The Civil Service R.A. W. Rhodes, P. Carmichael, J. McMillan, A. Massey, 2003-02-16 This book is concerned with the civil services of the United Kingdom examining their characteristics and trends since 1970. It provides a map of the British civil service beyond Whitehall giving an individual country by country analysis of the civil services of the UK. It considers the implications of the changing nature of the civil services for our understanding of British governance especially in the context of the public sector management reforms of the 1980s and 1990s and the impact of constitutional change chiefly devolution since 1998. Given that devolution has been characterized as a process rather than an event the book brings to bear evidence of how existing longstanding differences within some parts of British public administration may come to be replicated elsewhere in the UK. The authors also explore two controversial propositions. First they ask whether Britain is moving from the unitary strong executive of the Westminster model to a differentiated polity characterized by institutional fragmentation. Second they consider whether an unintended consequence of recent changes is a hollowing out of the state. Is the British executive losing functions downwards to devolved governments and special purpose bodies and outwards to regional offices and agencies with a resulting loss of central capacity. Substantial empirical data both quantitative and qualitative has been amassed here in order to give answers to these questions. Decentralizing the Civil Service assesses the UK's changing civil services in the wake of two decades of public sector management reforms and New Labour's constitutional reform programme most notably devolution to Scotland, Wales and Northern Ireland. This assessment has significant implications for how we view governance in the UK.

Union Recognition Gregor Gall, 2006-01-16 Several thousand new trade union recognition agreements have been signed since 1997 representing a major development within industrial relations in Britain. This has resulted from the interaction of union organizing efforts and the statutory union recognition provisions of the Employment Relations Act 1999. However for trade unions recognition alone is not enough a vital issue is whether having gained union recognition trade unions are now effectively delivering upon the promises and prospects of union recognition. These essays examine the substantive outcomes of these new agreements in regard to union representation and collective bargaining. In particular they explore the impact on terms and conditions of employment, employers' behaviour and strategy, the nature of the union management bargaining relationship, the building of workplace unionism. While the collection focuses primarily on Britain the germane issues are also looked at in the context of Australia, Canada and the U.S.A. Conceptually and theoretically Union Recognition offers contributions which develop our understanding of the relationship between workplace and national unionisms and of mobilization theory.

Union Organizing Gregor Gall, 2003-08-29 After many years of indifferent decline trade union membership is now being revitalized strategies known as union organizing are being used to recruit and re-energize unions around the globe. This book considers exactly how trade unions are working to do this and provides a much needed evaluation of these rebuilding strategies. By comparing historical and contemporary case studies to assess the impact of various organizing campaigns this book assesses the progress of unions across Europe and America. It

raises key debates about the organizing culture and considers the impact of recent union recognition laws on employers and the government's Fairness at Work policy. A topical and in depth study into the experiences of trade unions across Europe and America, this is a comprehensive and thought provoking book which is essential reading for those in the industrial relations field.

Management, Labour Process and Software Development Rowena Barrett, 2004-06. Research from Australia, Europe and the UK is used to examine the differences between the image and reality of work in the software development industry and to provide an analysis of software development and developers.

A Comparison of the Trade Union Merger Process in Britain and Germany Jürgen Hoffman, Marcus Kahmann, Jeremy Waddington, 2007-05-07. Trade unions in Europe are currently facing a series of challenges that stem from changes to regulatory and production regimes implemented by the state and employers in order to compete in an increasingly internationalized economy. In response to these challenges, trade union movements have been dramatically restructuring. Long standing principles of organization have been jettisoned in an attempt to develop new structures. Central to this process of structural adaptation are the mergers of trade unions. This informative book focuses on the merger process in Britain and Germany and uniquely it reviews the wider implications of these developments, particularly for North America. As well as addressing the reasons for mergers, the book also examines the process whereby mergers are concluded, investigates the consequences and analyses the costs and benefits of the post merger organisation. Drawing on interviews conducted with senior policy makers engaged in merger processes, this book explores the extent of internal union reform brought about by the merger process and also identifies the implications of this reform for trade unions world wide. Structured in distinct sections, this book covers topics such as what distinguishes the British and German systems, trade union structures pre merger, issues settling the terms of the mergers, post merger developments. This book forms part of the Routledge Research in Employment Relations series, featuring works of high academic merit drawn from a wide range of academic studies in the social sciences. It is a valuable resource for postgraduate students studying business and management, industrial employee relations and trade unions.
