**The Empty Ocean** Richard Ellis, 2013-03-19 In *The Empty Ocean* acclaimed author and artist Richard Ellis tells the story of our continued plunder of life in the sea and weighs the chances for its recovery Through fascinating portraits of a wide array of creatures he introduces us to the many forms of sea life that humans have fished hunted and collected over the centuries from charismatic whales and dolphins to the lowly menhaden from sea turtles to cod tuna and coral Rich in history anecdote and surprising fact Richard Ellis's descriptions bring to life the natural history of the various species the threats they face and the losses they have suffered Killing has occurred on a truly stunning scale with extinction all too often the result leaving a once teeming ocean greatly depleted But the author also finds instances of hope and resilience of species that have begun to make remarkable comebacks when given the opportunity Written with passion and grace and illustrated with Richard Ellis's own drawings *The Empty Ocean* brings to a wide audience a compelling view of the damage we have caused to life in the sea and what we can do about it *ICC Register*, 1987 *Empty Promises* Nick Shepherd, 2022-03-30 *Empty Promises* By Nick Shepherd Miguel Perez is not an ambitious person leading a hedonist but ultimately unfulfilling life as a tennis pro at a high end club and selling cocaine on the side As he descends deeper into the cocaine business the ruling drug cartel tracks him down shooting Miguel and his friend Steve With a sheer amount of luck Miguel escapes just barely with his life and lands into the clutches of Steve's wealthy investment financier father Harry Edison To Miguel's dismay Harry has a plan for the young man to transform him into a completely new person someone who is successful powerful and driven In other words the son he never had *The Empty Eye of the Sea* Justin Scott, 2014-10-03 Mary Fulton and her father are trying to save their failing family tugboat business Captained by Kevin Patrick The Bowery Queen their ageing tugboat is towing a barge to Nova Scotia There they lose the barge contract but hear of an abandoned freighter adrift in the high seas They sail towards the vessel in a desperate hope of salvaging it But unknown to Kevin Mary and her crew the freighter is not completely deserted aboard is a psychopathic German fugitive and his deadly cargo With a setting of turbulent Atlantic tides this sea faring odyssey is a thrilling portrayal of man's fight for survival and supremacy over love and death **Fictioning Namibia as a Space of Desire** Renzo Baas, 2019-02-25 Modern day Namibian history has largely been shaped by three major eras German colonial rule South African apartheid occupation and the Liberation Struggle It was however not only military conquest that laid the cornerstone for the colony but also how the colony was imagined the dream of this colony As a tool of discursive worldmaking literature has played a major role in providing a framework in which to dream Namibia first from outside its borders and then from within In *Fictioning Namibia as a Space of Desire* Renzo Baas employs Henri Lefebvres city countryside dialectic and reworks it in order to uncover how fictional texts played an integral part in the violent acquisition of a foreign territory Through the production of myths around whiteness German and South African authors designed a literary space in which control destruction and the dehumanisation of African peoples are understood as a

natural order one that is dictated by history and its linear continuation These European texts are offset by Namibia's first novel by an African offering a counter narrative to the colonial invention that was German South West Africa [Learn Java with Math](#) Ron Dai, 2019-11-11 There are many good Java programming books on the market but it's not easy to find one fit for a beginner This book simplifies the complexity of Java programming and guides you through the journey to effectively work under the hood You'll start with the fundamentals of Java programming and review how it integrates with basic mathematical concepts through many practical examples You'll witness firsthand how Java can be a powerful tool or framework in your experimentation work Learn Java with Math reveals how a strong math foundation is key to learning programming design Using this as your motivation you'll be programming in Java in no time What You'll Learn Explore Java basics Program with Java using fun math inspired examples Work with Java variables and algorithms Review I/O loops and control structures Use projects such as the Wright brothers coin flip game Who This Book Is For Those new to programming and Java but have some background in mathematics and are at least comfortable with using a computer **America's Ocean Wilderness** Gary Kroll, 2008 Examines a handful of famous ocean explorers and naturalists including Jacques Cousteau Thor Heyerdahl and Rachel Carson among others to demonstrate how their work helped shape the way many Americans would think about and interact with the ocean *Federal Register*, 1970-08 **Islands through Time** Todd J. Braje, Jon M. Erlandson, Torben C. Rick, 2021-11-06 Explore the remarkable history of one of the jewels of the US National Park system California's Northern Channel Islands sometimes called the American Galapagos and one of the jewels of the US National Park system are located between 20 and 44 km off the southern California mainland coast Celebrated as a trip back in time where tourists can capture glimpses of California prior to modern development the islands are often portrayed as frozen moments in history where ecosystems developed in virtual isolation for tens of thousands of years This could not however be further from the truth For at least 13 000 years the Chumash and their ancestors occupied the Northern Channel Islands leaving behind an archaeological record that is one of the longest and best preserved in the Americas From ephemeral hunting and gathering camps to densely populated coastal villages and Euro American and Chinese historical sites archaeologists have studied the Channel Island environments and material culture records for over 100 years They have pieced together a fascinating story of initial settlement by mobile hunter gatherers to the development of one of the world's most complex hunter gatherer societies ever recorded followed by the devastating effects of European contact and settlement Likely arriving by boat along a kelp highway Paleocoastal migrants found not four offshore islands but a single super island Santarosae For millennia the Chumash and their predecessors survived dramatic changes to their land and seascapes climatic fluctuations and ever evolving social and cultural systems Islands Through Time is the remarkable story of the human and ecological history of California's Northern Channel Islands We weave the tale of how the Chumash and their ancestors shaped and were shaped by their island homes Their story is one of adaptation to shifting land and seascapes

growing populations fluctuating subsistence resources and the innovation of new technologies subsistence strategies and socio political systems Islands Through Time demonstrates that to truly understand and preserve the Channel Islands National Park today archaeology and deep history are critically important The lessons of history can act as a guide for building sustainable strategies into the future The resilience of the Chumash and Channel Island ecosystems provides a story of hope for a world increasingly threatened by climate change declining biodiversity and geopolitical instability
