Empires New Clothes Paradigm Lost And Regained:

The Empire's New Clothes Harry D. Harootunian, 2004 Empire and imperialism have returned with a vengeance not as a set of ideas and practices to be exhumed by the historians but as paradigms for twenty first century living Harry Harootunian turns his unrelenting gaze to signs of the new imperialism in the world from the United States occupation of Iraq to other supposed terrorist enclaves around the globe The arguments being made today for imperialism s historical and contemporary value echo earlier rationales for modernization theory and its conception of development during the heyday of the Cold War Harootunian decisively cuts through the layers to reveal that under the new clothes it s the same empire

Badges without Borders Stuart Schrader, 2019-10-15 From the Cold War through today the U S has quietly assisted dozens of regimes around the world in suppressing civil unrest and securing the conditions for the smooth operation of capitalism Casting a new light on American empire Badges Without Borders shows for the first time that the very same people charged with global counterinsurgency also militarized American policing at home In this groundbreaking expos Stuart Schrader shows how the United States projected imperial power overseas through police training and technical assistance and how this effort reverberated to shape the policing of city streets at home Examining diverse records from recently declassified national security and intelligence materials to police textbooks and professional magazines Schrader reveals how U S police leaders envisioned the beat to be as wide as the globe and worked to put everyday policing at the core of the Cold War project of counterinsurgency A smoking gun book Badges without Borders offers a new account of the War on Crime law and order politics and global counterinsurgency revealing the connections between foreign and domestic racial control

Uneasy Warriors Sabine Fröhstück, 2007-08-14 Following World War II Japan s postwar constitution forbade the country to wage war or create an army However with the emergence of the cold war in the 1950s Japan was urged to establish the Self Defense Forces as a way to bolster Western defenses against the tide of Asian communism Although the SDF s role is supposedly limited to self defense Japan s armed forces are equipped with advanced weapons technology and the world s third largest military budget Sabine Fr hst ck draws on interviews historical research and analysis to describe the unusual case of a non war making military As the first scholar permitted to participate in basic SDF training she offers a firsthand look at an army trained for combat that nevertheless serves nontraditional military needs

Philosophy of History After Hayden White Robert Doran, 2013-06-06 This anthology of new essays by an international group of preeminent scholars explores the ground breaking work of Hayden White whose thought beginning with his seminal Metahistory 1973 has revolutionized the way we think about the philosophy of history historiography narrative and the relation between history and literature Representing a variety of disciplines and approaches the contributions to this volume testify to the far reaching effects and significance of White s philosophy of history Individual essays relate White s ideas to contemporary art cognitive studies Heideggerian hermeneutics experimental history Kant s transcendental philosophy

analytic philosophy of history Marxist cultural theory the Kantian sublime and American academic historiography A substantial introduction by the editor traces the genesis of White's philosophy of history situating it with respect to both the Anglo American and Continental traditions The volume also features a previously unpublished essay by White which offers a concise overview of his later thought and a Comment written specifically for this volume in which White revisits the question of the philosophy of history Nineteenth Century Prose ,2005 *An Empire of Indifference* Randy Martin,2007-03-14 Analyzes imperial ambitions in the context of the dominance of finance not simply as a form of capital but also as a set of protocols for organizing daily life **The Right Kind of Revolution** Michael E. Latham,2011 A critical history of modernization theory in American foreign policy *The Proletarian Gamble* Ken C. Kawashima,2009-04-17 A Marxist interpretation of Korean migrant workers struggles in Japan during the 1920s and 1930s **China and England** Martin Powers,2018-09-24 This book examines egalitarian social ideals and institutions that arose in preindustrial China and England and in the process uncovers China's forgotten role in the history of social justice debate and legislation during the eighteenth century Drawing on a wide range of visual and documentary evidence the author shows that many prominent individuals in both England and China adopted comparable strategies as a logical response to excesses of privilege and arbitrary power with educated but non noble persons taking advantage of print culture a more literate population an expanded art market public spaces and other familiar early modern developments to interrogate the system of inherited privilege and promote a more meritocratic society This shared experience created common ground for transformative exchange between the two great traditions during the eighteenth century By providing a more global account of what we call Western values the book shows that early modern China and England had far more in common than is normally supposed and thus challenges claims on the right and the left that the people of China lacked a concept of social justice and that China's cultural legacy should be treated as exceptional in regard to human rights Space, Difference, Everyday Life Kanishkha Goonewardena,Stefan Kipfer,Richard Milgrom,Christian Schmid,2008-02-19 In the past fifteen years Henri Lefebvre's reputation has catapulted into the stratosphere and he is now considered an equal to some of the greats of European social theory Bourdieu Deleuze Harvey In particular his work has revitalized urban studies geography and planning via concepts like the social production of space the right to the city everyday life and global urbanization Lefebvre's massive body of work has generated two main schools of thought one that is political economic and another that is more culturally oriented and poststructuralist in tone *Space Difference and Everyday Life* merges these two schools of thought into a unified Lefebvrian approach to contemporary urban issues and the nature of our spatialized social structures **Routledge Companion to Sports History** S. W. Pope,John Nauright,2009-12-17 The field of sports history is no longer a fledgling area of study There is a great vitality in the field and it has matured dramatically over the past decade Reflecting changes to traditional approaches sport historians need now to engage with contemporary debates about history to be encouraged to position

