*Organizations as Complex Systems* Maurice Yolles, 2006-09-01 Managing the Complex is an ambitious title and it would be an audacious one if we were not to begin with a frank admission to date few to none of us have a skill set which includes managing the complex We try various things we write about others and we wonder about still others When a tool perspective or technique comes along which seems to evoke success we emulate it probe it and recoil at the all too often admission that it was situation and context which afforded success its opportunity and not some quality intrinsic to the tool perspective or technique Indeed if the study of complexity has done anything for managers and for those who espouse managerial theory it is in providing a scientific foundation for the notion that context matters Those who preach abstract ideas have then to reconcile themselves to the notion that situation and embodiment matters Those who believe in strong causality and determinism are left to wrestle with the role of chance uncertainty and chaos Those who prefer to argue that men move history are confronted with the role of environment and affordances while those who argue the reverse are left to contend with charisma irrationality of crowds and the strange qualities we know as emotions A series on complex systems has less ambitious goals to contend with than this Such a series can deal with classifications and categories and speak of noise as if it were not the central focus of the problem Managing the complex is about managing noise or perhaps we should say it is about dealing with accepting making room for and learning from noise The articles in this volume and in volumes to come will each be considered as noise by some and as gems by others but we hope that practicing managers and academics alike will find plenty of fuel to drive their personal explorations into understanding and perhaps even managing the complex

Donahue considers the relationship between trauma shame and sexual politics and investigates how shame works as a social regulator that frequently leads to withdrawal or avoidant behaviors in those who violate socially sanctioned mores Most importantly Taking Flight positions flight as a powerful counter to disempowerment and considers how flight whether through dissociation or migration functions as a form of resistance [The Anthropology of Latin America and the Caribbean](#) Harry Sanabria,2015-09-16 The first single authored comprehensive introduction to major contemporary research trends issues and debates on the anthropology of Latin America and the Caribbean The text provides wide and historically informed coverage of key facets of Latin American and Caribbean societies and their cultural and historical development as well as the roles of power and inequality Cymeme Howe Visiting Assistant Professor of Cornell University writes The text moves well and builds over time paying close attention to balancing both the Caribbean and Latin America as geographic regions Spanish and non Spanish speaking countries and historical and contemporary issues in the field I found the geographic breadth to be especially impressive Jeffrey W Mantz of California State University Stanislaus notes that the contents reflect the insights of an anthropologist who knows Latin America intimately and extensively **The Japanese Way of Justice** David Ted

Centering Humanism in STEM Education Bryan Dewsbury,Susannah McGowan,Sheila S. Jaswal ,Desiree Forsythe,2024-09-24 Research demonstrates that STEM disciplines perpetuate a history of exclusion particularly for students with marginalized identities This poses problems particularly when science permeates every aspect of contemporary American life Institutions repeated failures to disrupt systemic oppression in STEM has led to a mostly white cisgender and male scientific workforce replete with implicit and or explicit biases Education holds one pathway to disrupt systemic linkages of STEM oppression from society to the classroom Maintaining views on science as inherently objective isolates it from the world in which it is performed STEM education must move beyond the transactional approaches to transformative environments manifesting respect for students social and educational capital We must create a STEM environment in which students with marginalized identities feel respected listened to and valued We must assist students in understanding how their positionality privilege and power both historically and currently impacts their meaning making and understanding of STEM
