between innovative Americans and efficient Asians it is said With debt and demographics dragging down them down one hears that European economies will not grow much unless radically new ways are discovered The end of complacency in Europe is a good thing but this loss of confidence could be dangerous The danger is that in a rush to rejuvenate growth the attractive attributes of the European development model could be abandoned along with the weak In fact the European growth model has many strong points and enviable accomplishments One can say without exaggeration that Europe had invented a convergence machine taking in poor countries and helping them become high income economies World Bank research has identified 27 countries that have grown from middle income to high income since 1987 a few thanks to the discovery and exploitation of massive natural resources e g oil in Oman and Trinidad and Tobago several others like Japan Hong Kong Singapore Taiwan and South Korea embracing aggressive export led strategies which involved working and saving a lot postponing political liberties and looking out only for themselves But half of the countries that have grown from middle income to high income Croatia Cyprus Czech Republic Estonia Greece Hungary Latvia Malta Poland Portugal Slovak Republic and Slovenia are actually in Europe This is why the European model was so attractive and unique and why with some well designed efforts it ought to be made right again

The European Union and Emerging Powers in the 21st Century Sven Biscop, 2016-02-11 The emergence of new powers fundamentally questions the traditional views on international relations multilateralism or security as a range of countries now competes for regional and global

leadership economically politically technologically and militarily As the focus of international attention shifts from the Atlantic to the Pacific the European states in particular are seen to lose influence relative to the emerging economic powerhouses of China Russia India and Brazil European nations find themselves too small to engage meaningfully with these continent sized powers and in an increasingly multipolar world are concerned their influence can only continue to decline This book analyses the shifts in the structure of global power and examines the threats and opportunities they bring to Europe Leading European Contributors reflect on how the EU can utilise collective strength to engage and compete with rapidly developing nations They examine perceptions of the EU among the emerging powers and the true meaning and nature of any strategic partnerships negotiated Finally they explore the shape and structure of the international system in the 21st century and how the EU can contribute to and shape it *NATO in the New European Order* F. Carr, K.

Ifantis, 1996-07-03 In contrast to the Cold War era the new European order is characterised by uncertainty fluidity and new security challenges including separatism ethnic conflict and intra state conflict This book examines the process of change and its implications for transatlantic relations institutional development regional stability and NATO's rationale Balkan instability forms a major theme of the work illustrating the challenge for policy makers The book concludes with a discussion of NATO enlargement and relations with Russia **The New European Industrial Policy** Franco Mosconi, 2015-05-22

The years since the global financial crisis have seen something of a renaissance in the manufacturing industry The United States has launched its Advanced Manufacturing Partnership and China owes much of its spectacular economic boom in the last decades to its being the world's factory Is there room for the EU in this landscape This timely new book explores Europe's role in this evolving environment It argues that on the one hand in terms of sheer numbers the role of the manufacturing industry in the EU is on a par with other major global economies However the book also states that Europe falls short of its global competitors the USA in particular in terms of its involvement in the most innovative manufacturing sectors The volume therefore argues that this creates the opportunity for a new European industrial policy Exploring the development of current EU policy the book puts forward suggestions as to how the EU can improve in terms of the competitiveness of its technology policy Placing the EU's position in the context of the industrial structures of the USA Japan and the BRICs the book blends theoretical models and practical examples in order to offer a state of the art look at the current and future direction of Europe's industrial policy This book will be of relevance to all those with an interest in European economics industrial economics public policy European politics and European studies **Handbook of European Societies** Stefan