Waiting for the Barbarians Basak Ertur, Müge Gürsoy Sökmen, 2020-05-05 Bringing together some of the figures most closely associated with Edward Said and his scholarship, *Waiting for the Barbarians* looks at Said, the public intellectual and literary critic, and his political and intellectual legacy through the lens of his work.

Decentring and Diversifying Southeast Asian Studies Goh Beng Lan, 2011 This admirable book contains fascinating autobiographical accounts by some of Southeast Asia's most eminent scholars concerning their struggle to find their own voices in interpreting the region to which they belong. The book should be indispensable to anyone interested in thinking about knowledge production and its politics in a postcolonial world. In the views of these scholarly Southeast Asians we are made to see in very personal terms the link between the global crisis in the social sciences and the need to find remedies for it that are neither Eurocentric nor parochially anti-Western. Professor Alexander Woodside, Professor of Chinese and Southeast Asian History, University of British Columbia, Vancouver, Canada. This book marks the shift of the centre of Southeast Asian Studies from the West to Southeast Asia. The insights provided by the authors are not simply explanations of colonial and postcolonial experiences of major Southeast Asian scholars. Rather, the book provides a unique set of intellectual genealogies that show that distinctions between humanities and social sciences are less important than the development of distinctive local and regional traditions and practices of scholarship. Goh Beng Lan's introduction frames the collection through her subtle deconstruction of international discourses on Southeast Asia. This introduction then allows the reader to view the different generations of Southeast Asian scholars in their social, political, and academic contexts. The end result is a combined view of the state of the art of Southeast Asian Studies, a view that is greater than the sum of its national parts. Professor Adrian Vickers, Chair of Southeast Asian Studies, University of Sydney, and Director, Australian Centre for Asian Art and Archaeology. The collection represents a coming of age of scholars from Southeast Asia. What we hear is not bluster that comes from a wounded pride or doctrinal certainties, but a quiet confidence that acknowledges the multiple currents in which their scholarship has been formed and a willingness to engage the perspective of the other, both within and without. The reflexivity

in this volume sets the stage for scholars from the region to develop perspectives and concepts to address the challenges of the new configuration of the Asia being ushered in by ASEAN Professor Prasenjit Duara Raffles Professor of Humanities and Director of Research Humanities and Social Sciences National University of Singapore Divine Work, Japanese Colonial Cinema and Its Legacy Kate Taylor-Jones, 2017-08-24 By analyzing cinema in terms of Imperialism and Colonialism Divine Work directly contributes to the understanding of cinema produced during Japan's colonial period and its lingering legacies

