Empires Perspectives From Archaeology And History:

Empires Susan E. Alcock, 2001-08-09 Empires the largest political systems of the ancient and early modern world powerfully transformed the lives of people within and even beyond their frontiers in ways quite different from other non imperial societies Appearing in all parts of the globe and in many different epochs empires invite comparative analysis yet few attempts have been made to place imperial systems within such a framework This book brings together studies by distinguished scholars from diverse academic traditions including anthropology archaeology history and classics The empires discussed include case studies from Central and South America the Mediterranean Europe the Near East South East Asia and China and range in time from the first millennium BC to the early modern era The book organises these detailed studies into five thematic sections sources approaches and definitions empires in a wider world imperial integration and imperial subjects imperial ideologies and the afterlife of empires New Perspectives in Seleucid History, Archaeology and Numismatics

Roland Oetjen, 2019-12-16 Dedicated to Getzel M Cohen a leading expert in Seleucid history this volume gathers 45 contributions on Seleucid history archaeology numismatics political relations policy toward the Jews Greek cities non Greek populations peripheral and neighboring regions imperial administration economy and public finances and ancient descriptions of the Seleucid Empire The reader will gain an international perspective on current research **The Oxford**

World History of Empire Peter Fibiger Bang, Christopher Alan Bayly, Walter Scheidel, 2021 This is the first world history of empire reaching from the third millennium BCE to the present By combining synthetic surveys thematic comparative essays and numerous chapters on specific empires its two volumes provide unparalleled coverage of imperialism throughout history and across continents from Asia to Europe and from Africa to the Americas Only a few decades ago empire was believed to be a thing of the past now it is clear that it has been and remains one of the most enduring forms of political organization and power We cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods such as the relatively short age of European colonialism The history of empire as these volumes amply demonstrate needs to be drawn on the much broader canvas of global history Volume I The Imperial Experience is dedicated to synthesis and comparison Following a comprehensive theoretical survey and bold world history synthesis fifteen chapters analyze and explore the multifaceted experience of empire across cultures and through the ages The broad range of perspectives includes scale world systems and geopolitics military organization political economy and elite formation monumental display law mapping and registering religion literature the politics of difference resistance energy transfers ecology memories and the decline of empires This broad set of topics is united by the central theme of power examined under four headings systems of power cultures of power disparities of power and memory and decline Taken together these chapters offer a comprehensive and unique view of the imperial experience in world history *Empires to be remembered*

Michael Gehler, Robert Rollinger, 2022-03-10 By applying a comparative approach the volume focuses on a select group of

empires which are generally not in the focus of empires studies They are studied in detail and analyzed due to a strict concept that takes into account real history and reception history as well Reception history becomes more and more an important element in empire studies although this topic is still often more or less underdeveloped The volume singles out a series of such forgotten empires It aims to provide a methodologically clearly structured as well as a uniform and consistent approach It develops a general set of questions that help to compare and distinguish these entities This way the volume intends to examine and to illuminate empires that are generally ignored by modern scholarship

The ^AOxford World History of Empire Peter Fibiger Bang, C. A. Bayly, Walter Scheidel, 2020-11-07 Volume One is dedicated to synthesis and comparison Following a comprehensive theoretical survey and bold world history synthesis fifteen chapters analyze and explore the multifaceted experience of empire across cultures and through the ages

Imperial Cults Rebecca Robinson, 2023 Imperial Cults looks at the role of religious institutions in shaping imperial authority in Ancient China and Rome By examining the changes made by rulers of each state Emperor Wu of Han and Octavian Augustus in Rome it demonstrates that both rulers reshaped their respective religious institutions in order to consolidate both religious and political authority

Constructions of Time and History in the Pre-Columbian Andes Edward Swenson, Andrew Roddick, 2018-03-15 Constructions of Time and History in the Pre Columbian Andes explores archaeological approaches to temporalities social memory and constructions of history in the pre Columbian Andes The authors examine a range of indigenous temporal experiences and ideologies including astronomical cyclical generational eschatological and mythical time This nuanced interdisciplinary volume challenges outmoded anthropological theories while building on an emic perspective to gain greater understanding of pre Columbian Andean cultures Contributors to the volume rethink the dichotomy of past and present by understanding history as indigenous Andeans perceived it recognizing the past as a palpable and living presence We live in history not apart from it Within this framework time can be understood as a current rather than as distinct points moments periods or horizons The Andes offer a rich context by which to evaluate recent philosophical explorations of space and time Using the varied materializations and ritual emplacements of time in a diverse sampling of landscapes Constructions of Time and History in the Pre Columbian Andes serves as a critique of archaeology s continued and exclusive dependence on linear chronologies that obscure historically specific temporal practices and beliefs Contributors Tamara L Bray Zachary J Chase Mar a Jos Culquichic n Venegas Terence D Altroy Giles Spence Morrow Matthew Sayre Francisco Seoane Darryl Wilkinson

Triumph and Betrayal Alexander Johannes Edmonds, 2025-04-21 While the study of Assyria as the world s first empire has never been more popular the events of the foundational early Neo Assyrian period 935 745 BC remain only poorly understood and explained This book re examines the historical question of

Assyria's expansion presenting a novel reconstruction of the early Neo Assyrian period with the latest data including new Assyrian kings detailed regional studies synthesising the newest historical and archaeological findings and interpretative essays outlining new historical factors. The resultant history is unprecedentedly complex containing newly discovered succession conflicts difficult compromises with neighbouring powers local dynasties appointed to Assyrian governorships self serving high officials and sudden reverses in policy. In place of circular structuralist arguments for the Neo Assyrian expansion it presents a new model emphasising internal political conflict and competing visions for Assyria's future. This book is intended for historians and archaeologists of Assyria for whom it will provide a new basis for research and also for scholars of neighbouring disciplines and laypersons interested in what happens to an ancient state before it becomes an empire.

