Smith, 1984 Democracy, Federalism, the European Revolution, and Global Governance Andrea Bosco, 2020-06-10 The European Union is facing today the greatest crisis since its creation Brexit could mean not only the reversal of its steady enlargement from 6 to 28 member states but also the beginning of an inexorable decline leading to its disintegration However few today seem to recollect that it was precisely the British who were the first to promulgate the political culture which inspired the European Union's construction democracy and federalism and the first who tried to realise in June 1940 a European federation on the basis of an Anglo French union This volume traces the fundamental stages of the European unification process placing it in relation to the wider process of world economic and political integration In particular it analyses the historical significance of the European Revolution which is identified in the overcoming of the nation state namely the modern political formula which institutionalised the political division of mankind and the birth of the first truly international state The universal historical significance of the European Revolution lies in its exportability as for the other great European revolutions and therefore its potential as progressively extensible to all the states of the planet Europe was indeed the first region of the world where the barriers between national states fell and a post national political identity emerged complementary to national political identities It is in fact in the context of the European Union that democracy beyond the borders of the nation state has first been realized constituting a guiding principle for global governance *Comprehensive Dissertation Index* , 1989 **American Government and Politics Today** Mack C.