The Japanese Ideology Tosaka Jun, 2024-09-17 A major Marxist thinker and critic in 1930s Japan Tosaka Jun was among the world's most incisive yet underrecognized theorists of capitalism fascism and ideology during the years before World War II The Japanese Ideology is his masterpiece first published in 1935 as Japan and the world plummeted into an age of reaction Tosaka offers a ruthless philosophical critique of contemporary ideology that exposes liberalism's deep complicity with fascism The Japanese Ideology provides a materialist analysis of the reactionary ideology then overtaking Japan with profound significance for anywhere fascism has taken root Modeled after Marx and Engels's The German Ideology it critiques idealism as the common ground for liberalism and fascism against which only historical materialism can suffice Tosaka demonstrates how liberal and fascist ideas at once justified and concealed Japan's colonization of East Asia and he investigates the many traces of fascism in Japanese thought and society The Japanese Ideology makes an important intervention in Marxist theory by criticizing reliance on the East West binary and the notion of the Asiatic mode of production Robert Stolz's translation introduces Anglophone readers to a classic of twentieth century Marxist thought by an unsung peer of Gramsci and Benjamin with striking relevance today

Taming Cannibals Patrick Brantlinger, 2011-09-16 In Taming Cannibals Patrick Brantlinger unravels contradictions embedded in the racist and imperialist ideology of the British Empire For many Victorians the idea of taming cannibals or civilizing savages was oxymoronic civilization was a goal that the nonwhite peoples of the world could not attain or at best could only approximate yet the civilizing mission was viewed as the ultimate justification for imperialism Similarly the supposedly unshakeable certainty of Anglo Saxon racial superiority was routinely undercut by widespread fears about racial degeneration through contact with lesser races or concerns that Anglo Saxons might be superseded by something superior an even fitter or higher race or species Brantlinger traces the development of those fears through close readings of a wide range of texts including Robinson Crusoe by Daniel Defoe Fiji and the Fijians by Thomas Williams Daily Life and Origin of the Tasmanians by James Bonwick The Descent of Man by Charles Darwin Heart of Darkness by Joseph Conrad Culture and Anarchy by Matthew Arnold She by H Rider Haggard and The War of the Worlds by H G Wells Throughout the wide ranging capacious and rich Taming Cannibals Brantlinger combines the study of literature with sociopolitical history and postcolonial theory in novel ways

Radiation and Revolution Sabu Kohso, 2020-09-11 In Radiation and Revolution political theorist and anticapitalist activist Sabu Kohso uses the 2011 Fukushima nuclear disaster to illuminate the relationship between nuclear power capitalism and the nation state

Combining an activist's commitment to changing the world with a theorist's determination to grasp the world in its complexity Kohso outlines how the disaster is not just a pivotal event in postwar Japan it represents the epitome of the capitalist state mode of development that continues to devastate the planet's environment Throughout he captures the lived experiences of the disaster's victims shows how the Japanese government's insistence on nuclear power embodies the constitution of its regime under the influence of US global strategy and considers the future of a radioactive planet driven by nuclearized capitalism As Kohso demonstrates nuclear power is not a mere source of energy it has become the organizing principle of the global order and the most effective way to simultaneously accumulate profit and govern the populace For those who aspire to a world free from domination by capitalist nation states Kohso argues the abolition of nuclear energy and weaponry is imperative

Duress Ann Laura Stoler, 2016-10-13 How do colonial histories matter to the urgencies and conditions of our current world How have those histories so often been rendered as leftovers as legacies of a dead past rather than as active and violating forces in the world today With precision and clarity Ann Laura Stoler argues that recognizing colonial presence may have as much to do with how the connections between colonial histories and the present are expected to look as it does with how they are expected to be In Duress Stoler considers what methodological renovations might serve to write histories that yield neither to smooth continuities nor to abrupt epochal breaks Capturing the uneven recursive qualities of the visions and practices that imperial formations have animated Stoler works through a set of conceptual and concrete reconsiderations that locate the political effects and practices that imperial projects produce occluded histories gradated sovereignties affective security regimes new racisms bodily exposures active debris and carceral archipelagos of colony and camp that carve out the distribution of inequities and deep fault lines of duress today