Handbook of Ancient Afro-Eurasian Economies Sitta Reden, 2019-12-02. The notion of the Silk Road that the German geographer Ferdinand von Richthofen invented in the 19th century has lost attraction to scholars in light of large amounts of new evidence and new approaches. The handbook suggests new conceptual and methodological tools for researching ancient economic exchange in a global perspective with a strong focus on recent debates on the nature of pre modern empires. The interdisciplinary team of Chinese Indian and Graeco Roman historians archaeologists and anthropologists that has written this handbook compares different forms of economic development in agrarian and steppe regions in a period of accelerated empire formation during 300 BCE and 300 CE. It investigates inter imperial zones and networks of exchange which were crucial for ancient Eurasian connections. Volume I provides a comparative history of the most important empires forming in Northern Africa Europe and Asia between 300 BCE and 300 CE. It surveys a wide range of evidence that can be brought to bear on economic development in these empires and takes stock of the ways academic traditions have shaped different understandings of economic and imperial development as well as Silk Road exchange in Russia China India and Western Graeco Roman history.

Urban Development and Regional Identity in the Eastern Roman Provinces, 50 BC-AD 250 Rubina Raja, 2012. This study presents a comparative treatment of four East Roman provinces in the period 50 BC AD 250 Aphrodisias and Ephesos in Turkey Athens in Greece and Gerasa in Jordan and it examines the instrumental factors behind regional and local urban developments. It argues that local communities were responsible for the organization and development of public space and buildings which lends itself to an understanding of self knowledge in these communities. Through a discussion of the interaction between architectural developments and historical and regional factors this compelling study examines the interaction between the built environment the social political culture and the urban identity in the eastern Roman Empire.

Visions of Empire Krishan Kumar, 2019-08-06. In this extraordinary volume Krishan Kumar provides us with a brilliant tour of some of history's most important empires demonstrating the critical importance of imperial ideas and ideologies for understanding their modalities of rule and the conflicts that beset them. In doing so he interrogates the contested terrain between nationalism and empire and the legacies that empires leave behind. Mark R

The Making of Empire in Bronze Age Anatolia Claudia Glatz, 2020-11-12 In this book Claudia Glatz reconsiders the concept of empire and the processes of imperial making and undoing of the Hittite network in Late Bronze Age Anatolia Using an array of archaeological iconographic and textual sources she offers a fresh account of one of the earliest well attested imperialist

polities of the ancient Near East Glatz critically examines the complexity and ever transforming nature of imperial relationships and the practices through which Hittite elites and administrators aimed to bind disparate communities and achieve a measure of sovereignty in particular places and landscapes She also tracks the ambiguities inherent in these practices what they did or did not achieve how they were resisted and how they were subtly negotiated in different regional and cultural contexts

American Empire A. G. Hopkins, 2018-02-20 A new history of the United States that turns American exceptionalism on its head American Empire is a panoramic work of scholarship that presents a bold new global perspective on the history of the United States Drawing on his expertise in economic history and the imperial histories of Britain and Europe A G Hopkins takes readers from the colonial era to today to show how far from diverging the United States and Western Europe followed similar trajectories throughout this long period and how America's dependency on Britain and Europe extended much later into the nineteenth century than previously understood In a sweeping narrative spanning three centuries Hopkins describes how the revolt of the mainland colonies was the product of a crisis that afflicted the imperial states of Europe generally and how the history of the American republic between 1783 and 1865 was a response not to the termination of British influence but to its continued expansion He traces how the creation of a U S industrial nation state after the Civil War paralleled developments in Western Europe fostered similar destabilizing influences and found an outlet in imperialism through the acquisition of an insular empire in the Caribbean and Pacific The period of colonial rule that followed reflected the history of the European empires in its ideological justifications economic relations and administrative principles After 1945 a profound shift in the character of globalization brought the age of the great territorial empires to an end American Empire goes beyond the myth of American exceptionalism to place the United States within the wider context of the global historical forces that shaped the Western empires and the world

Archaeologies of Empire Anna L. Booser, Bleda S. Düring, Parker J. Bradley, 2020-10-15 Throughout history a large portion of the world's population has lived under imperial rule Although scholars do not always agree on when and where the roots of imperialism lie most would agree that imperial configurations have affected human history so profoundly that the legacy of ancient empires continues to structure the modern world in many ways Empires are best described as heterogeneous and dynamic patchworks of imperial configurations in which imperial power was the outcome of the complex interaction between evolving colonial structures and various types of agents in highly contingent relationships The goal of this volume is to harness the work of the next generation of empire scholars in order to foster new theoretical and methodological perspectives that are of relevance within and beyond archaeology and to foreground empires as a cross cultural category This book demonstrates how archaeological research can contribute to our conceptualization of empires across disciplinary boundaries
