoretical insights into the relationship between technology and strategic stability test them with sound empirical methods and derive their implications for the coming technological age This book is very novel in its approach It covers a wide range of technologies both old and new rather than emphasizing a single technology Furthermore this volume looks at how new technologies might affect the broader dynamics of the international system rather than limiting the focus to a stability The contributions to this volume walk readers through the likely effects of emerging technologies at each phase of the conflict process The chapters begin with competition in peacetime move to deterrence and coercion and then explore the dynamics of

crises the outbreak of conflict and war escalation in an environment of emerging technologies The chapters in this book except for the Introduction and the Conclusion were originally published in the Journal of Strategic Studies

**The Impact of Emerging Technologies on the Law of Armed Conflict** Eric Talbot Jensen, Ronald T. P. Alcala, 2019 This book explores a number of legal issues raised by the introduction of emerging technologies such as autonomous weapons artificial intelligence and cyber capabilities on the modern battlefield Is the law as it exists today capable of regulating these new weapons How might the law be changed to address these new and emerging capabilities This book will shape the debate on how the law of armed conflict should be changed or could be adapted to address the challenges posed by the use of emerging technologies in modern warfare
