Industrial Relations in Europe Michael Gold, Manfred Weiss, 1999-07-05 Substantial progress has been made in the last 15 years in the areas of European economic social and monetary integration aided by social dialogue on employment and industrial relations at the international level To be truly effective the social dialogue has to be underpinned by an awareness of the different national industrial relations systems This two volume series sets out to provide information on the varied systems found across the EU describing and analysing the key elements and concepts of industrial relations in the different Member States from a comparative perspective The contributions focus on three principal aspects of comparative industrial relations an analysis of the strikingly similar pressures for industrial relations in each country the degree to which the institutional arrangements have retained their national identities despite such pressures and the evolution of industrial relations within this context Countries covered in this volume are Belgium Denmark Germany Greece Italy The Netherlands Portugal Spain **Public Service Employment Relations in Europe** Stephen Bach, 1999 Written and edited by some of the country's primary authorities on public sector industrial relations this outstanding book provides an up to date analysis of the restructuring of public service employment relations in six European countries **The Transformation of**

Employment Relations in Europe Jim Arrowsmith, Valeria Pulignano, 2013-09-11 Since the 1980s the process of European economic integration within a wider context of globalization has accelerated employment change and placed a new premium on flexible forms of work organization The institutions of employment relations specifically those concerning collective bargaining between employers and trade unions have had to adapt accordingly The Transformation of Employment Relations focuses not just on recent change but charts the strategic choices that have influenced employment relations and examines these key developments in a comparative perspective A historical and cross national analysis of the most important and controversial issues explores the motivation of the actors the implementation of change and its evolution in a diverse European context The book highlights the policies and the role played by different institutional and social actors employers management trade unions professional associations and governments and assesses the extent to which these policies and roles have had significant effects on outcomes This comparative analysis of the transformation of work and employment regulation within the context of a quarter century timeframe has not been undertaken in any other book But this is no comparative handbook in which changes are largely described on a country by country basis but instead The Transformation of Employment Relations is rather focused thematically As Europe copes with a serious economic crisis understanding of the dynamics of work transformation has never been more important *Public Service Management and Employment Relations*

American Multinationals in Europe Phil Almond, Anthony Ferner, 2006-07-20 Some of the key questions in employment relations comparative business and globalization revolve around the extent to which businesses embody a national business system and what happens when these employment models are exported to other national settings By exploring the variety of ways in which US multinationals deal with these issues and their reception when operating in Europe Phil Almond Anthony Ferner and their contributors examine the interaction between globalization and national Varieties of Capitalism Using the findings of a four year international exploration of the management of employment relations in US multinationals in the UK Germany Ireland and Spain this book examines what is distinctively American about these companies and how this notion is exported The process is shown to be one that is not a technical managerial one but one that is highly political and negotiated in which groups and individuals at different levels within the company try to influence the terms of transfer These questions are not only of theoretical importance but also of practical significance in terms of the transfer of management knowledge and best practice The book will be of interest to academics researchers and advanced students of HRM International Business and Organization Studies as well as HR practitioners concerned with US multinationals operating in Europe

Economic Citizenship in the European Union Paul Teague, 2005-10-25 Paul Teague explores the macro economic productive and institutional pressures faced by Europe s social model and assesses a number of economic and political programmes aimed at resolving the crisis It also considers the role of the European Union building a social dimension to the European economy The findings suggest that the future of traditional institutions of Social Europe is under threat However they also stress that we are not on the threshold of the Americanisation of European life This study finds that the influential political forces that reject the dismantling of Europe s social model should not be preoccupied with defending inherited institutions Instead this book argues that they should encourage the construction of new forms of social solidarity compatible with the complexities of modern economic life

Posted Work in the European Union Jens Arnholtz, Nathan Lillie, 2019-10-08 Focusing on posting of workers where workers employed in one country are sent to work in another country this edited volume is at the nexus of industrial relations and European Union studies The central aim is to understand how the regulatory regime of worker posting is driving institutional changes to national industrial relations systems In the introduction the editors develop a framework for understanding the relationship of supra national EU regulation transnational actors and national industrial relations systems which we then apply in the empirical chapters This unique volume brings together scholars from diverse academic fields all of whom are experts on the topic of worker posting The book examines different aspects of the posting debate including the interactions of actors such as labour inspectorates trade unions European legal political regulators manpower firms transnational

subcontractors and posted workers The main objective of this book is to explore the dynamics of institutional change by showing how trans and supra national dynamics affect European industrial relations systems This volume will represent the state of the art in research on worker posting It will also contribute to debates on European integration social dumping labour market dualization and precariousness and will be of value to those with an interest employment relations law and regulation *Comparative Employment Relations in Europe* Guglielmo Meardi, 2023-12-31 The current economic crisis with diverging employment outcomes in different countries has revealed the ongoing relevance of comparative industrial relations but also the need for its renewal The hitherto dominating approaches based on institutions and national models do not pay sufficient attentions to change and to international factors This book fills the gap by tracing the patterns of change in industrial relations in the six largest EU countries during the last twenty years under the pressure of three crucial international forces multinational companies labour migration and EU policies Written in an accessible language and enriched by empirical case studies it is aimed at undergraduate and postgraduate students researchers and practitioners

The Regulation of Working Conditions in the Member States of the European Community Commission of the European Communities. Directorate-General for Employment, Industrial Relations, and Social Affairs, 1992 Beyond Employment Alain Supiot, Pamela Meadows, 2001 This book is the English edition of what has become widely known as The Supiot Report a bold and far reaching look at the changing nature of work initiated by the EC It takes as its starting point the profound changes that have taken place in the underlying employment relationship and associated human resource practices over the past twenty years These developments are placed in their economic social and institutional contexts while also providing a valuable comparative study of labour law in the main European countries Competitive pressures on firms the search for greater efficiency and effectiveness in the delivery of public services the changing role of women in society and the desire for greater choice on the part of individuals are all important motives for change The legal framework and the structures and organizations which represent the interests of workers and employers must respond to these changes Drawing on illustrations from a number of European countries the book suggests that the legal framework should encourage greater collaboration in the workplace particularly over issues such as training But it should also place work within its social context and facilitate genuine choices by individuals **Work and Social Policies in the New Europe** Georges Spyropoulos, Gabriel Fragnière, 1991 Work and Social Policies in the New Europe deals with one of the most urgent challenges which Europe faces in this decade the social dimension of the new unified Europe In the new economic landscape which the single market will create before the end of this Century it is important to have answers to the following questions How are we going to work and under which kind of employment contract Who will decide about our social security systems What kind of negotiations will take place about the level of our welfare and the condition of our work Who are the social partners and what kind of delegation do they have What will be the role of the individual States in this negotiations What are the arguments justifying the position of the unions or the employers Who will finally decide about the social laws in tomorrow s Europe This very timely and most useful book is about our life in the future It shows how those who are involved in shaping it from the individual experts to the members of the European Commission look at the problem and can take the necessary democratic action to build the social Europe of the next Century
